The Two Faces of Islam-Stephen Schwartz 2003-09-09 Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-

sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

Islam in the West-Max Farrar 2012-06-29 "In recent years the debate on multiculturalism in the UK and other Western societies has focused principally on Islam, and the specific 'problems' said to be posed by Muslims have been invoked to justify the claim that multiculturalism has failed. That claim is opened to scrutiny and challenged in this unique collection through a series of explorations of specific issues and controversies - including the question of the veil, crime, political Islam, the role of Muslim women, sexuality and the Danish cartoons affair - and through more general reflections on the nature of multiculturalism. By exploring the nature of cultural differences and sensitivities and examining the way conflicts have played out, this challenging book makes a wide-ranging contribution to debate and a more constructive inter-cultural engagement. The contributors draw upon the disciplines of social science, ethics, theology, philosophy and education to examine the nature of the issues and flashpoints and to draw out implications for theory, policy and practice." --from back cover.

StuG III Assault Sturmgeschütz III Ausführung A to E (SdKfz 142) Enthusiasts' Manual-Mark Healy 2019-12-17 The German Sturmgeschütz series of assault guns was a successful and cost-effective range of armoured fighting vehicles; of which some 10,000 were built during the Second World War. Based on the chassis of the Panzer III tank; the turret was replaced by an armoured fixed superstructure fitted with a more powerful 7.5cm StuK 40 L/48 gun. Originally intended as a mobile assault weapon for infantry support; the StuG was constantly modified and saw extensive use on all battlefronts as an assault gun and tank destroyer. Its fixed superstructure with limited-traverse mounting for the main armament was simpler and cheaper to build than the turret of the battle tank; plus its low height meant it was easy to camouflage and conceal. Towards the end of the war; more StuGs were built than tanks. StuGs also saw combat when used by several Axis allies; notably Romania and Finland. They were also exported to Bulgaria, Hungary, Italy, and Spain. The Soviet Union gave some of their captured German vehicles to Syria in the 1950s, which continued to use them up until the War over Water against Israel in the mid-1960s. By the time of the Arab-Israeli Six-Day War in 1967; all of them had been either destroyed, stripped for spare parts, or placed on the Golan Heights as static pillboxes.
