Escape Theory-Margaux Froley 2013-03-12 Sixteen-year-old Devon Mackintosh has always felt like an outsider at Keaton, the prestigious California boarding school perched above the Pacific. As long as she's not fitting in, Devon figures she might as well pad her application to Stanford's psych program. So junior year, she decides to become a peer counselor, a de facto therapist for students in crisis. At first, it seems like it will be an easy fly-on-the-wall gig, but her expectations are turned upside down when Jason Hutchins (a.k.a. "Hutch"), one of the Keaton's most popular students, commits suicide. Devon dives into her new role providing support for Hutch's friends, but she's haunted by her own attachment to him. The two shared an extraordinary night during their first week freshman year; it was the only time at Keaton when she felt like someone else really understood her. As the secrets and confessions pile up in her sessions, Devon comes to a startling conclusion: Hutch couldn't have taken his own life. Bound by her oath of confidentiality--and tortured by her unrequited love--Devon embarks on a solitary mission to get to the bottom of Hutch's death, and the stakes are higher than she ever could have imagined. Read an excerpt of Escape Theory. http://bit.ly/Yi5DZF

The Loving Cup-Paul Doherty 2013-07-11 Samuel Atkins is deeply in love with Maria Eleanor, a beautiful young woman from the court of Queen Catherine. But Atkins is a poor clerk, and Maria Eleanor a foreigner, so their love must remain a secret. When an important judge is found murdered, Samuel Pepsy's followers are suspected, and Atkins is arrested. Suddenly, Maria Eleanor realizes that to save her lover and discover the hideous truth behind the crime, she must thread her way through both the treacherous alleys of London and the murky and murderous politics of those seeking to destroy the king. Based on historical events, THE LOVING CUP not only probes one of the great murder mysteries of English history but also recounts a love story as passionate as it is secretive.
Hemispheric American Studies-Caroline F. Levander 2007-10-04 This landmark collection brings together a range of exciting new comparative work in the burgeoning field of hemispheric studies. Scholars working in the fields of Latin American studies, Asian American studies, American studies, American literature, African Diaspora studies, and comparative literature address the urgent question of how scholars might reframe disciplinary boundaries within the broad area of what is generally called American studies. The essays take as their starting points such questions as: What happens to American literary, political, historical, and cultural studies if we recognize the interdependency of nation-state developments throughout all the Americas? What happens if we recognize the nation as historically evolving and contingent rather than already formed? Finally, what happens if the "fixed" borders of a nation are recognized not only as historically produced political constructs but also as component parts of a deeper, more multilayered series of national and indigenous histories? With essays that examine stamps, cartoons, novels, film, art, music, travel documents, and governmental publications, Hemispheric American Studies seeks to excavate the complex cultural history of texts and discourses across the ever-changing and stratified geopolitical and cultural fields that collectively comprise the American hemisphere. This collection promises to chart new directions in American literary and cultural studies.
GM Food on Trial-Les Levidow 2009-12-04 Europe was told that it had no choice but to accept agbiotech, yet this imperative was turned into a test of democratic accountability for societal choices. Since the late 1990s, European public controversy has kept the agri-biotech industry and its promoters on the defensive. As some opponents and regulators alike have declared, 'GM food/crops are on trial'. Suspicion of their guilt has been evoked by moral symbols, as disputes over whether genetically-modified products are modest benign improvements on traditional plant breeding, or dangerous Frankenfoods; and in disputes over whether they are global saviours, or control agents of multinational companies. This book examines European institutions being 'put on trial' for how their regulatory procedures evaluate and regulate GM products, in ways which opened up alternative futures. Levidow and Carr highlight how public controversy created a legitimacy crisis, leading to national policy changes and demands, in turn stimulating changes in EU agbiotech regulations as a strategy to regain legitimacy.
Technology, Monstrosity, and Reproduction in Twenty-first Century Horror-K. Jackson 2013-11-19 Through a wide spectrum of horror sub-genres, this book examines how the current state of horror reflects the anxieties in Western culture. Horror films bring them to a mass audience and offer new figures for the nameless faceless 'antagonist' that plagues us and provides material with which to build a different understanding of ourselves.
The Oppositional Culture Theory-Paul C. Mocombe 2010-10-11 This book explores the black/white achievement gap in America and Great Britain, gaining understanding through black bourgeois living and the labeled pathologies of the black underclass, and arguing that the social functions of the dominating black consciousness are the locus of causality for the achievement gap.
