Model Driven Architecture and Ontology Development-Dragan Gašević 2006-11-22 Defining a formal domain ontology is considered a useful, not to say necessary step in almost every software project. This is because software deals with ideas rather than with self-evident physical artefacts. However, this development step is hardly ever done, as ontologies rely on well-defined and semantically powerful AI concepts such as description logics or rule-based systems, and most software engineers are unfamiliar with these. This book fills this gap by covering the subject of MDA application for ontology development on the Semantic Web. The writing is technical yet clear, and is illustrated with examples. The book is supported by a website.

Winning-Travis Moody 2016-05-13 There is no question that life is definitely more fun when we win. Unfortunately, many of us are just drifting through life while often facing defeat at every turn. We long to improve our relationships, our health, and our finances, but for many of us, it seems as though we are just getting by in life. The good news is that God does not want us just to survive so that we can enjoy eternity. God wants for us the same thing that we all want for ourselves to win in life. He wants for us to win in our relationships, in our health, and in our finances. This book will help you do just that. Winning begins with a brief self-assessment that encourages honest reflection on the kinds of behaviors that trigger freedom, peace, and inner strength. Travis Moody, a former college athlete and corporate executive turned life coach and stewardship consultant relies on his personal experiences both good and bad to provide practical and spiritual advice intended to help you move from merely surviving to living a life of success and ultimately a life fulfilling your own unique purpose. In this step-by-step guide, you will learn how to win in every area of your life.

The Millionaire Next Door-Thomas J. Stanley 2010-11-30 How do the rich get rich? An updated edition of the "remarkable" New York Times bestseller, based on two decades of research (The Washington Post). Most of the truly wealthy in the United States don't live in Beverly Hills or on Park Avenue. They live next door. America's wealthy seldom get that way through an inheritance or an advanced degree. They bargain-shop for used cars, raise children who don't realize how rich their families are, and reject a lifestyle of flashy exhibitionism and competitive spending. In fact, the glamorous people many of us think of as "rich" are actually a tiny minority of America's truly wealthy citizens—and behave quite differently than the majority. At the time of its first publication, The Millionaire Next Door was a groundbreaking examination of America's rich—exposing for the first time the seven common qualities that appear over and over among this exclusive demographic. This edition includes a new foreword by Dr. Thomas J. Stanley—updating the original content in the context of the financial crash and the twenty-first century. "Their surprising results reveal fundamental qualities of this group that are diametrically opposed to today's earn-and-consume culture." —Library Journal

Black Garden-Thomas De Waal 2003 "In Black Garden, Thomas de Waal tells the full story of this tragic quarrel and its aftermath for the first time. He travels the length and breadth of Armenia and Azerbaijan, talking to veterans, refugees and the inhabitants of ruined towns and villages. He recreates the story of the descent into conflict of two former Soviet neighbors, its disastrous consequences and the confused efforts of the "Great Powers" - Russia, France and the United states - to bring peace to the Caucasus."--BOOK JACKET.

Start-up Nation-Dan Senor 2011-09-07 START-UP NATION addresses the trillion dollar question: How is it that Israel-- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.
