Defeating Dictators-George B.N. Ayittey 2011-11-08 Despite billions of dollars of aid and the best efforts of the international community to improve economies and bolster democracy across Africa, violent dictatorships persist. As a result, millions have died, economies are in shambles, and whole states are on the brink of collapse. Political observers and policymakers are starting to believe that economic aid is not the key to saving Africa. So what does the continent need to do to throw off the shackles of militant rule? African policy expert George Ayittey argues that before Africa can prosper, she must be free. Taking a hard look at the fight against dictatorships around the world, from Ukraine's orange revolution in 2004 to Iran's Green Revolution last year, he examines what strategies worked in the struggle to establish democracy through revolution. Ayittey also offers strategies for the West to help Africa in her quest for freedom, including smarter sanctions and establishing fellowships for African students.

How Europe Underdeveloped Africa-Walter Rodney 2018-11-27 The classic work of political, economic, and historical analysis, powerfully introduced by Angela Davis In his short life, the Guyanese intellectual Walter Rodney emerged as one of the leading thinkers and activists of the anticolonial revolution, leading movements in North America, South America, the African continent, and the Caribbean. In each locale, Rodney found himself a lightning rod for working class Black Power. His deportation catalyzed 20th century Jamaica's most significant rebellion, the 1968 Rodney riots, and his scholarship trained a generation how to think politics at an international scale. In 1980, shortly after founding of the Working People's Alliance in Guyana, the 38-year-old Rodney would be assassinated. In his magnum opus, How Europe Underdeveloped Africa, Rodney incisively argues that grasping "the great divergence" between the west and the rest can only be explained as the exploitation of the latter by the former. This meticulously researched analysis of the abiding repercussions of European colonialism on the continent of Africa has not only informed decades of scholarship and activism, it remains an indispensable study for grasping global inequality today.

Elephantoms-Lyall Watson 2012-10-02 As a child in South Africa, spending summers exploring the wild with his boyhood friends, Lyall Watson came face to face with his first elephant. From that moment on, Watson's fascination grew into a lifelong obsession with understanding the nature and behaviour of this impressive creature. Around the world, the elephant - at once a symbol of spiritual power and physical endurance - has been worshipped as a god and hunted for sport. In this captivating portrait of the elephant, Watson draws from scientific research, anthropological studies, and personal experience to document the animal's wide-ranging capabilities to remember and to mourn; and he reminds us of its rich mythic origins, its evolution, and its devastation in recent history. Part meditation on an elusive animal, part evocation of the power of place, Elephantoms presents an alluring mix of the mysteries of nature and the wonders of childhood.

Africa's Billionaires-Bishop Chris 2017-08-17 As Forbes magazine heads towards its centenary in 2017, this is a timely look at how the work of entrepreneurs can influence lives in Africa and create the jobs that empty state coffers can no longer afford. Written by the founder of Forbes Africa, this is a masterclass on how the brightest and most successful entrepreneurs across Africa made their billions. Chris Bishop gets up close and personal with the biggest names in business on the continent: Aliko Dangote, Patrice Motsepe, Nicky Oppenheimer, Christo Wiese and Stephen Saad, among others. These are the stories of how they not only survived, but thrived, in the fast and furious world of African business: the penniless priest who became a steel baron; the barefoot apple-seller who turned into a mining millionaire; the man who shared a hut with cattle but ended up a billionaire; the respected millionaire who went from running

dice games and dealing drugs to running a city. This is a rich tapestry of stories about the super-wealthy and the wise, told with wit and heart.

Buried In The Sky-Rick Andrew 2012-10-01 Set both in the present and in the dust-laden reaches of Angola in 1976, Buried in the Sky is an album of stories about men and women and war. To the strains of the music of Bob Dylan and in long periods of boredom and inactivity, South Africa's soldiers tried to make sense of a war they could not see. Rick Andrew, himself a conscript at that time, allows his comrades to tell their stories. We get to know Manie Dippenaar, whose hunting trip threatened to turn into an international incident; Private Smith, the boy from the Bluff who had Love and Hate tattooed on his knuckles and chose a novel way to roast a chicken as his means of revenge on a bad tempered major; Morphine Sister, who handled a gun like a mamba; and Spek, the surfer-boy who dreamed only of catching the next big wave. Poignant, funny and dramatic, Buried in the Sky will strike a chord with anyone whose life has been tarnished by war and especially those who found themselves on 'the border'.

