Perspectives for Contemporary Music in the 21st Century-Dániel Péter Biró 2016-10-14

21st Century Innovation in Music Education-Kun Setyaning Astuti 2019-11-27 Music is an expression of feelings of the soul conveyed through the medium of sound. But not all sounds are music. It might be said that only an organised sound or series of sounds can be called music. Thus, music is connected to the eternal and constant flow and order of the universe, to the laws and rhythms of nature. It can also be said that musical order is comparable to the natural order of the universe. There are laws of a certain nature in the natural sciences and likewise in music there are structures and procedures, or even rules, that should be followed to produce beautiful music. The International Conference "Innovations for 21st Century Music Education and Research" provided a timely opportunity to take stock of the latest developments in music education and brought together educators, researchers and members of the broader community in a welcoming forum in which they were able to express theoretical and practical views, concepts, research results and principles to help support the further development of music education.

The second part, "Policies: Constructing the future through policymaking," discusses how 21st century education is translated into policies and the resulting tensions that emerge from top-down, state sanctioned policies and bottom-up initiatives. The third part, "Practices: Enacting the Future in Local Contexts," discusses on-the-ground initiatives that schools in various countries around the world enact to educate their students for the 21st century. This volume includes contributions from leading scholars in the field as well as educators from schools and those working with schools.

Song Interpretation in 21st-Century Pop Music-Ralf von Appen 2016-03-03 Existing books on the analysis of popular music focus on theory and methodology, and normally discuss parts of songs briefly as examples. The impression often given is that songs are being chosen simply to illuminate and exemplify a theoretical position. In this book the obverse is true: songs take centre stage and are given priority. The authors analyse and interpret them intensively from a variety of theoretical positions that illuminate the song. Thus, methods and theories have to prove their use value in the face of a heterogeneous, contemporary repertoire. The book brings together researchers from very different cultural backgrounds and encourages them to compare their different hearings and to discuss the ways in which they make sense of specific songs. All songs analysed are from the new millennium, most of them not older than three years. Because the most widely popular styles are too often ignored by academics, this book aims to shed light on how million sellers work musically. Therefore, it encompasses a broad palette, highlighting mainstream pop (Lady Gaga, Ke\$ha, Lucenzo, Amy McDonald), but also accounting for critically acclaimed 'indie' styles (Fleet Foxes, Death Cab for Cutie, PJ Harvey), R&B (Destiny's Child, Janelle Monae), popular hard rock (Kings of Leon, Rammstein), and current electronic music (Andrés, Björk). By concentrating on 13 well-known songs, this book offers some model analyses that can very easily be studied at home or used in seminars and classrooms for students of popular music at all academic levels.

Motherhood and Single-Lone Parenting: A 21st Century Perspective-Maki Matapanyane 2016-07-01 The 21st century sustains one significant commonality with the decades of the preceding century. The majority of individuals parenting on their own and heading one-parent families continue to be mothers. Even so, current trends in globalization (economic, political, cultural) along with technological advancement, shifts in political, economic and social policy, contemporary demographic shifts, changing trends in the labor sector linked to global economics, and developments in legislative and judicial output, all signify the distinctiveness of the current moment with regard to family patterns and social norms. Seeking to contribute to an existing body of literature focused on single motherhood and lone parenting in the 20th century, this collection explores and illuminates a more recent landscape of 21st century debates, policies and experiences surrounding single motherhood and one-parent headed families.

Promising Practices in 21st Century Music Teacher Education-Michele Kaschub 2014 This book surveys emerging music and education landscapes to present a sampling of the promising practices of music teacher education that may serve as new models for the 21st century. Contributors explore the delicate balance between curriculum and pedagogy, the power structures that influence music education at all levels, the role of contemporary musical practices in teacher education, and the communication challenges that surround institutional change. Models of programs that feature in-school, out-of-school and beyond school contexts, lifespan learning perspectives, active juxtapositions of formal and informal approaches to teaching and learning, student-driven project-based fieldwork, and the purposeful employment of technology and digital media as platforms for authentic music engagement within a contemporary participatory culture are all offered as springboards for innovative practice.

