Displaying Time Series, Spatial, and Space-Time Data with R-Oscar Perpignan Lamigueiro 2014-04-04 Code and Methods for Creating High-Quality Data Graphics A data graphic is not only a static image, but it also tells a story about the data. It activates cognitive processes that are able to detect patterns and discover information not readily available with the raw data. This is particularly true for time series, spatial, and space-time datasets. Focusing on the exploration of data with visual methods, Displaying Time Series, Spatial, and Space-Time Data with R presents methods and R code for producing high-quality graphics of time series, spatial, and space-time data. Practical examples using real-world datasets help you

understand how to apply the methods and code. The book illustrates how to display a dataset starting with an easy and direct approach and progressively adding improvements that involve more complexity. Each of the book's three parts is devoted to different types of data. In each part, the chapters are grouped according to the various visualization methods or data characteristics. Web Resource Along with the main graphics from the text, the author's website offers access to the datasets used in the examples as well as the full R code. This combination of freely available code and data enables you to practice with the methods and modify the code to suit your own needs.

Who was Who on TV-Norman Chance 2011-01-07 The information herein was accumulated of fifty some odd years. The collection process started when TV first came out and continued until today. The books are

in alphabetical order and cover shows from the 1940s to 2010. The author has added a brief explanation of each show and then listed all the characters, who played the roles and for the most part, the year or years the actor or actress played that role. Also included are most of the people who created the shows, the producers, directors, and the writers of the shows. These books are a great source of trivia information and for most of the older folk will bring back some very fond memories. I know a lot of times we think back and say, "Who was the guy that played such and such a role?" Enjoy!

World Bank South Asia Economic Update 2010-World Bank 2010-08-10 'The World Bank South Asia Economic Update 2010: Moving Up, Looking East' is the World Bank's comprehensive annual report on the region's economies. In this first edition, the Bank finds that South Asia's strong rebound since March 2009 is comparable to that in East Asia. Government policy, external support, resumption of private spending and global recovery are driving the rebound. Robust and timely policy interventions were, and continue to be, a key to confidence and recovery. South Asia's particular strengths and forms of global integration not the lack of it were the main factors that allowed greater resilience. As a special topic, the report examines and recommends three principal directions to reposition South Asia's trade and investment integration policies and profitably expand their domestic economies in both manufacturing and services.

Norway-International Monetary Fund. European Dept. 2013-09-05 This 2013 Article IV Consultation highlights that Norwegian economy has been performing well, with mainland GDP growing steadily. However, the continuing buildup of assets in the sovereign wealth fund and the increasing share of the mainland economy that is supplying goods and services to the oil sector are leading to competitiveness pressures in other industries exposed to international competition. The IMF staff report suggests that

inflation is expected to be below target for some time and gradually rise to the target in the medium term. Human Trafficking Around the World-Stephanie Hepburn 2013-06-04 This unprecedented study of sex trafficking, forced labor, organ trafficking, and sex tourism across twenty-four nations highlights the experiences of the victims, perpetrators, and anti-traffickers involved in this brutal trade. Combining statistical data with intimate accounts and interviews, journalist Stephanie Hepburn and justice scholar Rita J. Simon create a dynamic volume sure to educate and spur action. Hepburn and Simon recount the lives of victims during and after their experience with trafficking, and they follow the activities of traffickers before capture and their outcomes after sentencing. Each chapter centers on the trafficking practices and anti-trafficking measures of a single country: Australia, Brazil, Canada, Chile, China, Colombia, France, Germany, India, Iran, Iraq, Israel, Italy, Japan, Mexico, Niger, Poland, Russia, South

Africa, Syria, Thailand, the United Arab Emirates, the United Kingdom, and the United States. Examining these nations' laws, Hepburn and Simon reveal gaps in legislation and enforcement and outline the cultural norms and biases, societal assumptions, and conflicting policies that make trafficking scenarios so pervasive and resilient. This study points out those most vulnerable in each nation and the specific cultural, economic, environmental, and geopolitical factors that contribute to each nation's trafficking issues. Furthermore, the study also highlights common phenomena that governments and international anti-traffickers should consider in their fight against this illicit trade.

