A Phd Is Not Enough!-Peter J. Feibelman 2011-01-11 Everything you ever need to know about making it as a scientist. Despite your graduate education, brainpower, and technical prowess, your career in scientific research is far from assured. Permanent positions are scarce, science survival is rarely part of formal graduate training, and a good mentor is hard to find. In A Ph.D. Is Not Enough!, physicist Peter J. Feibelman lays out a rational path to a fulfilling long-term research career. He offers sound advice on selecting a thesis or postdoctoral adviser; choosing among research jobs in academia, government laboratories, and industry; preparing for an employment interview; and defining a research program. The guidance offered in A Ph.D. Is Not Enough! will help you make your oral presentations more effective, your journal articles more compelling, and your grant proposals more successful. A classic guide for recent and soon-to-be graduates, A Ph.D. Is Not Enough! remains required reading for anyone on the threshold of a career in science. This new edition includes two new chapters and is revised and updated throughout to reflect how the revolution in electronic communication has transformed the field.

The Professor Is In-Karen Kelsky 2015-08-04 The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor is In, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.

Next Gen PhD-Melanie V. Sinche 2016-08-22 An upper-level degree is a prized asset in the eyes of many employers, and nonfaculty careers once considered Plan B are now preferred by the majority of science degree holders. Melanie Sinche profiles science PhDs across a wide range of disciplines who share proven strategies for landing a rewarding occupation inside or outside the university.

You Must Be Very Intelligent-Karin Bodewits 2017-07-03 You Must Be Very Intelligent is the author's account of studying for a PhD in a modern, successful university. Part-memoir and part-exposé, this book is highly entertaining and unusually revealing about the dubious morality and desperate behaviour which underpins competition in twenty-first century academia. This witty, warts-and-all account of Bodewits' years as a PhD student in the august University of Edinburgh is full of success and failure, passion and pathos, insight, farce and warm-hearted disillusionment. She describes a world of collaboration and backstabbing; nefarious financing and wasted genius; cosmopolitan dreamers and discoveries that might just change the world... Is this a smart people's world or a drip can of weird species? Modern academia is certainly darker and stranger than one might suspect... This book will put a wry, knowing smile on the faces of former researchers. And it is a cautionary parable for innocents who still believe that lofty academia is erected upon moral high ground...

Building a Successful Career in Scientific Research-Phil Dee 2006-03-02 "Next Wave now part of: ScienceCareers.org."

Being Bright is Not Enough-Peggy Hawley 2003 The first edition of BEING BRIGHT IS NOT ENOUGH was well received, and so this new edition has not altered the ideas expressed there. What has been added are details and reactions in light of experiences of the intervening years. This particularly interesting book is written from a student advocacy perspective, intended to speak to non-traditional students as well as those typical of past generations. In making the unwritten rules of doctoral study more explicit, the author is insightful rather than scientific, personal rather than objective, and practical rather than theoretical.

Hundreds of doctoral students (and many professors) provided the inspiration for a guide to pave the way for those recipients who will pursue and capture academe's highest award, the terminal degree in a particular field of study.

Mastering Your PhD-Patricia Gosling 2010-11-19 "Mastering Your PhD: Survival and Success in the Doctoral Years and Beyond" helps guide PhD students through their graduate student years. Filled with practical advice on getting started, communicating with your supervisor, staying the course, and planning for the future, this book is a handy guide for graduate students who need that extra bit of help getting started and making it through. While mainly directed at PhD students in the sciences, the book's scope is broad enough to encompass the obstacles and hurdles that almost all PhD students face during their doctoral training. Who should read this book? Students of the physical and life sciences, computer science, math, and medicine who are thinking about entering a PhD program; doctoral students at the beginning of their research; and any graduate student who is feeling frustrated and stuck. It's never too early -- or too late! This second edition contains a variety of new material, including additional chapters on how to communicate better with your supervisor, dealing with difficult people, how to find a mentor, and new chapters on your next career step, once you have your coveted doctoral degree in hand.

The Unwritten Rules of PhD Research-Marian Petre 2010-01-01 This title, from Gordon Rugg and Marian Petre, discusses the unwritten rules of the academic world, the things people forget to tell you about doing a doctorate.

