social workers share their practice wisdom, knowledge, and skills on a broad range of issues. Their words of wisdom will give you the willingness to follow problems through and the flexibility and creativity that are required when dealing with issues concerning HIV/AIDS. At the same time, you will achieve a sense of empowerment and optimism as you realize that there are things you can do--very specific kinds of help you can offer--that can make an enormous difference in the lives of people with HIV/AIDS and those who love and care for them. HIV and Social Work is a practical, user-friendly resource for social workers who practice in a variety of settings and fields. You'll find it a rich and useful book if you're moving into HIV/AIDS work and want guidance, or if you're experienced and want to sharpen your skills, or if you just want to be prepared for when you find people with HIV or their family members in your office in need of help. Specifically, you'll gain valuable insight about: basic psychosocial interventions for people with HIV/AIDS in-depth practical suggestions for specific problem areas and specific groups of people with HIV/AIDS better listening skills how to know your own limitations and live your own life more fully in the face of sadness the importance and challenge of returning to fundamental social work skills You'll refer to HIV and Social Work time and time again as you confront new HIV-related situations in your practice for which you need easy-to-understand descriptions of what to do and how to do it. Acknowledging your busy schedule, the book is organized so that you may use it on a "knowledge as needed" basis or read it straight through. Written specifically by and for social workers, HIV and Social Work is highly recommended as required reading in social work programs at the Bachelor's and/or Master's levels. Introductory Medical-Surgical Nursing-Barbara K. Timby 2009-10-01 The perfect companion to Introductory Medical-Surgical Nursing, 10th Edition, this handy workbook helps students review and apply essential content from the textbook. With this resource, students will prepare for the challenges of today's exams and tomorrow's practice-from the hospital or clinic to the home or long-term care facility! Legal Responses to HIV and AIDS-James P Chalmers 2008-10-31 Since the 1980s legislators and courts have responded in a variety of ways to the onset of the AIDS pandemic. Some responses have been

sensitive to the needs of those with HIV, seeking to guarantee heightened levels of confidentiality or freedom from discrimination. Others have sought to use the law as a tool to limit the spread of HIV, for example by imposing liability for its transmission or restricting the freedoms of those who are HIV-positive. Elsewhere, doctors and researchers have grappled with the legal and ethical problems surrounding testing for a condition which many people may not want to be aware of, and with the conflicts which can arise between respect for individual autonomy and the promotion of public health. More recently, treatments for HIV have developed to the extent that for many HIV is a chronic disease rather than an inevitably fatal condition. Such treatments, however, pose new challenges: they are expensive and as such are not widely available in those parts of the globe where HIV infection is most widespread. This has caused tensions over issues such as asylum, immigration and deportation, and the protection of intellectual property rights which may bar such treatments from being available where the need is most acute. This book examines and evaluate these issues in comparative perspective. It draws on legal responses to other sexually transmitted infections (and contagious diseases) but concentrates on HIV and AIDS.

Voluntary Counselling and Testing (VCT) for HIV in Malawi-P. Stanley Yoder 2004

Advising Gay and Lesbian Clients-Anne Barlow 1999 This textbook is aimed at practitioners who need guidance in advising gay and lesbian clients. It covers all the issues on which a client may need advice, including discrimination and employment issues, arranging financial affairs and making wills, the family home, custody disputes, adopting children or otherwise creating them, access to social services such as housing and welfare benefits and the criminal law as it affects gay men. This book takes a practical, non-political, advice-centred approach. Written by a team of solicitors and barristers, it also includes valuable precedents including a framework cohabitation agreement and declaration of trust for freehold property.