The Formation of Reason-David Bakhurst 2011-03-21 In The Formation of Reason, philosophy professor David Bakhurst utilizes ideas from philosopher John McDowell to develop and defend a socio-historical account of the human mind. The Devouring #2: Soultisce-Simon Holt 2009-09-01 The terrifying, nail-biting, and grossly intriguing sequel to The Devouring. It's been six months since Reggie first discovered and fought against the Vours, malicious and demonic beings that inhabit human bodies on the eve of the Winter Solstice. The Vours still haunt Reggie, but only in her dreams-until one night, when an unexpected visitor turns her nightmares into reality. The battle against evil continues in Soultisce, the second book in the thrilling The Devouring series, which School Library Journal called, "Comparable to books by R. L. Stine and Stephen King....A must-have for horror fans."
Ghost at Work-Carolyn Hart 2009-10-06 Bailey Ruth Raeburn has always been great at solving mysteries. Why should a little thing like her death change anything? In fact, being dead gives her more of an opportunity to be on top of events. Bailey Ruth is delighted that her unique position as a ghost makes it possible for her to lend a helping hand, sometimes seen and sometimes not. And if anybody needs a little help, it's Kathleen, the pastor's wife. There's a dead man on her porch, and once the body is discovered, the pastor is sure to become a suspect. Uncharitable people might call it meddling, but Bailey Ruth knows Kathleen needs her help! As a member of Heaven's Department of Good Intentions, Bailey Ruth goes back to earth to extricate Kathleen from a dire situation. If Bailey Ruth has to bend a few rules to help Kathleen save her family, Wiggins, her fusbudget supervisor, will make sure it all turns out right in the end.
Weapons in Space-Karl Grossman 2011-01-04 Weapons in Space examines how the United States is forcing forward--in violation of international treaties--to militarize space. Based on excerpts from U.S. government documents, award-winning investigative journalist Karl Grossman outlines the U.S. military's space doctrine, its similarity with the original Stars Wars scheme of Ronald Reagan and Edward Teller, and the space-based lasers, hypervelocity guns, and particle beams it plans to deploy in its mission to "dominate" earth. Grossman shows the intimate link between the militarization and the nuclearization of space, and follows the flow of billions of U.S. tax dollars to the corporations that research and develop weapons for space. His book explains the Outer Space Treaty and gives a history of the Global Network Against Weapons and Nuclear power in Space: what it is doing, what it plans to do--and what the reader can do to challenge U.S. plans to turn the heavens into a war zone.
The Forbidden Innocent (Mills & Boon Modern)-Sharon Kendrick 2011-01-01 New bride at Blackwood Manor? Having spent her childhood in care, Ashley Jones has no one. She desperately needs her new live-in job as an author's assistant. But she is filled with trepidation when she arrives at isolated Blackwood Manor and meets the formidable Jack Marchant. Dynamical Stabilization of the Fermi Scale-Francesco Sannino 2012-10-28 Strong dynamics constitutes one of the pillars of the standard model of particle interactions, and it accounts for the bulk of the visible matter in the universe made by ordinary protons and neutrons. It is therefore a well posed question to ask if the rest of the universe can be described in terms of new highly natural four-dimensional strongly coupled theories. The main goal of this lecture-based primer is to provide a coherent overview of how new strong dynamics can be employed to address the relevant challenges in particle physics and cosmology from composite Higgs dynamics to dark matter and inflation. We will first introduce the topic of dynamical breaking of the electroweak symmetry also known as technicolor. The knowledge of the phase diagram of strongly coupled theories plays a fundamental role when trying to construct viable extensions of the standard model. Therefore we present the state-of-the-art of the phase diagram for gauge theories as function of the number of colors, flavors, matter representation and gauge group. Recent extensions of the standard model featuring minimal technicolor theories are then introduced as relevant examples. We finally show how technicolor or in general new strongly coupled theories can lead to natural candidates of composite dark matter and inflation.
