Poly(lactic acid) Science and Technology-Alfonso Jiménez 2014-11-13 Biodegradable polymers from renewable resources are sought after for many purposes, from packaging materials in food to biomedical applications. Poly (lactic acid) (PLA) is a well-known biopolymer derived from corn starch or sugar cane used in different food packaging and artificial bones and scaffolds. Poly(lactic acid) Science and Technology first introduces the basic concepts of PLA and then covers PLA synthesis and polymerization, processing, characterization and physical properties of PLA, PLA-based nano-biocomposites, the main applications in active packaging and as biomaterials for tissue engineering, degradation and biodegradation of PLA and finally industrial and legislative issues. This interdisciplinary approach provides readers with a general overview of all relevant aspects related to PLA including fundamental issues, innovative applications, new types of processing and emerging applications, modification of PLA, life cycle assessment, bio-additives, bio/degradation and sustainability and international regulations. Experts provide a complete resource and whole perspective on PLA covering scientific, ecological, social and economic issues. The book will appeal to chemists, food technologists and materials engineers as well as researchers interested in bio-based and biodegradable polymers and composites.

Pesticides-Sonia Soloneski 2014-02-20 The edited book Pesticides - Toxic Aspects contains an overview of attractive researchers of pesticide toxicology that covers the hazardous effects of common chemical pesticide agents employed every day in our agricultural practices. The combination of experimental and theoretical pesticide investigations of current interest will make this book of significance to researchers, scientists, engineers, and graduate students who make use of those different investigations to understand the toxic aspects of pesticides. We hope that this book will continue to meet the expectations and needs of all interested in different aspects of pesticide toxicity.

Guinness World Records: Science & Stuff-Guinness World Records 2018-01-09 Guinness World Records: Science & Stuff is a whirlwind tour through the astounding, record-breaking world (and universe) around us, with an intro from TV science educator and author Science Bob. Packed with spectacular superlatives, shocking stats, fantastic facts and fun figures, Science & Stuff celebrates the simple joy in finding things out. It tackles the big questions that keep people up at night, such as: • Can you belch in space? • What does woolly mammoth taste like? • How much would the Death Star cost? • Is the answer to this question no? Join us as we rise from the depths of the ocean, home to vampire squids from hell, to the dizzy heights of the International Space Station, where scientists unravel the secrets of (pooping in) zero-g. On the way we stop to talk with some of the men and women who are out in the world finding answers and making stuff. Ever wanted to know what it's like to ride a motorized toilet at highway speeds, command a swarm of tiny robots or spend a year in space? Well, you'll find your answers in here. And that's not all - have a go at ten record-breaking science experiments in the special Make & Break section. Our very own mad professor, Burnaby Q Orbax, and his trusty lab assistant Sweet Pepper Klopek, guide you through at-home challenges, from the greatest height to drop an egg without it breaking to the farthest distance by a Mentos and soda car. It's gonna get messy! Guinness World Records: Science & Stuff - the grossest, smelliest, weirdest and noisiest guide to, well, science... and stuff.
