Preserving New York-Anthony Wood 2013-10-28 Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

Louder and Faster-Deborah Wong 2019-09-10 A free open access ebook is available upon publication. Learn more at [www.luminosoa.org](http://www.luminosoa.org). Louder and Faster is a cultural study of the phenomenon of Asian American taiko, the thundering, athletic drumming tradition that originated in Japan. Immersed in the taiko scene for twenty years, Deborah Wong has witnessed cultural and demographic changes and the exponential growth and expansion of taiko particularly in Southern California. Through her participatory ethnographic work, she reveals a complicated story embedded in memories of Japanese American internment and legacies

of imperialism, Asian American identity and politics, a desire to be seen and heard, and the intersection of culture and global capitalism. Exploring the materialities of the drums, costumes, and bodies that make sound, analyzing the relationship of these to capitalist multiculturalism, and investigating the gender politics of taiko, Louder and Faster considers both the promises and pitfalls of music and performance as an antiracist practice. The result is a vivid glimpse of an Asian American presence that is both loud and fragile.

Managing Across Diverse Cultures in East Asia-Malcolm Warner 2013 Why 'Managing across diverse cultures in East Asia'? We re-examine in this book the link between culture and management across the region vis a vis the new economic, political and social landscape that has appeared over the last decade. We accordingly present a set of chapters on East Asian cultures, economies, societies and their management across the board, focusing on countries such as China, Japan, South Korea, as well as the Overseas Chinese enclaves of Hong Kong SAR, Macao and Taiwan. The contributors to this edited book are all specialists in their respective fields; they hail from a variety of universities and business schools across the world, located in a wide range of countries in the East and in the West. The chapters, we believe, reflect a balance between the past and present, theory and practice, as well as the general and the particular. 'East Asia could not be more important. Malcolm Warner could not be more insightful. Reading Managing Across Diverse Cultures in East Asia will allow you to gain a profound understanding of the cultural complexity in this dynamic region of the world.' - Nancy J. Adler, McGill University, Montreal 'We all need to understand more about management in East Asia, and to learn from it. Managing Across Diverse Cultures in East Asia has contributions from international experts who provide significant insights into the cultures of the most dynamic region in the world today. This book is a landmark publication.' - John Child, University of Birmingham 'This edited volume, with contributions by significant scholars from around the globe, provides a timely and penetrating review of management issues across East Asia, a region that rivals Europe and North American in economic significance and is still ascending. It is a must read for anyone who is interested in international management.' - Kwok Leung, City University of Hong Kong 'Helping a new generation of readers interested in this important region to make better sense, Managing Across Diverse Cultures in East Asia is destined to become a new classic. I expect this well-researched book to be widely read, cited, and debated in the years to come.' - Mike W Peng, University of Texas at Dallas 'Having had such unexpected disasters as earthquakes, floods and financial crises in recent years, we are increasingly dependent on people-management. Development of human resources, in turn, requires region-specific and organization-specific strategies. The present volume edited by Malcolm Warner points the reader to the secret of success in high-performing economies and firms in East Asia.' - Yoko Sano, Kaetsu University, Tokyo

Trace Elements in Obstetrics and Gynecology-Naira Roland Matevosyan, Dr 2013-02-10 A trace element (TE) is a chemical element presented below ~0.1 wt. % and required in minute quantities to maintain proper physical functioning. TE analysis in clinical samples (plasma, urine, cerebro-spinal fluid, full-term placenta, hair, nails, buccal mucosa, semen, biopsy specimens) has received increasing attention. Based on 62 sources, current effort presents comparative knowledge about the attempts to accurately trace TE in clinical samples through Vis/NIR, PIXE, TXRF, GFAAS, ICP-MS. It informs the need for further research adjustments to reveal the reciprocal states of certain TE (Cu/Zn, Ca/Mg, Fe/ Pb) in correlation with their real-time counts in both maternal and neonatal umbilical cord plasma, and in relation to augmented oxidative stress. This would help to achieve consistency in interpreting obstetrical complications (preeclampsia, prematurity, or gestational diabetes). Generated hypotheses should target plausible mechanisms behind TE alterations and their stage-sensitive measures in gynecological cancer. New prospects are discussed in management and prognosis of endometriosis and premature ovarian failure (POF).

Withdrawing Under Fire-Joshua L. Gleis 2011-04-30 The post-9/11 world has witnessed a rebirth of irregular and asymmetrical warfare, which, in turn, has led to an increase in conflicts between conventional armies and non-state armed groups. In their haste to respond to the threat from insurgencies, nations often fail to plan effectively not only for combat operations but also for withdrawal, which is inevitable, win or lose. In order to answer the question of how to withdraw from engagement with an insurgency, Gleis examines how insurgencies are conducted and what, if anything, is unique about an Islamist insurgency. He then proposes ways to combat these groups successfully and to disentangle one's military forces from the war once strategic objectives have been met—or once it is clear that they cannot be. Because this type of warfare is dynamic and ever-changing, this book is not meant to suggest a set of cookie-cutter solutions for how to withdraw from insurgencies. Rather, the author analyzes six counterinsurgency operations that have taken place in the past, with the intention of gleaning from them as many lessons as possible to better prepare for future withdrawals. The literature on how wars end has failed to explore irregular warfare. This much needed reexamination serves as an indispensable starting point.