Eating With The Angels-Sarah-Kate Lynch 2013-03-01 A mouth-watering novel about love, food, heartbreak . . . and Venice. Eating means everything to Connie Farrell, she's a restaurant critic after all, so when her husband Tom fails to turn up on their second honeymoon in fairytale Venice she's rattled but she doesn't exactly lose her appetite. Quite the opposite, you could say. Handsome gonddier Marco awakes a hunger in her and sates it with all manner of mouth-watering delicacies, including himself. But Connie also has a hankering for something with a bit more zest, something muscled and tanned with silver hair and an honest heart going by the name of Luca. All second honeymoons should be so sweet! Back home in New York, however, there's more than amore on Connie's plate and none of it to her taste. Her husband is gone, her lover is a stranger, her mother is disappointed. Connie has lost sight of the simple things in life but can the cruellest of blows bring them back? Or is it too late?
Clouds of Deceit-John Smith 2011-12-01 The full story of Britain's nuclear weapons tests in the 1950s has only recently begun to emerge. Here, for the first time, through interviews and eye-witness accounts from men who watched the mushroom clouds drift over Australia and the Pacific Ocean, the tests are vividly recreated. Using official documents recently made public, evidence gathered by the Australian government's Royal Commission of Inquiry into the tests, and her own experience as an investigative journalist, Joan Smith argues forcefully that the bomb tests are far from being a historical anecdote. They remain with us in the shape of the victims - servicemen, civilians and aborigines who witnessed them - and through Britain's continuing programme of nuclear weapons tests in the United States. In this disturbing and horrific book, first published in 1985, Joan Smith raises crucial questions about the British government's responsibility to the people who took part in the tests - and shows how their effects may yet have a devastating impact on Britain's nuclear industry.
People Like Us-Javier Valdes 2006-06-06 Darkly comic and highly entertaining, Javier Valdés's stories insinuate themselves in the unsuspecting reader like a heady brew with a strange kick. From the exploits of an urban vigilante to the erotic pleasures exacted from an unrequited love, from a menacing treasure to a family that brings a whole new twist to the meaning of neighbors, People Like Us is seasoned with irreverent takes on Valdés's favorite writers and directors -- such as Stephen King and Martin Scorsese -- as he delivers a unique array of fascinating and hapless urban creations.
Racial Culture-Richard T. Ford 2009-01-10 What is black culture? Does it have an essence? What do we lose and gain by assuming that it does, and by building our laws accordingly? This bold and provocative book questions the common presumption of political multiculturalism that social categories such as race, ethnicity, gender, and sexuality are defined by distinctive cultural practices. Richard Ford argues against law reform proposals that would attempt to apply civil rights protections to "cultural difference." Unlike many criticisms of multiculturalism, which worry about "reverse discrimination" or the erosion of core Western cultural values, the book's argument is primarily focused on the adverse effects of multicultural rhetoric and multicultural rights on their supposed beneficiaries. In clear and compelling prose, Ford argues that multicultural accounts of cultural difference do not accurately describe the practices of social groups. Instead these accounts are prescriptive: they attempt to canonize a narrow, parochial, and contestable set of ideas about appropriate group culture and to discredit more cosmopolitan lifestyles, commitments, and values. The book argues that far from remedying discrimination and status hierarchy, "cultural rights" share the ideological presuppositions, and participate in the discursive and institutional practices, of racism, sexism, and homophobia. Ford offers specific examples in support of this thesis, in diverse contexts such as employment discrimination, affirmative action, and transracial adoption. This is a major contribution to our understanding of today's politics of race, by one of the most distinctive and important young voices in America's legal academy.
Too Smart for Our Own Good-Craig Dilworth 2010 A groundbreaking work explaining our ecological predicament in the context of the first scientific theory of humankind's development.
The Chaos Imperative-Ori Brafman 2013-08-13 In the bestselling tradition of Switch and Made to Stick, Ori Brafman reveals how organizations can drive growth and profits by allowing contained chaos and disruption the space to flourish, generating new ideas that trigger innovation. In The Chaos Imperative, organizational expert and bestselling author Ori Brafman (Sway, The Starfish and the Spider) shows how even the best and most efficient organizations, from Fortune 500 companies to today's US Army, benefit from allowing a little unstructured space and disruption into their planning and decision-making.
