The Shakespeare First Folio: A new worldwide census of first folios-Anthony James West 2001 This major reference book for Shakespeare scholars and bibliographers is in the second part of the story of "the greatest book" in the English language. Listing 228 copies of the First Folio, the Census gives concise descriptions of each, covering condition, special features, provenance, and binding. It traces the search for copies, deals with doubtful identifications, describes the tests for inclusion, and presents details of missing copies.

Guide to Information Sources in Mathematics and Statistics-Martha A. Tucker 2004 Publisher description: This book is a reference for librarians, mathematicians, and statisticians involved in college and research level mathematics and statistics in the 21st century. Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics. Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics. These resources are grouped by material type. Publication dates range from the 1800's onwards. Hundreds of electronic resources-some online, both dynamic and static, some in fixed media, are listed among the paper resources. A majority of listed electronic resources are free.

Commenting and Commentaries-Charles H. Spurgeon 2019-03-21 The student or pastor with a small but growing library, as well as the pastor possessing an extensive one, will welcome the opportunity to secure this reprint of Spurgeon's catalog of Biblical commentaries and expositions. Once you begin to dip into this volume it will become a faithful friend by your side. Worth its weight in gold! ""New commentaries on the Bible abound, but often the cutting edge is dull. With few exceptions, the old works are better by far. Spurgeon's Commenting and Commentaries is invaluable for identifying the best works of past generations, many of which have been reprinted in our day."" - Dr. Robert P. Martin Charles Haddon Spurgeon (1834-92) was an English Baptist preacher and author. Among his many publications are The Heart of the Gospel, Immeasurable Love, and The Saint and His Saviour.

IIHF 2012 Guide and Record Book-lihf (Int'l Ice Hockey Federation) 2011 This colossal Guide includes information on every top level event, every IIHF member nation, and, indeed, every player to appear in even a single game since international hockey first took hold in 1920. In all, more than 12,000 players are included, as well as every coach, every referee, every linesman and every stat imaginable. The 2012 IIHF Guide and Record Book is the official and only complete source of information for international hockey. It covers all top-level events from the Olympics to World Championships to junior events, from men's hockey to women's hockey, from 1920 to the past and present seasons. At 640 pages, it contains the scores and standings for every international game and event ever contested, the statistics for every player, coach, and on-ice official in IIHF competition history, and the results and histories of every nation that has ever participated in an IIHF event. Full of information on every aspect of the international game, this is the one and only source fans will need if they are interested in the World Junior Championship, Team Canada, or any other aspect of the international game. With a special section on the World Junior Championships taking place in Alberta this Christmas, this is the most important book hockey fans will need this season.

Folio 50-Paul W. Nash 1997 The Folio Society was Founded in 1947 'to Produce editions of the world's great literature, in a format worthy of the contents, at a price within the reach of everyman'. Half a century, and over a thousand books later, the name Folio has become synonymous with affordable fine editions -- books chosen for their enduring worth, handsomely designed, illustrated and bound, which reflect not just the traditional skills of the book-maker's art but also the tremendous possibilities opened up by new technology. "Folio 50", compiled by the distinguished bibliographer Paul W. Nash, is the first fully descriptive record of the Society's publications over its fifty years to date. It is sumptuously illustrated and contains a history of the Society, essays on Folio's design and production, and the personal reminiscences of writers, artists and Society members. This is a commemorative volume of outstanding usefulness.

Strategic Asset Allocation-John Y. Campbell 2002-01-03 Academic finance has had a remarkable impact on many financial services. Yet long-term investors have received curiously little guidance from academic financial economists. Mean-variance analysis, developed almost fifty years ago, has provided a basic paradigm for portfolio choice. This approach usefully emphasizes the ability of diversification to reduce risk, but it ignores several critically important factors. Most notably, the analysis is static; it assumes that investors care only about risks to wealth one period ahead. However, many investors—both individuals and institutions such as charitable foundations or universities—seek to finance a stream of consumption over a long lifetime. In addition, mean-variance analysis treats financial wealth in isolation from income. Long-term investors typically receive a stream of income and use it, along with financial wealth, to support their consumption. At the theoretical level, it is well understood that the solution to a long-term portfolio choice problem can be very different from the solution to a short-term problem. Long-term investors care about intertemporal shocks to investment opportunities and labor income as well as shocks to wealth itself, and they may use financial assets to hedge their intertemporal risks. This should be important in practice because there is a great deal of empirical evidence that investment opportunities—both interest rates and risk premia on bonds and stocks—vary through time. Yet this insight has had little influence on investment practice because it is hard to solve for optimal portfolios in intertemporal models. This book seeks to develop the intertemporal approach into an empirical paradigm that can compete with the standard mean-variance analysis. The book shows that long-term inflation-indexed bonds are the riskless asset for long-term investors, it explains the conditions under which stocks are safer assets for long-term than for short-term investors, and it shows how labor income influences portfolio choice. These results shed new light on the rules of thumb used by financial planners. The book explains recent advances in both analytical and numerical methods, and shows how they can be used to understand the portfolio choice problems of long-term investors.

Cataloguing Without Tears-Jane Read 2003-11-30 This book is an introduction, 'handy' and authoritative guide to the principles of cataloguing for librarians, information scientists and information managers. It is intended to be used in conjunction with an internationally recognised standard to show how, firstly, cataloguing underpins all the other activities of an information service and, secondly, how to apply best practice in a variety of different situations. Relates theory to practice, which is not the case with many other books on the topic Includes guidance on subject cataloguing as well as descriptive cataloguing Written in an easy-to-read style Covers the use of ISBD and Dublin Core in descriptive cataloguing, rather than being tied exclusively to using AACR