"So What Are You Going to Do with That?"-Susan Basalla 2008-09-15 Graduate schools churn out tens of thousands of Ph.D.'s and M.A.'s every year. Half of all college courses are taught by adjunct faculty. The chances of an academic landing a tenure-track job seem only to shrink as student loan and credit card debts grow. What's a frustrated would-be scholar to do? Can he really leave academia? Can a non-academic job really be rewarding—and will anyone want to hire a grad-school refugee? With "So What Are You Going to Do with That?" Susan Basalla and Maggie Debelius—Ph.D.'s themselves—answer all those questions with a resounding "Yes!" A witty, accessible guide full of concrete advice for anyone contemplating the jump from scholarship to the outside world, "So What Are You Going to Do with That?" covers topics ranging from career counseling to interview etiquette to translating skills learned in the academy into terms an employer can understand and appreciate. Packed with examples and stories from real people who have successfully made this daunting—but potentially rewarding— transition, and written with a deep understanding of both the joys and difficulties of the academic life, this fully revised and up-to-date edition will be indispensable for any graduate student or professor who has ever glanced at her CV, flipped through the want ads, and wondered, "What if?" "I will absolutely be recommending this book to our graduate students exploring their career options—I'd love to see it on the coffee tables in department lounges!"—Robin B. Wagner, former associate director for graduate career services, University of Chicago

Inside Graduate Admissions-Julie R. Posselt 2016-01-11 Advanced degrees are necessary for careers that once required only a college education. Yet little has been written about who gets into grad school and why. Julie Posselt pulls back the curtain on this secret process, revealing how faculty evaluate applicants in top-ranked doctoral programs in the humanities, social sciences, and natural sciences.

Survival of the Beautiful-David Rothenberg 2013-01-01 "The peacock's tail makes me sick!" said Charles Darwin. That's because the theory of evolution as adaptation can't explain why nature is so beautiful. It took the concept of sexual selection for Darwin to explain that, a process that has more to do with aesthetic taste than adaptive fitness. Survival of the Beautiful is a revolutionary new examination of the interplay of beauty, art, and culture in evolution. Taking inspiration from Darwin's observation that animals have a natural aesthetic sense, philosopher and musician David Rothenberg probes why animals, humans included, have an innate appreciation for beauty - and why nature is, indeed, beautiful.

How to Write a Lot-Paul J. Silvia 2018-09 "All academics need to write, and many struggle to finish their dissertations, articles, books, or grant proposals. Writing is hard work and can be difficult to wedge into a frenetic academic schedule. This revised and updated edition of Paul Silvia's popular guide provides practical, lighthearted advice to help academics overcome common barriers and become productive writers. Silvia's expert tips have been updated to apply to a wide variety of disciplines, and this edition has a new chapter devoted to grant and fellowship writing"--

Authoring a PhD-Patrick Dunleavy 2003-04-28 Authoring a PhD is a complex process. It involves having creative ideas, working out how to organize them, writing up from plans, upgrading the text, and finishing it speedily and to a good standard. It also includes being examined and getting published. Patrick Dunleavy has written Authoring a PhD based on his supervision experience with over 30 students. It provides solid advice to help your PhD students cope with both the intellectual issues and practical difficulties of organizing their work effectively. It is an indispensable and time saving aid for doctoral students in the humanities, social sciences, education, business studies, law, health, arts and visual arts, and related disciplines, and will also be a great help to supervisors.

State of Readiness-Joseph F. Paris Jr. 2017-05-16 Accelerated Strategy Development and Execution The company of today has its supply chains and finances stretched further around the globe than ever before while simultaneously having increasing pressures to drive value across a complicated and fluid set of metrics and deliver innovations, products, and services more quickly and reliably. The competitive advantage belongs to the companies that can quicken their vision-building and strategy-execution efforts—the ones that can identify challenges more swiftly and accelerate their decision making so they are better able to formulate and deploy responses decisively yet with greater agility. To successfully accomplish this, companies will have to prioritize creating a culture of leadership that strengthens communication skills and emphasizes systems thinking by building capacity and capability that cuts across the business smokestacks and permeates the entire organization. In State of Readiness, Joseph F. Paris Jr. shares over thirty years of international business and operations experience and guides C-suite executives and business-operations and -improvement specialists on a path toward operational excellence, the organizational capability and situational awareness that is attained as the enterprise reaches a state of alignment for pursuing its strategies. In doing so, create a corporate culture that is committed to the continuous and deliberate improvement of company performance and the circumstances of those who work there—a precursor to becoming a high-performance organization.