Year of the Hyenas-Brad Geagley 2005-02-22 Year of the Hyenas is a brilliant, original, and unique murder mystery, set in ancient Egypt at the height of that kingdom's glory and power. It is at once a strikingly insightful portrait of a mysterious, complex, and sophisticated society, reminiscent of Norman Mailer's Ancient Evenings in its wonderful detail and feel for the past, and a fast-paced detective story that reads like the best of twenty-first-century thrillers. From the oldest known court transcripts in history, Egyptologists have long known about the mysterious death of Ramses III, involving intrigue, ambition, greed, and crimes of passion on a huge, though hidden, scale. In Year of the Hyenas, Brad Geagley takes this event -- a struggle that nearly brought ancient Egypt to its knees -- as the backdrop for a story that is every bit as captivating as the distant civilization it resurrects. At the heart of the novel is Semerket, the so-called Clerk of Investigations and Secrets, a detective half-paralyzed by problems of his own, with a reputation for heavy drinking and tactless behavior toward the great, the powerful, and the holy, a kind of Sam Spade of the ancient world, deeply (and dangerously) addicted to the truth. Hard-bitten, deeply flawed, he is retained by the authorities to investigate what is considered an insignificant murder of an elderly, insignificant Theban priestess. They fail to inform him, however, that they don't expect him to solve the case. In fact, they don't want him to. But Semerket is not so easily fooled, and this is hardly an "insignificant" murder. As he delves deeper for the elusive truth, he uncovers a web of corruption so vast that it threatens the life of the last great Pharaoh, Ramses III, and the stability of the kingdom. Even worse, uncovering the conspiracy means more than just putting his own life on the line -- for, unbeknownst to Semerket, his adored ex-wife Naia has fallen afoul of those who would bring down the reign of Ramses, and he soon finds himself having to choose between saving her and saving Egypt.... Merging historical fact and speculation with a nail-biting crime story that could be taking place in the present, Year of the Hyenas is a riveting and remarkable achievement.
Soil Science Simplified-Helmut Kohnke 1994-12-09 A concise, inexpensive treatment! Soil Science Simplified, 4/E was written to acquaint students with the basic concepts and scientific principles of soils without the burden of an extensive study. This useful, well-priced handbook includes discussions of soil classification, soil morphology, and soil and the environment. In addition, a chapter on soil surveys helps readers understand soil resources and apply the information presented in soil surveys to managing the soil environment. Outstanding features: 1) provides essential coverage of factors of soil formation; 2) outlines the most current principles of soil taxonomy; 3) provides an assortment of helpful tables, maps, and line drawings; 4) includes an expanded glossary.

Illness as a Work of Thought-Monica Greco 2002-01-04 Illness as a Work of Thought is a practical application of Foucault's archaeological and genealogical methods of the study of illness and modernity. From medicine and psychiatry to psychology and the social sciences, Monica Greco explores what the history of these different disciplines contributes to what we understand by the term 'psychosomatics' and analyses how the study of psychosomatic illness can transform the way we think of illness, subjectivity and the ethics and politics of health.
Duration Calculus-Chaochen Zhou 2013-03-14 A comprehensive introduction to interval logic and duration calculus for modelling, analysing and verifying real-time systems. The Duration Calculus (DC) represents a logical approach to formal design of real-time systems. In DC real numbers are used to model time and Boolean-valued (i.e. {0,1}-valued) functions over time to model states of real-time systems. The duration of a state in a time interval is the accumulated presence time of the state in the interval. DC extends interval logic to a calculus to specify and reason about properties of state durations. The text covers theory (completeness, decidability, undecidability, model-checking), results, as well as case studies (Deadline Driven Scheduler).
Little White Houses-Dianne Harris 2013-01-05 A rare exploration of the racial and class politics of architecture, Little White Houses examines how postwar media representations associated the ordinary single-family house with middle-class whites to the exclusion of others, creating a powerful and invidious cultural iconography that continues to resonate today. Drawing from popular and trade maagazines, floor plans and architectural drawings, television programs, advertisements, and beyond, Dianne Harris shows how the depiction of houses and their interiors, furnishings, and landscapes shaped and reinforced the ways in which Americans perceived white, middle-class identities and helped support a housing market already defined by racial segregation and deep economic inequalities. After describing the ordinary postwar house and its orderly, prescribed layout, Harris analyzes how cultural iconography associated these houses with middle-class whites and an ideal of white domesticity. She traces how homeowners were urged to buy specific kinds of furniture and other domestic objects and how the appropriate storage and display of these possessions was linked to race and class by designers, tastemakers, and publishers. Harris also investigates lawns, fences, indoor-outdoor spaces, and other aspects of the postwar home and analyzes their contribution to the assumption that the rightful owners of ordinary houses were white. Richly detailed, Little White Houses adds a new dimension to our understanding of race in America and the inequalities that persist in the U.S. housing market.