Eudaimonia-Gareth Dylan Smith 2020-04-23 Eudaimonia: Perspectives for Music Learning asserts the fertile applications of eudaimonia—an Aristotelian concept of human flourishing intended to explain the nature of a life well lived—for work in music learning and teaching in the 21st century. Drawing insights from within and beyond the field of music education, contributors reflect on what the "good life" means in music, highlighting issues at the core of the human experience and the heart of schooling and other educational settings. This pursuit of personal fulfillment through active engagement is considered in relation to music education as well as broader social, political, spiritual, psychological, and environmental contexts. Especially pertinent in today's complicated and contradictory world, Eudaimonia: Perspectives for Music Learning is a concise compendium on this oft-overlooked concept, providing musicians with an understanding of an ethically-guided and socially-meaningful music-learning paradigm.

Twenty-First Century Musicals-George Rodosthenous 2017-08-14 *Twenty-First Century Musicals* stakes a place for the musical in today's cinematic landscape, taking a look at leading contemporary shows from their stage origins to their big-screen adaptations. Each chapter offers a new perspective on a single musical, challenging populist narratives and exploring underlying narratives and sub-texts in depth. Themes of national identity; race, class and gender; the 'voice' and 'singing live' on film; authenticity; camp sensibilities; and the celebration of failure are addressed in a series of questions including: How does the film adaptation provide a different viewing experience from the stage version? What themes are highlighted in the film adaptation? What does the new casting bring to the work? Do camera angles dictate a different reading from the stage version? What is lost/gained in the process of adaptation to film? Re-interpreting the contemporary film musical as a compelling art form, *Twenty-First Century Musicals* is a must-read for any student or scholar keen to broaden their understanding of musical performance.

Annunciations: Sacred Music for the Twenty-First Century-George Corbett 2019-05-01 Our contemporary culture is communicating ever-increasingly through the visual, through film, and through music. This makes it ever more urgent for theologians to explore the resources of art for enriching our understanding and experience of the Judeo-Christian tradition. *Annunciations: Sacred Music for the twenty-First Century*, edited by George Corbett, answers this need, evaluating the relationship between the sacred and the composition, performance, and appreciation of music. Through the theme of 'annunciations', this volume interrogates how, when, why, through and to whom God communicates in the Old and New Testaments. In doing so, it tackles the intimate relationship between Scriptural reflection and musical practice in the past, its present condition, and what the future might hold. *Annunciations* comprises three parts. Part I sets out flexible theological and compositional frameworks for a constructive relationship between the sacred and music. Part II presents the reflections of theologians and composers involved in collaborating on new pieces of sacred choral music, alongside the six new scores and links to the recordings. Part III considers the reality of programming and performing sacred works today. This volume provides an indispensable resource for scholars and artists working at the interface between theology and the arts, and for those involved in sacred music. However, it will also be of interest to anyone concerned with the ways in which the Divine communicates through word and artistry to humanity.

Blues in the 21st Century: Myth, Self-Expression and Trans-Culturalism-Douglas Mark Ponton 2020-10-06 The book is the fruit of Douglas Mark Ponton's and co-editor Uwe Zagratzki's enduring interest in the Blues as a musical and cultural phenomenon and source of personal inspiration. Continuing in the tradition of Blues studies established by the likes of Samuel Charters and Paul Oliver, the authors hope to contribute to the revitalisation of the field through a multi-disciplinary approach designed to explore this constantly evolving social phenomenon in all its heterogeneity. Focusing either on particular artists (Lightnin' Hopkins, Robert Johnson), or specific texts (Langston Hughes' *Weary Blues* and *Backlash Blues*, Jimi Hendrix's *Machine Gun*), the book tackles issues ranging from authenticity and musicology in Blues performance to the Blues in diaspora, while also applying techniques of linguistic analysis to the corpora of Blues texts. While some chapters focus on the Blues as a quintessentially American phenomenon, linked to a specific social context, others see it in its current evolutions, as the bearer of vital cultural attitudes into the digital age. This multidisciplinary volume will appeal to a broad range of scholars operating in a number of different academic disciplines, including Musicology, Linguistics, Sociology, History, Ethnomusicology, Literature, Economics and Cultural Studies. It will also interest educators across the Humanities, and could be used to exemplify the application to data of specific analytical methodologies, and as a general introduction to the field of Blues studies.