Capitalist Nigger-Chika Onyeani 2012-03-27 Capitalist Nigger is an explosive and jarring indictment of the black race. The book asserts that the Negroid race, as naturally endowed as any other, is culpably a non-productive race, a consumer race that depends on other communities for its culture, its language, its feeding and its clothing. Despite enormous natural resources, blacks are economic slaves because they lack the 'devil-may-care' attitude and the 'killer instinct' of the Caucasian, as well as the spider web mentality of the Asian. A Capitalist Nigger must embody ruthlessness in pursuit of excellence in his drive towards achieving the goal of becoming an economic warrior. In putting forward the idea of the Capitalist Nigger, Chika Onyeani charts a road to success whereby black economic warriors employ the 'Spider Web Doctrine' - discipline, self-reliance, ruthlessness - to escape from their victim mentality. Born in Nigeria, Chika Onyeani is a journalist, editor and former diplomat.

Entrepreneurship in Africa-Moses E. Ochonu 2018-02-09 A tapestry of innovation, ideas, and commerce, Africa and its entrepreneurial hubs are deeply connected to those of the past. Moses E. Ochonu and an international group of contributors explore the lived experiences of African innovators who have created value for themselves and their communities. Profiles of vendors, farmers, craftspeople, healers, spiritual consultants, warriors, musicians, technological innovators, political mobilizers, and laborers featured in this volume show African models of entrepreneurship in action. As a whole, the essays consider the history of entrepreneurship in Africa, illustrating its multiple origins and showing how it differs from the Western capitalist experience. As they establish historical patterns of business creativity, these explorations open new avenues for understanding indigenous enterprise and homegrown commerce and their relationship to social, economic, and political debates in Africa today.

Student Comrade Prisoner Spy-Bridget Hilton-Barber 2016-12-31 When Bridget Hilton-Barber got on a train to Grahamstown in 1982 to study journalism at Rhodes University, she had no idea of the brutal drama that would unfold. A rebellious young woman, she became politically involved in anti-apartheid organisations and was caught up in the massive resistance and repression sweeping the Eastern Cape at the time. She ended up spending three months in detention without trial, and after her release discovered she had been betrayed by one of her best friends, Olivia Forsyth, who was a spy for the South African security police. Thirty years later, a horrific flashback triggers Bridget's journey back to the Eastern Cape to see if she can forgive her betrayer and finally let go of the extraordinary violence she encountered in the final days of apartheid. This is her powerful story. REVIEWS I have seldom been so compelled by a narrative. It perfectly recreates the zany idealism of university students in the mid-1980s and the deep betrayals the apartheid security machine brought into our lives Nic Borain"

Smythe 2015-07-06 Africa's Past, Our Future engages the history of the African continent through the perspective of global issues such as political instability, economic development, and climate change. Since the past may offer alternative models for thinking about our collective future, this book promotes an appreciation for African social, economic, and political systems that have endured over the long-term and that offer different ways of thinking about a sustainable future. Introducing readers to the wide variety of sources from which African history is constructed, the book's ten chapters cover human evolution, the domestication of plants and animals, climate change, social organization, the slave trade and colonization, development, and contemporary economics and politics.

Cultural Entrepreneurship in Africa-Ute Rösenthaller 2015-11-19 This book seeks to widen perspectives on entrepreneurship by drawing attention to the diverse and partly new forms of entrepreneurial practice in Africa since the 1990s. Contrary to widespread assertions, figures of success have been regularly observed in Africa since pre-colonial times. The contributions account for these historical continuities in entrepreneurship, and identify the specifically new political and economic context within which individuals currently probe and invent novel forms of enterprise. Based on ethnographically contextualized life stories and case studies of female and male entrepreneurs, the volume offers a vivid and multi-perspectival account of their strategies, visions and ventures in domains as varied as religious proselytism, politics, tourism, media, music, prostitution, funeral organization, and education. African cultural entrepreneurs have a significant economic impact, attract the attention of large groups of people, serve as role models for many youths, and contribute to the formation of new popular cultures.

The Team Secret-Koos Stadler 2018-08-15 The South African Special Forces achieved exceptional results with small groups of elite soldiers instead of larger, conventional teams. The Team Secret shows that the same principle applies in the business world - a small team has a much better chance of completing projects efficiently, on budget and on time. Teams, rather than individuals, form the DNA of many companies and they play a pivotal role in achieving strategic and financial success. Like Special Forces teams, they must function as a well-oiled machine firing on all cylinders. Koos Stadler tells in captivating detail about a real-life Special Forces operation and the lessons learnt about team dynamics and achieving the goal. His story, combined with anecdotes from Anton Burger's experiences as a team leader in different work environments, show the many lessons the business world can take from the Special Forces. The book identifies the key characteristics of an effective team, how to select the right team members, how to inculcate an ethos centred around team principles and how an effective team should be led. It speaks to both team members and team leaders across all managerial levels - from a team leader in a call centre to a project manager or CEO. In short: To fast-track your business, shape up your teams!