Thinking Syntactically-Liliane Haegeman 2009-02-04 Thinking Syntactically: A Guide to Argumentation and Analysis is a textbook designed to teach introductory students the skills of relating data to theory and theory to data. Helps students develop their thinking and argumentation skills rather than merely introducing them to one particular version of syntactic theory. Structured around a wide range of exercises that use clear and compelling logic to build arguments and lead up to theoretical proposals. Data drawn from current media sources, including newspapers, books, and television programs, to help students formulate and test hypotheses. Generative in spirit, but does not focus on specific theoretical approaches but enables students to understand and evaluate different approaches more easily. Written by an established author with an international reputation.

Race, Science and Medicine, 1700-1960-Waltraud Ernst 2002-01-04 Considering cases from Europe to India, this collection brings together current critical research into the role played by racial issues in the production of medical knowledge. Confronting such controversial themes as colonialism and medicine, the origins of racial thinking and health and migration, the distinguished contributors examine the role played by medicine in the construction of racial categories.
26.2 - The Incredible True Story of the Three Men Who Shaped The London Marathon-John Bryant 2013-05-06 This is the thrilling account of heroism, ambition and scandal of three remarkable men whose actions at the 1908 Olympics overshadowed the first London Olympic Games.... A diminutive Italian, Dorando Pietri, who fell five times, and was practically carried across the finish line. Scottish sprinter, Wyndham Halswelle and American competitor, Johnny Hayes who were drawn into a dispute between the United States and the British Empire about sporting superiority which spilled over into politics, lifestyle and ethics, with allegations of cheating, drug-taking and professionalism. John Bryant delves into the lives of these three extraordinary men in a tale that stretches from rural Italy to the battlefields of the Boer War and beyond to explore the foundations of the modern sporting and marathon movement.
The Mill on the Shore-Ann Cleeves 2014-10 Meg Morrissey will not believe that her husband James committed suicide. A famous naturalist and founder of Green Scenes, a pioneering magazine about environmental issues, James was in high spirits because he'd finally completed his long awaited autobiography. He didn't leave a suicide note. But even more suspiciously the record of his life's achievement, his magnum opus, has gone missing. Troubled, Meg calls in amateur sleuths George and Molly Palmer-Jones to investigate. George and Molly's interviews soon reveal that the life of the Morrissey family in their beautiful converted mill is not as idyllic as people are led to believe. Nor are relations with James's ex-wife Cathy as friendly as Meg would like to make out. And, it emerges, James had fallen for another woman. Despite this, however, he appears to have had no enemies. Who could have wanted him dead? The disappearance of the autobiography is highly suspicious and George and Molly wonder whether the motive for the killing is to be found within its pages. Could the famous environmentalist have uncovered a secret so damaging someone was prepared to kill for it? Or was it something in James Morrissey's private life that led to his death? George and Molly must try to fit together the missing pieces of information to reveal the cleverly suppressed motives which have driven someone to murder.

The battle against evil continues in Soultisce, the second book in the thrilling The Devouring series, which School Library Journal called, "Comparable to books by R. L. Stine and Stephen King....A must-have for horror fans."
Ghost at Work-Carolyn Hart 2009-10-06 Bailey Ruth Raeburn has always been great at solving mysteries. Why should a little thing like her death change anything? In fact, being dead gives her more of an opportunity to be on top of events. Bailey Ruth is delighted that her unique position as a ghost makes it possible for her to lend a helping hand, sometimes seen and sometimes not. And if anybody needs a little help, it's Kathleen, the pastor's wife. There's a dead man on her porch, and once the body is discovered, the pastor is sure to become a suspect. Uncharitable people might call it meddling, but Bailey Ruth knows Kathleen needs her help! As a member of Heaven's Department of Good Intentions, Bailey Ruth goes back to earth to extricate Kathleen from a dire situation. If Bailey Ruth has to bend a few rules to help Kathleen save her family, Wiggins, her fusbudget supervisor, will make sure it all turns out right in the end.