Navigating the Path to Industry-M. R. Nelson 2014-10-08 Finding a job is hard. Running a non-academic job search when all of your previous experience is in academia is even harder. This book won't make it easy (unfortunately, nothing can do that), but it will help you learn to run a successful job search and avoid common pitfalls. It provides a hiring manager's advice on networking, conducting informational interviews, converting your curriculum vitae into a resume, writing a cover letter, interviewing, and maintaining your self-confidence throughout the job search process. This concise collection of job searching advice provides a framework for finding the way out of academia and into a new job for academics at all levels who have realized that they want a different sort of career.

You Look Like a Thing and I Love You-Janelle Shane 2019-11-05 AS HEARD ON NPR'S "SCIENCE FRIDAY" Discover the book that Malcolm Gladwell, Susan Cain, Daniel Pink, and Adam Grant want you to read this year, an "accessible, informative, and hilarious" introduction to the weird and wonderful world of artificial intelligence (Ryan North). "You look like a thing and I love you" is one of the best pickup lines ever... according to an artificial intelligence trained by scientist Janelle Shane, creator of the popular blog AI Weirdness. She creates silly AIs that learn how to name paint colors, create the best recipes, and even flirt (badly) with humans--all to understand the technology that governs so much of our daily lives. We rely on AI every day for recommendations, for translations, and to put cat ears on our selfie videos. We also trust AI with matters of life and death, on the road and in our hospitals. But how smart is AI really... and how does it solve problems, understand humans, and even drive self-driving cars? Shane delivers the answers to every AI question you've ever asked, and some you definitely haven't. Like, how can a computer design the perfect sandwich? What does robot-generated Harry Potter fan-fiction look like? And is the world's best Halloween costume really "Vampire Hog Bride"? In this smart, often hilarious introduction to the most interesting science of our time, Shane shows how these programs learn, fail, and adapt--and how they reflect the best and worst of humanity. You Look Like a Thing and I Love You is the perfect book for anyone curious about what the robots in our lives are thinking. "I can't think of a better way to learn about artificial intelligence, and I've never had so much fun along the way." - Adam Grant, New York Times bestselling author of Originals

The Smart Way to Your Ph.D.-Dora Farkas 2009 Thousands of doctoral students across the U.S. struggle for years with challenging thesis topics, difficult advisors, and financial troubles. With so much pressure and often not much support, it is no surprise that many graduate students contemplate giving up. Fortunately, students can now find answers to their dilemmas in The Smart Way to Your Ph.D.: 200 Secrets from 100 Graduates, by Dora Farkas, a Ph.D. from the Massachusetts Institute of Technology. After two years of research and 100 interviews with Ph.D.s from nearly 50 universities and over 30 disciplines, Dr. Farkas compiled an extensive resource guide with down-to-earth advice from successful Ph.D.s to help students plan and execute a research proposal, work efficiently with advisors and coworkers, write and defend their theses, and optimize their job searches. The Smart Way to your Ph.D. shows students how to get their graduate studies on track, finish their theses, and land their dream jobs.

Getting Your PhD-Harriet Churchill 2007-08-08 `Getting your PhD will no doubt establish itself as a firm favourite' - ESCalate `Packed with practical advice on all aspects of the PhD process, new and continuing research students should find this book of great help' - Professor Malcolm Tight, Lancaster University, UK How to get your Ph.D is an original study guide aimed at prospective and current postgraduate students, covering the process of accessing, undertaking and completing doctoral research in the social sciences and the humanities. The content is unique in incorporating discussion of the less recognised personal, emotional and organisational demands of independent study. Drawing on a variety of student experiences, the authors apply a case study approach to examine the dilemmas and complexities of postgraduate study. The book is organised into four parts covering the research process; writing, publishing and networking; shifting identities and institutions and relationships of support. Each chapter includes an easy to use format including real-life accounts, tips and strategies for problem solving and guidance for additional resources. The guide includes accessible advice and guidance across a spectrum of methodological, personal, emotional, practical and institutional issues.

