The Merchant Navy Seaman Pocket Manual 1939-1945-Chris McNab 2018-12-19 A view into the world of the intrepid but often forgotten seamen who helped the Allies win WWII. They may not have worn gold braid or medals, but the Allied Merchant Navies in World War II provided a vital service to their countries' war efforts. Hundreds of thousands of British and American sailors—some as young as fourteen—faced considerable risks to maintain an essential flow of armaments, equipment, and food: submarines, mines, armed raiders and destroyers, aircraft, kamikaze pilots, and the weather itself. Life on board a merchant ship could be tense, with hour after hour spent battling high seas, never knowing if a torpedo was about to hit. In the Arctic convoys, sailors had to cope with extreme cold and ice. But there was also comradeship and more open society than was the norm at the time, free of distinctions of class, race, religion, age, or color, and a mixture of nationalities, especially in the British fleet. The Merchant Navy Seaman Pocket Manual provides a fascinating glimpse into the world of these brave sailors, many of whom did not return. Drawing on documents, diagrams, and illustrations from British and American archives, it combines information on training, gunnery, convoys, and antisubmarine techniques with dramatic personal accounts.

Covering the Battle of the Atlantic, the Arctic Convoys, and the Pacific, this book pitches the reader into the heart of this vital but often forgotten arena of WWII.

Electronic Navigation Systems-Laurie Tetley 2007-06-07 Maritime navigation has rapidly developed since the publication of the last edition of the title with methods of global position fixing for shipping becoming standardized. As in the previous two editions, this edition will provide a sound basis for the understanding of modern navigation systems and brings the student or professional up-to-date with the latest developments in technology and the growing standardization of maritime navigation techniques. Developed with close scrutiny from the US Merchant Marine Academy and the major maritime navigation centres in the UK, out-dated techniques have been replaced by an expanded section on the now standard Navstar GPS systems and the Integrated Nav. In addition, a new chapter on the application of electronic charts will also be included, as well as problems at the end of each chapter with worked solutions.