Weapons in Space-Karl Grossman 2011-01-04 Weapons in Space examines how the United States is forcing forward--in violation of international treaties--to militarize space. Based on excerpts from U.S. government documents, award-winning investigative journalist Karl Grossman outlines the U.S. military's space doctrine, its similarity with the original Stars Wars scheme of Ronald Reagan and Edward Teller, and the space-based lasers, hypervelocity guns, and particle beams it plans to deploy in its mission to "dominate" earth. Grossman shows the intimate link between the militarization and the nuclearization of space, and follows the flow of billions of U.S. tax dollars to the corporations that research and develop weapons for space. His book explains the Outer Space Treaty and gives a history of the Global Network Against Weapons and Nuclear power in Space: what it is doing, what it plans to do--and what the reader can do to challenge U.S. plans to turn the heavens into a war zone.
The Forbidden Innocent (Mills & Boon Modern)-Sharon Kendrick 2011-01-01 New bride at Blackwood Manor? Having spent her childhood in care, Ashley Jones has no one. She desperately needs her new live-in job as an author's assistant. But she is filled with trepidation when she arrives at isolated Blackwood Manor and meets the formidable Jack Marchant. Dynamical Stabilization of the Fermi Scale-Francesco Sannino 2012-10-28 Strong dynamics constitutes one of the pillars of the standard model of particle interactions, and it accounts for the bulk of the visible matter in the universe made by ordinary protons and neutrons. It is therefore a well posed question to ask if the rest of the universe can be described in terms of new highly natural four-dimensional strongly coupled theories. The main goal of this lecture-based primer is to provide a coherent overview of how new strong dynamics can be employed to address the relevant challenges in particle physics and cosmology from composite Higgs dynamics to dark matter and inflation. We will first introduce the topic of dynamical breaking of the electroweak symmetry also known as technicolor. The knowledge of the phase diagram of strongly coupled theories plays a fundamental role when trying to construct viable extensions of the standard model. Therefore we present the state-of-the-art of the phase diagram for gauge theories as function of the number of colors, flavors, matter representation and gauge group. Recent extensions of the standard model featuring minimal technicolor theories are then introduced as relevant examples. We finally show how technicolor or in general new strongly coupled theories can lead to natural candidates of composite dark matter and inflation.
Eating With The Angels-Sarah-Kate Lynch 2013-03-01 A mouth-watering novel about love, food, heartbreak . . . and Venice. Eating means everything to Connie Farrell, she's a restaurant critic after all, so when her husband Tom fails to turn up on their second honeymoon in fairytale Venice she's rattled but she doesn't exactly lose her appetite. Quite the opposite, you could say. Handsome gonddier Marco awakes a hunger in her and sates it with all manner of mouth-watering delicacies, including himself. But Connie also has a hankering for something with a bit more zest, something muscled and tanned with silver hair and an honest heart going by the name of Luca. All second honeymoons should be so sweet! Back home in New York, however, there's more than amore on Connie's plate and none of it to her taste. Her husband is gone, her lover is a stranger, her mother is disappointed. Connie has lost sight of the simple things in life but can the cruellest of blows bring them back? Or is it too late?
Clouds of Deceit-John Smith 2011-12-01 The full story of Britain's nuclear weapons tests in the 1950s has only recently begun to emerge. Here, for the first time, through interviews and eye-witness accounts from men who watched the mushroom clouds drift over Australia and the Pacific Ocean, the tests are vividly recreated. Using official documents recently made public, evidence gathered by the Australian government's Royal Commission of Inquiry into the tests, and her own experience as an investigative journalist, Joan Smith argues forcefully that the bomb tests are far from being a historical anecdote. They remain with us in the shape of the victims - servicemen, civilians and aborigines who witnessed them - and through Britain's continuing programme of nuclear weapons tests in the United States. In this disturbing and horrific book, first published in 1985, Joan Smith raises crucial questions about the British government's responsibility to the people who took part in the tests - and shows how their effects may yet have a devastating impact on Britain's nuclear industry.
People Like Us-Javier Valdes 2006-06-06 Darkly comic and highly entertaining, Javier Valdés's stories insinuate themselves in the unsuspecting reader like a heady brew with a strange kick. From the exploits of an urban vigilante to the erotic pleasures exacted from an unrequited love, from a menacing treasure to a family that brings a whole new twist to the meaning of neighbors, People Like Us is seasoned with irreverent takes on Valdés's favorite writers and directors -- such as Stephen King and Martin Scorsese -- as he delivers a unique array of fascinating and hapless urban creations.