Environmental Sound Artists-Frederick W. Bianchi 2016-07-11 *Environmental Sound Artists: In Their Own Words* is an incisive and imaginative look at the international environmental sound art movement, which emerged in the late 1960s. The term environmental sound art is generally applied to the work of sound artists who incorporate processes in which the artist actively engages with the environment. While the field of environmental sound art is diverse and includes a variety of approaches, the art form diverges from traditional contemporary music by the conscious and strategic integration of environmental impulses and natural processes. This book presents a current perspective on the environmental sound art movement through a collection of personal writings by important environmental sound artists. Dismayed by the limitations and gradual breakdown of contemporary compositional strategies, environmental sound artists have sought alternate venues, genres, technologies, and delivery methods for their creative expression. Environmental sound art is especially relevant because it addresses political, social, economic, scientific, and aesthetic issues. As a result, it has attracted the participation of artists internationally. Awareness and concern for the environment has connected and unified artists across the globe and has achieved a solidarity and clarity of purpose that is singularly unique and optimistic. The environmental sound art movement is borderless and thriving.

Devotional Music in the Iberian World, 1450-1800-Tess Knighton 2007-01-01 From the fifteenth century to the beginning of the nineteenth century, devotional music played a fundamental role in the Iberian world. The sixteen essays in this volume provide the first broad-based survey of this important genre.

New Life for Historically Black Colleges and Universities-Vann R. Newkirk 2014-01-10 In December 2008, Georgia state senator Seth Harp ignited controversy when he proposed merging two historically black colleges with nearby predominately white colleges to save money. Less than a year later, Mississippi governor Haley Barbour sought to unite Mississippi's three predominately black colleges. These efforts kindled renewed interest in historically black colleges and universities (HBCUs) across the nation and the globe. In this study, HBCU officials and faculty attempt to identify the challenges that HBCUs face, explore the historic origin of HBCU management systems, and identify models of success that will improve the long-term viability of the HBCU. By analyzing HBCUs within a larger framework of American higher education and the cultural context in which HBCUs operate, these essays introduce a new paradigm in the quest to ensure that HBCUs continue to play an important role in the education of Americans of all races.

Short Story Theories-Viorica Patea 2012-09 Short Story Theories: A Twenty-First-Century Perspective problematizes different aspects of the renewal and development of the short story. The aim of this collection is to explore the most recent theoretical issues raised by the short story as a genre and to offer theoretical and practical perspectives on the form. Centering as it does on specific authors and on the wider implications of short story poetics, this collection presents a new series of essays that both reinterpret canonical writers of the genre and advance new critical insights on the most recent trends and contemporary authors. Theorizations about genre reflect on different aspects of the short story from a multiplicity of perspectives and take the form of historical and aesthetic considerations, gender-centered accounts, and examinations that attend to reader-response theory, cognitive patterns, sociolinguistics, discourse analysis, postcolonial studies, postmodern techniques, and contemporary uses of minimalist forms. Looking ahead, this collection traces the evolution of the short story from Chaucer through the Romantic writings of Poe to the postmodern developments and into the twenty-first century. This volume will prove of interest to scholars and graduate students working in the fields of the short story and of literature in general. In addition, the readability and analytical transparency of these essays make them accessible to a more general readership interested in fiction.

The Routledge Companion to Popular Music Analysis-Ciro Scotto 2018-09-28 The Routledge Companion to Popular Music Analysis: Expanding Approaches widens the scope of analytical approaches for popular music by incorporating methods developed for analyzing contemporary art music. This study endeavors to create a new analytical paradigm for examining popular music from the perspective of developments in contemporary art music. "Expanded approaches" for popular music analysis is broadly defined as exploring the pitch-class structures, form, timbre, rhythm, or aesthetics of various forms of popular music in a conceptual space not limited to the domain of common practice tonality but broadened to include any applicable compositional, analytical, or theoretical concept that illuminates the music. From rock and pop to hip hop and rap, dance and electronica, from the 1930s to present day, this companion explores these connections in five parts: Establishing and Expanding Analytical Frameworks Technology and Timbre Rhythm, Pitch, and Harmony Form and Structure Critical Frameworks: Analytical, Formal, Structural, and Political With contributions by established scholars and promising emerging scholars in music theory and historical musicology from North America, Europe, and Australia, The Routledge Companion to Popular Music Analysis: Expanding Approaches offers nuanced and detailed perspectives that address the relationships between concert and popular music.

