Business Accounting and Finance for Non-specialists-Catherine Gowthorpe 2005 Business Accounting and Finance for Non Specialists is aimed at non-specialist students of accounting and finance on a first course in the subject. It gives a lively and wide-ranging survey of the basic principles of finance, financial accounting and management accounting. The unique approach taken in the first Section of the book is to look at small to medium sized business organisations and their role in the economy ? how they are set up, factors in their success and failure and how they source funds for expansion. This leads to discussion of the role of financial markets and their need for financial information. Sections 2 and 3 then give an account of financial and management accounting principles, respectively. The text is clearly written and technical jargon is minimal - any technical terms are clearly explained and a glossary of terms is provided. The book does not present the hurdle of double-entry bookkeeping at an early stage ? students can progress through the book without double-entry. Illustrative case studies and reference to real-life business examples are used to bring the technical information to life. Business Accounting and Finance for Non-specialists includes a large number of worked examples, to give students valuable practice in using their new skills.

Other pedagogic elements include aims and learning outcomes, summaries, Case Studies with questions and solutions, individual learning activities, self-test questions with answers provided in the book, and exercises - the answers to which are divided between the book and the Lecturer?s Guide/Website. Business Accounting and Finance for Non Specialists is aimed at non-specialist students of accounting and finance on a first course in the subject. The open-learning approach also makes it suitable for those studying independently or on distance learning courses The Authors Peter Atrill is the head of the Department of Accounting and Law at the University of Plymouth Business School. Eddie Mclaney is a Visitin

Analysing Financial Statements for Non-Specialists-Jim O'Hare 2016-10-26 All business organizations produce financial statements, and the information communicated (or hidden) in these is relevant to a wide range of users. After a number of recent financial scandals from banks to supermarkets, the need to fully understand financial statements has never been so imperative, and the topic itself so pertinent. With updated examples to reflect the current business environment, including new material on the ethical considerations, and a wider array of business examples, from retail to services and banks, O'Hare continues to demist financial statements for non-specialists. In this new and refreshed edition, he once again covers the topic in an accessible way and assumes no prior training or study in accounting. Offering a range of extra resources, including end of chapter questions, topics for further discussion and brimming with real-world examples, this concise new edition provides a comprehensive resource that will be welcomed by lecturers and instructors charged with delivering classes on financial statements.

Business Accounting and Finance-Catherine Gowthorpe 2003 This new introductory text is aimed at non-specialist students of accounting and finance on a first course in the subject. It presents students with a wide-ranging survey of the basic principles of finance, financial accounting and management accounting. The unique approach taken in the first Section of the book is to look at small to medium sized business organisations and their role in the economy Ā- how they are set up, factors in their success and failure and how they source funds for expansion. This leads to some discussion of the role of financial markets and their need for financial information. Sections 2 and 3 then give an account of financial and management accounting principles, respectively. The text is clearly written and technical jargon is minimal - any technical terms are clearly explained and a glossary of terms is provided. Illustrative case studies are used to bring the technical information to life. Business Accounting and Finance includes within the text as many examples as possible, to give students valuable practice in using their new skills. Other pedagogic elements include objective test questions, questions based around case studies, suggested group learning activities for use in class, individual learning activities, discussion questions and more-complex questions to test more able/interested students.

Financial Management for Non-specialists-Peter Atrill 1997 The growth in the provision of education through open-learning, coupled with increased pressures on teaching resources, has led to a greater emphasis on student-centred learning. Concurrently, the spread of modularisation is giving students a broader choice of subjects to study beyond their major discipline, including elements of accounting and finance. Conceived in response to this shift in approach and the growth of non-specialist classes, this text provides a broad-based introduction to the main concepts of financial management and their practical application in decision-making. Effective teaching and learning are facilitated through a variety of distinctive features; these are designed to encourage interaction and allow for flexible study and assessment. The clarity of explanations, minimisation of mathematical formulae, and the frequent use of worked examples and practical illustrations further distinguish the text for undergraduate students on non-finance/accounting degree or diploma courses taking an introductory module, and for postgraduate/experience courses such as the ACCA Certified Diploma.

Management Accounting for Non-Specialists-Peter Atrill 2003-09-04

This title includes: chapter on working capital management; extends the coverage of corporate governance, auditing and Activity Based Costing; and, more.

Islamic Finance in a Nutshell-Brian Kettell 2011-10-20 The recent turbulence in the global financial markets has drawn attention to an alternative system of financial intermediation: Islamic banking and finance, which has so far remained on the sidelines of the unrest. Islamic Finance in a Nutshell is a quick and easy guide to understanding the fundamentals of Islamic Finance and how the Islamic Financial markets work. Designed as a quick read for practitioners needing to pick up the basics of the industry, it will enable readers to understand the differences Islamic and Western finance. Starting with the rise of Islamic finance, the book highlights the key areas which practitioners need to grasp to understand the marketplace including financial statement analysis, Sharia'a law, making money in the absence of interest and regulation. The book also provides readers with a basic guide to Arab terminology and a guide to the top financial institutions within the Islamic markets. This is an ideal guide for anyone with an interest in how these financial markets work, but who do not want to be bogged down in complex and unnecessary terminology.