Racial Culture-Richard T. Ford 2009-01-10 What is black culture? Does it have an essence? What do we lose and gain by assuming that it does, and by building our laws accordingly? This bold and provocative book questions the common presumption of political multiculturalism that social categories such as race, ethnicity, gender, and sexuality are defined by distinctive cultural practices. Richard Ford argues against law reform proposals that would attempt to apply civil rights protections to "cultural difference." Unlike many criticisms of multiculturalism, which worry about "reverse discrimination" or the erosion of core Western cultural values, the book's argument is primarily focused on the adverse effects of multicultural rhetoric and multicultural rights on their supposed beneficiaries. In clear and compelling prose, Ford argues that multicultural accounts of cultural difference do not accurately describe the practices of social groups. Instead these accounts are prescriptive: they attempt to canonize a narrow, parochial, and contestable set of ideas about appropriate group culture and to discredit more cosmopolitan lifestyles, commitments, and values. The book argues that far from remedying discrimination and status hierarchy, "cultural rights" share the ideological presuppositions, and participate in the discursive and institutional practices, of racism, sexism, and homophobia. Ford offers specific examples in support of this thesis, in diverse contexts such as employment discrimination, affirmative action, and transracial adoption. This is a major contribution to our understanding of today's politics of race, by one of the most distinctive and important young voices in America's legal academy.
Too Smart for Our Own Good-Craig Dilworth 2010 A groundbreaking work explaining our ecological predicament in the context of the first scientific theory of humankind's development.
The Chaos Imperative-Ori Brafman 2013-08-13 In the bestselling tradition of Switch and Made to Stick, Ori Brafman reveals how organizations can drive growth and profits by allowing contained chaos and disruption the space to flourish, generating new ideas that trigger innovation. In The Chaos Imperative, organizational expert and bestselling author Ori Brafman (Sway, The Starfish and the Spider) shows how even the best and most efficient organizations, from Fortune 500 companies to today's US Army, benefit from allowing a little unstructured space and disruption into their planning and decision-making.

Year of the Hyenas-Brad Geagley 2005-02-22 Year of the Hyenas is a brilliant, original, and unique murder mystery, set in ancient Egypt at the height of that kingdom's glory and power. It is at once a strikingly insightful portrait of a mysterious, complex, and sophisticated society, reminiscent of Norman Mailer's Ancient Evenings in its wonderful detail and feel for the past, and a fast-paced detective story that reads like the best of twenty-first-century thrillers. From the oldest known court transcripts in history, Egyptologists have long known about the mysterious death of Ramses III, involving intrigue, ambition, greed, and crimes of passion on a huge, though hidden, scale. In Year of the Hyenas, Brad Geagley takes this event -- a struggle that nearly brought ancient Egypt to its knees -- as the backdrop for a story that is every bit as captivating as the distant civilization it resurrects. At the heart of the novel is Semerket, the so-called Clerk of Investigations and Secrets, a detective half-paralyzed by problems of his own, with a reputation for heavy drinking and tactless behavior toward the great, the powerful, and the holy, a kind of Sam Spade of the ancient world, deeply (and dangerously) addicted to the truth. Hard-bitten, deeply flawed, he is retained by the authorities to investigate what is considered an insignificant murder of an elderly, insignificant Theban priestess. They fail to inform him, however, that they don't expect him to solve the case. In fact, they don't want him to. But Semerket is not so easily fooled, and this is hardly an "insignificant" murder. As he delves deeper for the elusive truth, he uncovers a web of corruption so vast that it threatens the life of the last great Pharaoh, Ramses III, and the stability of the kingdom. Even worse, uncovering the conspiracy means more than just putting his own life on the line -- for, unbeknownst to Semerket, his adored ex-wife Naia has fallen afoul of those who would bring down the reign of Ramses, and he soon finds himself having to choose between saving her and saving Egypt.... Merging historical fact and speculation with a nail-biting crime story that could be taking place in the present, Year of the Hyenas is a riveting and remarkable achievement.
Soil Science Simplified-Helmut Kohnke 1994-12-09 A concise, inexpensive treatment! Soil Science Simplified, 4/E was written to acquaint students with the basic concepts and scientific principles of soils without the burden of an extensive study. This useful, well-priced handbook includes discussions of soil classification, soil morphology, and soil and the environment. In addition, a chapter on soil surveys helps readers understand soil resources and apply the information presented in soil surveys to managing the soil environment. Outstanding features: 1) provides essential coverage of factors of soil formation; 2) outlines the most current principles of soil taxonomy; 3) provides an assortment of helpful tables, maps, and line drawings; 4) includes an expanded glossary.