Denmark-International Monetary Fund. European Dept. 2013-01-23 The global financial crisis hit Denmark hard, and the recovery has been slow and unsteady. Denmark's slow growth predates the recent economic crisis, and the economy has underperformed its regional peers. The current account remains in surplus, largely reflecting weak domestic demand since the crisis and strong net income. Monetary policy is based on maintaining a tight peg to the euro. Denmark's financial system has rebuilt capital but still has substantial vulnerabilities. Potential growth is expected to recover gradually.

Mental Toughness-Michael Sheard 2012 Mental toughness is one of the most common terms used in sport - by athletes, coaches, spectators and the media. However, it is also one of the least understood terms. This book examines the characteristics and development of mentally tough sport performers, and presents the cutting-edge research in this area. Within these chapters, the author proposes that mental toughness is a personality style and mindset, and presents a compelling case for its inclusion within the positive psychological paradigm. This second edition has been updated to include new material on the characterisation, conceptualisation, measurement, and development of mental toughness. As in the first edition the book includes a historical overview of empirical research, and also describes the conceptual arguments behind this research. Now packed with even more rigorous scientific evidence and bang up-to-date anecdotes from the world of sport, the book presents a fascinating explanation of why some athletes are successful, and how and why they stay on top. Mental Toughness: The Mindset Behind Sporting

Achievement will be essential reading for all sport psychology, sport science, sport studies, and coaching students.

Mongolia Economic Retrospective 2008-2010-World Bank 2010-10-12 Mongolia was one of the East Asian economies hardest hit by the global downturn, as copper prices collapsed and external demand fell. This Economic Retrospective highlights the key economic, financial and policy developments in the country during the crisis and recovery over 2008 to 2010. In particular, it offers a closer look at the weaknesses in the economic structure and policy environment that lay at the heart of downturn, and which amplified the external shock due to the collapse in global commodity prices from mid-2008. The Retrospective offers valuable insights into how an inappropriate policy mix can culminate in macroeconomic instability. In Mongolia's case, a combination of expansive fiscal and monetary policy during the boom years, a de facto peg to the US dollar, and an overheating financial sector triggered a loss of confidence in the banking sector, large reserve losses and deposit flight, and caused a large fiscal and balance of payments shock that necessitated assistance by the IMF and other donors. Although the economy has rebounded since the end of 2009 and the successful negotiation of the Oyu Tolgoi (OT) mining project has helped transform the medium to long-term outlook, there remain sizeable policy challenges. In particular, the looming mining

boom brings the risks of Dutch disease effects and a return to the profligate populism of the past. In the near term significant fiscal financing risks remain until revenues from OT are realized. In particular, this Retrospective discusses the need for continued fiscal consolidation and how the adoption of the planned fiscal stability law should help manage the upcoming mining boom. Meanwhile, ongoing solvency problems in the banking sector need to be resolved quickly and transparently to prepare the sector for the upturn in economic activity.

Transformation Audit 2011-Jan Hofmeyr 2011 The 2011 Transformation Audit presents a collection of articles by South African thought leaders, which asks how the country can set goals and achieve them in a hostile global climate that threatens developmental gains that have been painstakingly achieved. For nearly two decades, South Africans have conducted exhaustive analyses of the country's challenges, embarked on bold scenario exercises and, more recently, produced forward looking strategies aimed at addressing these challenges. The most eminent of these in recent years were the Department of Economic Development's New Growth Path, and the National Planning Commission's Draft National Development Plan. We know now what the problems are and, by and large, what needs to change to address them. Courage is required now to forge consensus, to take decisions on strategies, and to start implementing them. As in previous years, this publication, with its slightly different format and appearance, seeks to provide analysis and provoke debate on how this might be achieved.

