Plunkett's Automobile Industry Almanac 2009-Jack W Plunkett 2008 Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

Preserving New York-Anthony Wood 2013-10-28 Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

International Directory of Company Histories-Tina Gant 2008-08-29 Multi-volume major reference work bringing together histories of companies that are a leading influence in a particular industry or geographic location. For students, job candidates, business executives, historians and investors.

The Two Faces of Islam-Stephen Schwartz 2003-09-09 Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

Professor Takeshi Shimodo doesn't know what to believe when smart-mouthed Hannah appears on his doorstep, claiming to be haunted by the ghost of his best friend. Yet she exhibits some extraordinary psychic abilities. And her determination to find justice for the crash victims, in spite of her fragile health, touches his heart. Takeshi's acupressure techniques are meant to calm Hannah's erratic heartbeat, but the longer they are together, the more his magic fingers have the opposite effect. Islam in the West-Max Farrar 2012-06-29 "In recent years the debate on multiculturalism in the UK and other Western societies has focused principally on Islam, and the specific 'problems' said to be posed by Muslims have been invoked to justify the claim that multiculturalism has failed. That claim is opened to scrutiny and challenged in this unique collection through a series of explorations of specific issues and controversies - including the question of the veil, crime, political Islam, the role of Muslim women, sexuality and the Danish cartoons affair - and through more general reflections on the nature of multiculturalism. By exploring the nature of cultural differences and sensitivities and examining the way conflicts have played out, this challenging book makes a wide-ranging contribution to debate and a more constructive inter-cultural engagement. The contributors draw upon the disciplines of social science, ethics, theology, philosophy and education to examine the nature of the issues and flashpoints and to draw out implications for theory, policy and practice." --from back cover.

"I was able to find my voice, and to find tears and to find levels, because I was able to have a safe place to go, that I could come back from. With your technique, in character prep, when I visit a character's life, her past and create an event good or tragic - that belongs to her. I don't take ownership of that pain with me. I don't take it on as my own...So this allows me not to be scared to go there, which allows me freedom as an actress to do anything, because I don't own it. It belongs to my character."-Amy Adams "Working with Warner was a revelation. I doubted that I could ever work without "observing" and judging every moment. I will be forever grateful [to Warner] for helping me get back to the joy of living in the spontaneous truth of every scene."-Kyra Sedgwick "I've been working with Warner Loughlin for years. Not only has she helped me become a better actor, but she's also helped me truly enjoy this work in ways I never imagined."-Ryan Reynolds "Before I started working with Warner on the technique, I felt like acting was just something that I could some days do, and some days not do. It was only through doing deep emotion with detail on each of the characters I got, that I could act everyday how I wanted to, because I ended up knowing the character inside and out. The thoughts are no longer my own, but the characters', so I don't have to work as hard during the scenes. Now being on set and being the character is fun and never feels pushed. I love the technique and it has helped me immensely."-Sosie Bacon "I met Warner over 10 years ago. She has coached me through comedy, drama, and even life! She has not only given me tools to be better at my job, but tools to be 100% confident through the process."-Emma Roberts "Warner's Technique has become part of my creative process... It's simply the most intuitive way for me to find a character's base human emotion. Warner worked with us on Disney's Frozen for many months and helped us create truthful characters... I've never felt so comfortable animating a character before and I think the sophistication in the performance in the film speaks for itself."-Lino DiSalvo, Head of Animation for Disney's Frozen

U.S. Navy Program Guide - 2017-Department Of the Navy 2019-03-12 The U.S. Navy is ready to execute the Nation's tasks at sea, from prompt and sustained combat operations to every-day forward-presence, diplomacy and relief efforts. We operate worldwide, in space, cyberspace, and throughout the maritime domain. The United States is and will remain a maritime nation, and our security and prosperity are inextricably linked to our ability to operate naval forces on, under and above the seas and oceans of the world. To that end, the Navy executes programs that enable our Sailors, Marines, civilians, and forces to meet existing and emerging challenges at sea with confidence. Six priorities guide today's planning, programming, and budgeting decisions: (1) maintain a credible, modern, and survivable sea based strategic deterrent; (2) sustain forward presence, distributed globally in places that matter; (3) develop the capability and capacity to win decisively; (4) focus on critical afloat and ashore readiness to ensure the Navy is adequately funded and ready; (5) enhance the Navy's asymmetric capabilities in the physical domains as well as in cyberspace and the electromagnetic spectrum; and (6) sustain a relevant industrial base, particularly in shipbuilding.

Combustion-Irvin Glassman 2014-12-02 Throughout its previous four editions, Combustion has made a very complex subject both enjoyable and understandable to its student readers and a pleasure for instructors to teach. With its clearly articulated physical and chemical processes of flame combustion and smooth, logical transitions to engineering applications, this new edition continues that tradition. Greatly expanded end-of-chapter problem sets and new areas of combustion engineering applications make it even easier for students to grasp the significance of combustion to a wide range of engineering practice, from transportation to energy generation to environmental impacts. Combustion engineering is the study of rapid energy and mass transfer usually through the common physical phenomena of flame oxidation. It covers the physics and chemistry of this process and the engineering applications—including power generation in internal combustion automobile engines and gas turbine engines. Renewed concerns about energy efficiency and fuel costs, along with continued concerns over toxic and particulate emissions, make this a crucial area of engineering. New chapter on new combustion concepts and technologies, including discussion on nanotechnology as related to combustion, as well as microgravity combustion, microcombustion, and catalytic combustion—all interrelated and discussed by considering scaling issues (e.g., length and time scales) New information on sensitivity analysis of reaction mechanisms and generation and application of reduced mechanisms Expanded coverage of

turbulent reactive flows to better illustrate real-world applications Important new sections on stabilization of diffusion flames—for the first time, the concept of triple flames will be introduced and discussed in the context of diffusion flame stabilization

A History of the Women Marines, 1946-1977-Mary V. Stremlow 2014-06-04 Despite the acknowledged contribution made by the 20,000 women Reservists who served in the Marine Corps during World War II, there was no thought in 1946 of maintaining women on active duty or, for that matter, even in the Reserve forces. This volume recounts the events that brought about the change in thinking on the part of Marines, both men and women, that led to the integration of women into the Corps, to the point where they now constitute eight percent of our strength. A History of the Women Marines, 1946-1977 is almost entirely derived from raw files, interviews and conversations, newspaper articles, muster rolls and unit diaries, and materials loaned by Marines. There was no one large body of records available. In the course of the project, more than 300 letters were written to individuals, several mass mailings were made, and notices soliciting information were printed in all post and station newspapers, Leatherneck, Marine Corps Gazette, Retired Marine, and the newsletters of Marine Corps associations. More than 100 written responses were received and some women Marines generously loaned us personal papers and precious scrapbooks. Especially helpful in piecing together the events between World War II and the passage of the Women's Armed Services Integration Act were the scrapbooks of former Director of Women Marines Colonel Julia E. Hamblet, and former WR Dorothy M. Munroe. Taped interviews were conducted with 32 women, including former Director of the Women's Reserve Colonel Ruth Cheney Streeter. Researching this history was a challenge. Women's units were extremely difficult to find. Only those labeled "Women Marine Company" were easily identified. At times, days were spent screening the muster rolls of all the companies of all the battalions on a base looking for one with personnel having feminine first names. More recent unit diaries were even less useful since they are not signed by commanding officers and initials are used rather than first names. To add to the problem, the Corps had no system that permits a researcher to find a married woman when only her maiden name is known, or vice versa.