Illness as a Work of Thought-Monica Greco 2002-01-04 Illness as a Work of Thought is a practical application of Foucault's archaeological and genealogical methods of the study of illness and modernity. From medicine and psychiatry to psychology and the social sciences, Monica Greco explores what the history of these different disciplines contributes to what we understand by the term 'psychosomatics' and analyses how the study of psychosomatic illness can transform the way we think of illness, subjectivity and the ethics and politics of health.
Duration Calculus-Chaochen Zhou 2013-03-14 A comprehensive introduction to interval logic and duration calculus for modelling, analysing and verifying real-time systems. The Duration Calculus (DC) represents a logical approach to formal design of real-time systems. In DC real numbers are used to model time and Boolean-valued (i.e. {0,1}-valued) functions over time to model states of real-time systems. The duration of a state in a time interval is the accumulated presence time of the state in the interval. DC extends interval logic to a calculus to specify and reason about properties of state durations. The text covers theory (completeness, decidability, undecidability, model-checking), results, as well as case studies (Deadline Driven Scheduler).
Little White Houses-Dianne Harris 2013-01-05 A rare exploration of the racial and class politics of architecture, Little White Houses examines how postwar media representations associated the ordinary single-family house with middle-class whites to the exclusion of others, creating a powerful and invidious cultural iconography that continues to resonate today. Drawing from popular and trade maagazines, floor plans and architectural drawings, television programs, advertisements, and beyond, Dianne Harris shows how the depiction of houses and their interiors, furnishings, and landscapes shaped and reinforced the ways in which Americans perceived white, middle-class identities and helped support a housing market already defined by racial segregation and deep economic inequalities. After describing the ordinary postwar house and its orderly, prescribed layout, Harris analyzes how cultural iconography associated these houses with middle-class whites and an ideal of white domesticity. She traces how homeowners were urged to buy specific kinds of furniture and other domestic objects and how the appropriate storage and display of these possessions was linked to race and class by designers, tastemakers, and publishers. Harris also investigates lawns, fences, indoor-outdoor spaces, and other aspects of the postwar home and analyzes their contribution to the assumption that the rightful owners of ordinary houses were white. Richly detailed, Little White Houses adds a new dimension to our understanding of race in America and the inequalities that persist in the U.S. housing market.
A Field Guide to Demons, Fairies, Fallen Angels and Other Subversive Spirits-Carol Mack 1999-10-15 Explains how to identify the many species of demons, where to find them, and the traditional ways of appeasing or dispelling them
Thinking Syntactically-Liliane Haegeman 2009-02-04 Thinking Syntactically: A Guide to Argumentation and Analysis is a textbook designed to teach introductory students the skills of relating data to theory and theory to data. Helps students develop their thinking and argumentation skills rather than merely introducing them to one particular version of syntactic theory. Structured around a wide range of exercises that use clear and compelling logic to build arguments and lead up to theoretical proposals. Data drawn from current media sources, including newspapers, books, and television programs, to help students formulate and test hypotheses. Generative in spirit, but does not focus on specific theoretical approaches but enables students to understand and evaluate different approaches more easily. Written by an established author with an international reputation.

The Mill on the Shore-Ann Cleeves 2014-10 Meg Morrissey will not believe that her husband James committed suicide. A famous naturalist and founder of Green Scenes, a pioneering magazine about environmental issues, James was in high spirits because he'd finally completed his long awaited autobiography. He didn't leave a suicide note. But even more suspiciously the record of his life's achievement, his magnum opus, has gone missing. Troubled, Meg calls in amateur sleuths George and Molly Palmer-Jones to investigate. George and Molly's interviews soon reveal that the life of the Morrissey family in their beautiful converted mill is not as idyllic as people are led to believe. Nor are relations with James's ex-wife Cathy as friendly as Meg would like to make out. And, it emerges, James had fallen for another woman. Despite this, however, he appears to have had no enemies. Who could have wanted him dead? The disappearance of the autobiography is highly suspicious and George and Molly wonder whether the motive for the killing is to be found within its pages. Could the famous environmentalist have uncovered a secret so damaging