Perspectives on a 21st Century Comparative Musicology-Francesco Giannattasio 2017 "Perspectives on a 21st Century Comparative Musicology : Ethnomusicology or Transcultural Musicology? stems from the 'International Seminars in Ethnomusicology' that F. Giannattasio conceived within the activities of the Intercultural Institute for Comparative Music Studies of the Fondazione Giorgio Cini, devoted to a wide reflection on aims, methods and objects of study of ethnomusicology in the light of the profound changes occurring in this field at the beginning of the 21st Century. It concerns a radical rethinking - at a theoretical and epistemological level - of the history of the discipline, due to the contemporary profound transformation of the object of study. The volume has the ambition of offering new views on what a comparative musicology could do in its enquiry into contemporary music making processes. Scholars coming from different parts of the world, and from different fields of study such as W. Welsch, L.-Ch. Koch, T. Rice, S. Feld, J. Guilbault, J.-L. Amselle, contributed to the volume presenting theoretical approaches as an implicit or explicit reaction to the theoretical issues presented by Giannattasio. Together with them, some Italian scholars (G. Giuriati, C. Rizzoni, G. Vacca, R. Di Mauro, M. Agamennone, F. Gervasi) present their thoughts drawn from research in two contexts identified as case studies : the area of Naples and its surroundings, and the Salento."--Page 4 de la couverture.

Evolution-James Alan Shapiro 2011 James A. Shapiro proposes an important new paradigm for understanding biological evolution, the core organizing principle of biology. Shapiro introduces crucial new molecular evidence that tests the conventional scientific view of evolution based on the neo-Darwinian synthesis, shows why this view is inadequate to today's evidence, and presents a compelling alternative view of the evolutionary process that reflects the shift in life sciences towards a more information- and systems-based approach in *Evolution: A View from the 21st Century*. Shapiro integrates advances in symbiogenesis, epigenetics, and saltationism into a unified approach that views evolutionary change as an active cell process, regulated epigenetically and capable of making rapid large changes by horizontal DNA transfer, inter-specific hybridization, whole genome doubling, symbiogenesis, or massive genome restructuring. Evolution marshals extensive evidence in support of a fundamental reinterpretation of evolutionary processes, including more than 1,100 references to the scientific literature. Shapiro's work will generate extensive discussion throughout the biological community, and may significantly change your own thinking about how life has evolved. It also has major implications for evolutionary computation, information science, and the growing synthesis of the physical and biological sciences.

This book can be used for introductory and advanced research methods courses at the master's and doctoral levels.

Teaching and Evaluating Music Performance at University-John Encarnacao 2020-05-25 Fresh perspectives on teaching and evaluating music performance in higher education are offered in this book. One-to-one pedagogy and Western art music, once default positions of instrumental teaching, are giving way to a range of approaches that seek to engage with the challenges of the music industry and higher education sector funding models of the twenty-first century. Many of these approaches - formal, informal, semi-autonomous, notated, using improvisation or aleatory principles, incorporating new technology - are discussed here. Chapters also consider the evolution of the student, play as a medium for learning, reflective essay writing, multimodal performance, interactivity and assessment criteria. The contributors to this edited volume are lecturer-practitioners - choristers, instrumentalists, producers and technologists who ground their research in real-life situations. The perspectives extend to the challenges of professional development programs and in several chapters incorporate the experiences of students. Grounded in the latest music education research, the book surveys a contemporary landscape where all types of musical expression are valued; not just those of the conservatory model of decades past. This volume will provide ideas and spark debate for anyone teaching and evaluating music performance in higher education.

The 21st Century Singer-Susan Mohini Kane 2015-01-29 The vast majority of singers with a degree in performance are un- or under-employed in their field. Despite the fact that talented singers are discovered every day, there are far too few jobs in the field of classical music to accommodate all of them, a problem evidenced by regular reports of opera companies and symphony orchestras closing their doors. Young classical singers, particularly recent graduates of music programs, need not only artistic ability, but also intelligence and an acute business sense to navigate the world of professional singing. In *The 21st-Century Singer: Making the Leap from the University into the World*, author Susan Mohini Kane has created a user-friendly guide for these recent graduates. Kane combines the benefits of an instructional manual with those of a self-reflective workbook to provide emerging classical singers with both practical and inspirational advice. She begins with a section on self-evaluation, allowing readers to define what motivates their desire to sing professionally and reflect on their passions, before moving on to career advice. In the sections that follow, Kane presents a variety of career paths, such as singing, teaching, and consulting-realistic alternatives to the rise to stardom as an "overnight sensation" that so few will experience-and provides the reader with the tools to develop a concrete plan for whichever path they decide to pursue.