Get a PhD in YOU-Julie Reisler 2017-01-17

A Concise Course in Algebraic Topology-J. P. May 1999-09 Algebraic topology is a basic part of modern mathematics, and some knowledge of this area is indispensable for any advanced work relating to geometry, including topology itself, differential geometry, algebraic geometry, and Lie groups. This book provides a detailed treatment of algebraic topology both for teachers of the subject and for advanced graduate students in mathematics either specializing in this area or continuing on to other fields. J. Peter May's approach reflects the enormous internal developments within algebraic topology over the past several decades, most of which are largely unknown to mathematicians in other fields. But he also retains the classical presentations of various topics where appropriate. Most chapters end with problems that further explore and refine the concepts presented. The final four chapters provide sketches of substantial areas of algebraic topology that are normally omitted from introductory texts, and the book concludes with a list of suggested readings for those interested in delving further into the field.

From Dissertation to Book-William Germano 2008-04-15 All new Phd's hope that their dissertations can become books. But a dissertation is written for a committee and a book for the larger world. William Germano's From Dissertation to Book is the essential guide for academic writers who want to revise a doctoral thesis for publication. The author of Getting It Published, Germano draws upon his extensive experience in academic publishing to provide writers with a state-of-the-art view of how to turn a dissertation into a manuscript that publishers will notice. Acknowledging first that not all theses can become books, Germano shows how some dissertations might have a better life as one or more journal articles or as chapters in a newly conceived book. But even dissertations strong enough to be published as books first need to become book manuscripts, and at the heart of From Dissertation to Book is the idea that revising the dissertation is a fundamental process of adapting from one genre of writing to another. Germano offers clear guidance on how to do just this. Writers will find advice on such topics as rethinking the table of contents, taming runaway footnotes, shaping chapter length, and confronting the limitations of jargon, alongside helpful timetables for light or heavy revision. With crisp directives, engaging examples, and a sympathetic eye for the foibles of academic writing, From Dissertation to Book reveals to recent PhD's the process of careful and thoughtful revision—a truly invaluable skill as they grow into their new roles as professional writers.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation-Christopher B. Field 2012-05-28 This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

Doctoral Writing-Susan Carter 2020-01-01 This book on doctoral writing offers a refreshingly new approach to help Ph.D. students and their supervisors overcome the host of writing challenges that can make—or break—the dissertation process. The book's unique contribution to the field of doctoral writing is its style of reflection on ongoing, lived practice; this is more readable than a simple how-to book, making it a welcome resource to support doctoral writing. The experiences and practices of research writing are explored through bite-sized vignettes, stories, and actionable 'teachable' accounts. Doctoral Writing: Practices, Processes and Pleasures has its origins in a highly successful academic blog with an international following. Inspired by the popularity of the blog (which had more than 14,800 followers as of October 2019) and a desire to make our six years' worth of posts more accessible, this book has been authored, reworked, and curated by the three editors of the blog and reconceived as a conveniently structured book.

Essentials of Accident and Emergency Medicine-Ahmad Subhy Alsheikhly 2019-01-10 As physicians, we have a constant passion for improving and maintaining patient's care and safety. The book is divided into three parts focusing on the essentials of general concepts, diagnosis, and management of accident and emergency medicine, as well as an academic approach to teaching in the emergency setting. The chapters selected for this book are written by an excellent group of recognized emergency surgeons and physicians from different countries and cultures facilitating a comprehensive and interesting approach to the problems of emergency treatment. We hope this book will be helpful and used worldwide by medical students, clinicians, and researchers enhancing their knowledge and advancing their objectives by a book that intends to become a reference text for research and practice within accident and emergency medicine.