From Financial Crisis to Global Recovery-Padma Desai 2011-06-01 In this book, Padma Desai makes the complexities of economic policy and financial reform accessible to a wide audience. Merging a compelling narrative with scholarly research, she begins with a systematic breakdown of the factors leading to America's recent recession, describing the monetary policy, tax practices, subprime mortgage scandals, and lax regulation that contributed to the crisis. She also discusses the Treasury-Fed rescue deals that saved several financial institutions and the involvement of Congress in passing restorative policies. Desai follows with an analysis of stress tests and other economic measures, and she frankly assesses whether the U.S. economy is truly on the mend. Expanding her view, she considers the prospects for recovery in North America as a whole, as well as in Europe, Asia, and South America, and the extent and value of U.S. and E.U. regulatory proposals. Refocusing on American financial practices, Desai evaluates hedge funds

and derivatives, credit default swaps, and rating agencies, pondering whether the dollar can remain a reserve currency. She concludes with a historical comparison of the Great Depression and the Great Recession, weighing the effect of the economic collapse on the future of American capitalism.

Switzerland-International Monetary Fund. European Dept. 2013-05-21 The Article IV Consultation discusses the IMF Executive Board's assessment of economic developments and policies in Switzerland. With the exchange rate floor in place for more than one year, the Swiss economy has been relatively stable. Although overall export growth is weak, the external position remains comfortable, reflecting high investment income and strong export performance in some sectors. Executive Directors noted that, notwithstanding Switzerland's stable economy and strong policy frameworks, risks stemming mostly from the euro area crisis and vulnerabilities in the domestic financial sector have clouded the near-term outlook.

Bangladesh: Staff Report for the 2013 Article IV Consultation and Third Review Under the Extended Credit Facility and Request for Modification of Performance Criteria-International Monetary Fund. Asia and Pacific Dept 2013-12-05 This paper discusses Bangladesh's Third Review Under the Extended Credit Facility and Request for Modification of Performance Criteria. Political uncertainty and nationwide strikes are taking a toll on economic activity, with private investment most affected. Real GDP growth moderated in FY2013 (July 2012-June 2013) to 6 percent (FY2012: 6.2 percent). Recent data on private credit and tax collections suggest economic activity continues to slow. The program remains on track. All performance criteria at end-June 2013 were met, and all structural benchmarks have been completed. The IMF staff recommends completion of the review and modification of the performance criteria for December 2013.

Sustainable Building Adaptation-Sara J. Wilkinson 2014-01-21 How to adapt existing building stock is a problem being addressed by local and state governments worldwide. In most developed countries we now spend more on building adaptation than on new construction and there is an urgent need for greater knowledge and awareness of what happens to commercial buildings over time. Sustainable Building Adaptation: innovations in decision-making is a significant contribution to understanding best practice in sustainable adaptations to existing commercial buildings by offering new knowledge-based theoretical and practical insights. Models used are grounded in results of case studies conducted within three

collaborative construction project team settings in Australia and the Netherlands, and exemplars are drawn from the Americas, Asia, Japan, Korea and Europe to demonstrate the application of the knowledge more broadly. Results clearly demonstrate that the new models can assist with informed decision-making in adaptation that challenges some of the prevailing solutions based on empirical approaches and which do not accommodate the sustainability dimension. The emphasis is on demonstrating how the new knowledge can be applied by practitioners to deliver professionally relevant outcomes. The book offers guidance towards a balanced approach that incorporates sustainable and optimal approaches for effective management of sustainable adaptation of existing commercial buildings.

Can Peace Research Make Peace?-Professor Timo Kivimäki 2012-12-28 This book is about the process and, more generally, about the opportunities that peace research and the teaching of conflict resolution can offer academic diplomacy. As such the book is both an empirical and a theoretical project. While it aims at being the most comprehensive analysis of the conflict in West Kalimantan, it also launches a new theoretical approach, neo-pragmatism, and offers lessons for the prevention of conflicts elsewhere. While being based on the classical pragmatist theories of truth and explanation, the approach developed in this book incorporates the complications to social science theory caused by the 'discovery' of socially constructed realities, and concepts such as speech acts. Yet, instead of just theorizing speech acts and social constructs, the theoretical mission is to offer pragmatic, detailed, concrete prescriptions of what to do to deconstruct realities that threaten peace by the means available for research and scholars of peace.