Advising the elderly or disabled client- 1999

The Solicitors' Journal- 2000

AIDS Update- 1987

Applied Ethics and HIV/AIDS in Africa-Cletus N. Chukwu 2003

Discourses of Counselling-David Silverman 1997 In this book, David Silverman offers a fully researched and analytically sensitive account of how counselling, as a process, is dynamically constructed through the interaction of counsellor and client. Drawing on research on counselling of clients undergoing an HIV test, the author explores the ways in which conversations between counsellors and clients reflect, embody and subtly alter assumptions about the purpose, method and practice of counselling. This critical appreciation of the modes of engagement between counsellor and client will be of interest to researchers and students of counselling, psychotherapy and associated helping professions. Practitioners - particularly those involved in HIV and other health counselling

Tools for Evaluating HIV Voluntary Counselling and Testing-Rachel Baggaley 2000 This document provides guidance on monitoring and evaluating the various aspects of voluntary counseling and testing

(VCT) programs for HIV/AIDS. It provides tools for the evaluation of VCT as part of a national program, as well as VCT services at specific institutions, independent sites and services for special groups, including community-based non-governmental organizations. It includes monitoring and evaluation of VCT services associated with the prevention of mother-to-child transmission of HIV and tuberculosis preventive therapy. This document revises and adapts previous draft guidelines and incorporates relevant operational research findings.--Publisher's description.

20 Years of HIV in Bangladesh-Tasnim Azim 2009 This report synthesizes data from surveillance, behavioral surveys and published and unpublished research to better understand emerging patterns and trends in the HIV epidemic in Bangladesh. Taking stock of 20 years of experience with HIV in Bangladesh, this report summarizes what is known about the coverage and impact of HIV prevention services, including knowledge on risk and protective behaviors. The report is divided into nine chapters. Chapter one provides a brief introduction and an overview of the methodology used for this exercise. Chapter two discusses the risks and vulnerabilities of the high risk groups including female sex workers, injecting drug users, male who have sex with male, hijra and overlapping populations, while chapter three discusses the

trend of the infection amongst partners of high risk groups. Bangladesh continues to report low condom use, which is analyzed and discussed in chapter four. Structural factors including macro level and intermediate level factors that affect HIV interventions in Bangladesh are addressed in chapter five. The national HIV response is discussed in chapter six. The report concludes with a discussion of the main findings, with recommendations for the future in chapter seven, and chapter eight and nine are annexes and references.

Handbook for Legislators on HIV/AIDS, Law and Human Rights-Helen Watchirs 1999 Analyzes the 12 International Guidelines on HIV/AIDS and Human Rights and gives best practice examples of their implementation.

Nursing Times, Nursing Mirror- 2001

Substance Abuse Treatment for Persons with HIV/AIDS- 2000

Oxford Handbook of Genitourinary Medicine, HIV, and Sexual Health-Richard Pattman 2010-09-30 The new edition of this successful handbook provides a balance of evidence-based information on Genitourinary Medicine (GUM), including HIV/AIDS. It provides high quality, digestible clinical detail and also practical information on the ever-increasing medico-legal, ethical, and procedural issues of growing importance when dealing with these complex topics. Designed primarily for the trainee in GUM, it is also a valuable reference and resource for the specialist physician, nurse, and other professionals working in the field of sexual health. The new edition remains relevant to those working in this field and features practical enhanced sections on contraception and genital dermatology written by specialist contributors, and information for general practitioners in order to provide services for STIs. The book consists of three easy-to-follow sections. The first section deals with routine management within GUM; medico-legal and ethical issues, the standard patient, special situations, and routine clinical and laboratory processes that include simple flow chart guidance on common clinical presentations. The second section details GUM conditions in a disease-orientated style, including STIs and also other genitourinary problems that may

present. The third section on HIV provides a contemporary epidemiological overview of this infection, basic viral biology and pathogenesis, a disease-orientated description of conditions both directly related and opportunistic, and their management and data on special situations such as pregnancy. Finally guidance on commonly used abbreviations is shown together with a useful resource directory for staff. In essence this handbook provides a wealth of simple and easy to follow information on STIs and the principles of providing a service including administrative and medico-legal issues that are sometimes difficult to locate. This book will be of global use to all those with an interest in sexual health whatever their level of expertise and wherever they may practice.
