FSTA NEW Editions Streamline Driver/Operator Training The new editions of these bestselling IFSTA fire apparatus driver/operator training materials mark a new approach to training driver/operators. Previously, IFSTA published two separate manuals with student and instructor support materials: Pumping Apparatus Driver/Operator Handbook and Aerial Apparatus Driver/Operator Handbook. Fire departments with both types of apparatus needed two manuals, two curriculum and driver/operator trainees needed two exam preps to study for tests. The release of the 3rd edition of these manuals streamlines the IFSTA training resources. The Pumping Apparatus Driver/Operator Handbook, 3rd Edition covers pumping apparatus only, the second book in the pair, Pumping and

Aerial Apparatus Driver/Operator Handbook, 3rd Edition contains the same 15 chapters as the pumping apparatus textbook, plus an additional 5 chapters relevant to aerial apparatus. Personnel on departments that operate both types of apparatus now only need one manual and one curriculum for training. Students only need one exam prep to prepare for testing. If a fire department does not use aerial apparatus, they use the Pumping Apparatus Driver/Operator Handbook, 3rd Edition and omit the aerial sections of the curriculum and exam prep which include all 20 chapters. Chapters 2 and 3 are especially beneficial for all driver/operators: Inspection and Maintenance and Safety and Operating Emergency Vehicles. Pumping Apparatus Driver/Operator Handbook, 3rd edition Skill Sheets now included in the manual Key Terms added The new Fire Apparatus Manufacturer's Association (FAMA) standardized safety signs for fire apparatus are highlighted Hydraulic calculations presented in a logical sequence making teaching and learning easier Customary and metric calculations in one chapter NEW case histories introduce each chapter NFPA® 1002 JPR Correlation Matrix Arabic edition of Pumping Apparatus Driver/ Operator Handbook, 3rd Edition now available.

Fire and Emergency Services Company Officer-IFSTA 2014-11-14

This new IFSTA manual details the training required of Company Officers according to NFPA® 1021, Standard for Fire Officer Professional Qualifications, 2014 Edition. The manual is divided into two sections to make a clear distinction between the information needed for Fire Officer Level I and Fire Officer Level II. Both print and eBook formats are available. There is no shortage of issues that a company officer might face in the everyday operation of a fire company or unit. This manual addresses the wide range of topics

and issues encountered by a company officer, from leadership and supervision to health and safety issues. Great attention was given to focus on the job performance requirements of NFPA® 1021. The fifth edition of Fire and Emergency Services Company Officer builds on the previous edition of the manual while presenting the material in a more concise manner to make it easier for students to read and instructors to teach. By merging related topics, the number of chapters was reduced from 32 in the fourth edition to 17 in the new manual while preserving the material related to the NFPA® standard. The number of appendices was reduced from 20 to 4 by removing information that can be found in other media. Along with reducing the volume of material from the fourth edition, the fifth edition of Fire and Emergency Services Company Officer offers several new features. The manual features a new look with IFSTA's single-column format and upgraded and updated curriculum components. Learning activities are included to help instructors present the material to their students. Case Histories open each chapter to illustrate important lessons learned in the real world. Photographs, illustrations, and tables are included throughout the manual to illustrate key points and improve the overall instructional value of the material.

Fire Service Pump Operator-International Association of Fire Chiefs 2011-02-14 Learn to safely and effectively drive and operate an apparatus with fire pumpers with the new Fire Service Pump Operator: Principles and Practice! This text is the core of a complete teaching and learning system that thoroughly supports instructors and prepares students for the job. The text includes up-to-date coverage the 2009 Edition of NFPA 1002, Standard for Fire Apparatus Driver/Operator Professional Qualifications. This text provides a thorough understanding of the types of fire apparatus equipped with pumps, how to safely drive them, and how to properly maintain these vehicles through inspection and testing programs. Students will also learn how to operate fire pumps by gaining an understanding of water supply, nozzles and flow rates, optimal positioning, and more.