Accounting and Financial Management (Custom Editon EBook)-Peter Atrill 2017 This custom edition ebook is published for the University of Wollongong. Accounting for Business-Peter Scott 2016-01-16 This textbook is a refreshingly clear introduction to the core accounting topics that non-specialist students need to master. Designed to help students learn key principles, reinforce understanding, and apply accounting concepts to real business decisions, it is an ideal first stepping stone into the world of accounting. Peter Scott's Accounting for Business:- Offers full coverage of key accounting concepts in an authoritative mannerwhilst remaining sensitive to the needs of non-specialist students in employing an excellent writing style and clarity of explanation;- Firmly sets accounting principles in context through a varietyof newspaper articles and online media to help students understand the relevance of accounting to a variety of business professions;- Uses running examples across Financial and Management Accounting so students can strengthen their understanding of the material covered as the author regularly reviews and recaps information;- Is a complete solution to teaching accounting, offering a brand new online learning and assessment tool, Dashboard. The Dashboard courseoffers a test bank of over 500 ready-to-use questions, tailored specifically to this text, which can be automatically graded to cut down time spent marking.- Dashboard also offers students numerousopportunities to revisit, reinforce and revise their understanding, through the provision of an online workbook fully integrated with the chapter material.

Accounting in a Nutshell-Janet Walker 2011-04-08 Designed primarily for middle and junior management who deal with financial information without really understanding the content; students who are studying accounting as a non-specialist subject, for example on a business studies or engineering course. The book serves as a basic reference to be used throughout the course. It will also be particularly helpful in providing the basic grounding that is required before moving on to the more technical and in-depth study of the subject that may be required on some courses. Students who are embarking on a course of study to become a professional accountant will also find this book of major benefit. In addition to revisions through out, a new new chapter 'Making long-term investment decisions' covering capital investment decisions, extends and rounds out the final part of the book: using Financial Information to Manage a Business. The chapter deals with the investment appraisal process and covers the main investment appraisal techniques from the point of view of a non-specialist: payback periods, accounting rate of return and discounted cash flow methods are just some of the new topics covered. The focus will be on the level of understanding that a non-specialist requires in the work place as such, in keeping with the rest of the book, the chapter includes practical examples and exercises to enhance the reader's understanding. * Jargon free and easy to understand - no prior knowledge of the subject necessary * Focuses on the principles and use of accounting information * Review questions to assess progress at each stage and many fully worked exercises and examples Financial Modelling with Jump Processes-Peter Tankov 2003-12-30 WINNER of a Riskbook.com Best of 2004 Book Award! During the last decade, financial models based on jump processes have acquired increasing popularity in risk management and option pricing. Much has been published on the subject, but the technical nature of most papers makes them difficult for nonspecialists to understand, and the mathematic

Analysing Financial Statements for Non-Specialists-Jim O'Hare 2013-07-18 This textbook introduces the topic of financial statements, without assuming prior training and study in accounting - because of this and with the aid of an array of pedagogical features, it is perfect for students and managers who need to build their understanding of financial statements without taking an entire degree in accounting.

More Than a Numbers Game-Thomas A. King 2011-02-17 The world certainly suffers no shortage of accounting texts. The many out there help readers prepare, audit, interpret and explain corporate financial statements. What has been missing is a book offering context and discussion for divisive issues such as taxes, debt, options, and earnings volatility. King addresses the why of accounting instead of the how, providing practitioners and students with a highly readable history of U.S. corporate accounting. More Than a Numbers Game: A Brief History of Accounting was inspired by Arthur Levitt's landmark 1998 speech delivered at New York University. The Securities and Exchange Commission chairman described the too-little challenged custom of earnings management and presaged the breakdown in the US corporate accounting three years later. Somehow, over a one-hundred year period, accounting morphed from a tool used by American railroad managers to communicate with absent British investors into an enabler of corporate fraud. How this happened makes for a good business story. This book is not another description of accounting scandals. Instead it offers a history of ideas. Each chapter covers a controversial topic that emerged over the past century. Historical background and discussion of people involved give relevance to concepts discussed. The author shows how economics, finance, law and business customs contributed to accounting's development. Ideas presented come from a career spent working with accounting information.

When somebody should go to the books stores, search inauguration by shop, shelf by shelf, it is truly problematic. This is why we provide the book compilations in this website. It will enormously ease you to see guide **accounting and finance for nonspecialists 7th edition** as you such as.