Fire Inspection and Code Enforcement-IFSTA 2017-08-27 Make sure that you have the training and certification needed to provide the best risk reduction to your community. Reducing community

risk requires trained individuals to verify that a locality adheres to locally adopted fire and life-safety standards for structural safety components in construction and renovations. Fire Inspection and Code Enforcement, 8th Edition, provides fire and emergency services personnel and civilian inspectors with the basic information necessary to meet the job performance requirements (JPRs) of NFPA® 1031 for Level I and Level II Fire Inspectors. Chapters are delineated with two clearly marked sections: the first section for Level I information followed by a second section for Level II information. Arabic edition of Arabic edition of Fire Inspection and code Enforcement Handbook, 8th Edition now available. Visit <http://www.afssac.edu.sa/arhome/FICE-8-AR> for ordering instructions.

Fire Protection Systems-A. Maurice Jones Jr. 2013-12-01 In addition to architects, engineers, and design professionals, fire fighters also need to understand fire protection systems in order to manage the fire scene and minimize risks to life and property. Fire Protection Systems, Second Edition provides a comprehensive overview of the various types of fire protection systems, their operational abilities and characteristics, and their applications within various types of structures. The new Second Edition meets the latest course objectives from the Fire and Emergency Services Higher Education s (FESHE) Fire Protection Systems model curriculum and covers: Water supply basics, including sources, distribution networks, piping, and hydrants. Active fire protection systems and components, their operational characteristics, and installation, inspection, testing, and maintenance requirements. Passive fire protection systems such as firewalls, fire separation assemblies, and fire dampers Smoke control and management systems, gas-based suppression, access and egress control systems, and the code requirements for installation of these systems. Ensure that you are completely up-to-date on the latest fire protection systems and their operational characteristics and abilities with Fire Protection Systems, Second Edition."

research on fire behavior from UL and NIST with all new photographs and drawings that illustrate these new fire science concepts. Read and see the new science so that you can apply it to structure fires. Strategies and tactics from national experts are presented and applied to hypothetical structure fire scenarios throughout the book. The target audience is all career and volunteer personnel who respond to single and multifamily dwellings incidents, commercial occupancies, and unique target or special hazards events. The manual meets the requirements of the FESHE course outcomes for the Associates level course, "Strategies and Tactics." This manual also broadens the knowledge of the strategy and tactics JPR's in NFPA®1021, Standard for Fire Officer Professional Qualifications. The manual is the best choice for use in training agencies, college degree programs, and as a resource for firefighters and fire officers who serve as, or are training to be, incident commanders. Additional standards referenced in the manual include NFPA 920, 921, 400. Each of the last three (3) chapters include five (5) training scenarios that reflect real incidents that an incident commander will find when responding to a residential structure, a commercial structure fire and a structure fire with special hazards."

Strategic and Tactical Considerations on the Fireground Study Guide-James P. Smith 2011-10-19 This study guide is meant as an accompaniment to the book Strategic and Tactical Considerations on the Fireground, Third Edition written by retired Deputy Chief James P. Smith of the Philadelphia, PA, Fire Department and published by Brady/Prentice-Hall. It is not meant to be an all-inclusive text or to answer all-encompassing questions; it is meant to reinforce the text after it is read. In many cases the questions are narrow in design and emphasize specific points made within the text.

ranks and levels, and provides a blueprint for not only motivating firefighters but inspiring them; not showing them how much you know, but how much you care; that leadership is not a position or title - it is an action and examples; reminding you that rank does not equate to leadership, the inverted table of organization, and much more! Fully Involved Leadership is filled with powerful leadership topics and at its core addresses the values of trust; the two key qualities needed to be a fire service leader - character and competence; how to keep your emotions in check by using I before E - intelligence before emotions; how to keep from making a wrong decision; why it is important to show honor to your firefighters, plus a whole lot more! Chief Ludwig offers warm and engaging stories of not only his experiences but other chief officers and how they learned from their mistakes when it comes to leadership. Chief Ludwig provides insights and hard lessons learned that makes you reflect upon the question, "Who would you follow if your life depended upon it?"