Telling Times-Nadine Gordimer 2012-03-15 Nadine Gordimer's life reflects the true spirit of the writer as moral activist, political visionary and literary icon. Telling Times collects together all her non-fiction for the first time, spanning more than half a century, from the twilight of colonial rule in South Africa, to the long, brutal fight to overthrow South Africa's apartheid regime and to her leadership role over the last 20 years in confronting the dangers of AIDS, globalisation, and ethnic violence. The range of this book is staggering, from Gordimer's first piece in The New Yorker in 1954, in which she autobiographically traces her emergence as a brilliant, young writer in a racist country, to her pioneering role in recognising the greatest African and European writers of her generation, to her truly, courageous stance in supporting Nelson Mandela and other members of the ANC during their years of imprisonment. Given that Gordimer will never write an autobiography, Telling Times is an important document of twentieth-century social and political history, told through the voice of one of its greatest literary figures.

Precolonial Black Africa-Cheikh Anta Diop 1988-08 This comparison of the political and social systems of Europe and black Africa from antiquity to the formation of modern states demonstrates the black contribution to the development of Western civilization.

South Africa - Culture Smart!-Isabella Morris 2018-02-01 South Africa has been described as "A World in One Country" and a "Rainbow Nation." Its landscape ranges from miles of glorious beaches to the inland desert of the Karoo, the sweeping grasslands of the Highveld plateau, and the subtropical bush of the Lowveld. Its ethnic makeup is equally varied. There are eleven official languages, nine major black African tribes, two major white tribes, as well as a representation of all the world's major religions. It has a free market economy while communists share in government; one of the world's most liberal constitutions and a deeply patriarchal society; and very rich and very poor people coexisting. South Africa has come through fire, and although there is still considerable heat, it is doing pretty well. This insiders' guide will introduce you to the universal warmth and cultural diversity of its people, explain the backdrop of their troubled past, and familiarize you with their everyday life so that you'll feel comfortable whether you're invited to a shack in the townships, a mansion in the suburbs, or a braai on the beach. You'll learn how to stay safe in potentially dangerous areas, and you'll know where to go if you want to feel like the only person on the planet.

The Lion Awakes-Ashish J. Thakkar 2015-08-25 Three little known facts: Africa is now the world's fastest growing continent, with average GDP growth of 5.5% the past 10 years. Malaria deaths have declined by 30% and HIV infections by 74%. Nigeria produces more movies than America does. The Lion Awakes is the true story of today's Africa, one often overshadowed by the dire headlines. Traveling from his ancestral home in Uganda, East Africa, to the booming economy and (if chaotic) new democracies of West Africa, and down to the "Silicon Savannahs" of Kenya and Rwanda, Ashish J. Thakkar shows us an Africa that few Westerners are aware exists. Far from being a place in need of our pity and aid, we see a continent undergoing a remarkable transformation and economic development. We meet a new generation of ambitious, tech savvy young Africans who are developing everything from bamboo bicycles to iPhone Apps; we meet artists, film makers and architects thriving with newfound freedom and opportunity, and we are introduced to hyper-educated members of the Diaspora who have returned to Africa after years abroad to open companies and take up positions in government. They all tell the same story: 21st Century Africa offers them more opportunity than the First World. Drawing from his business experience, and his own family's history in Africa, which include his parents' expulsion from Uganda by Idi Amin in the 70s and his own survival of the Rwandan genocide in 1994, Ashish shows us how much difference a decade can make.

How to Make a Spaceship-Julian Guthrie 2017-09-05 "When NASA began winding down its manned missions, Peter Diamandis realized that his lifelong dream of space travel needed a fresh trajectory. If the government wouldn't send him, he'd create an industry that could. His inspiration came from an unlikely place: Reading Charles Lindbergh's The spirit of St. Louis, Diamandis learned that the transatlantic flight that galvanized the airline industry was not just a stunt but an attempt to win a prize. Why, Diamandis thought, couldn't the same be done for private space flight? The story of SpaceShipOne, and the hunt for a ten-million-dollar prize is an extraordinary tale of making the impossible possible. In the end, as Diamandis dreamed, the result wasn't just a victory for one team--it was the foundation for a new industry and a new age."--Page 4 of cover.

The Dragon's Gift-Deborah Brautigam 2011-04-07 Is China a rogue donor, as some media pundits suggest? Or is China helping the developing world pave a pathway out of poverty, as the Chinese claim? In the last few years, China's aid program has leapt out of the shadows. Media reports about huge aid packages, support for pariah regimes, regiments of Chinese labor, and the ruthless exploitation of workers and natural resources in some of the poorest countries in the world sparked fierce debates. These debates, however, took place with very few hard facts. China's tradition of secrecy about its aid fueled rumors and speculation, making it difficult to gauge the risks and opportunities provided by China's growing embrace. This well-timed book, by one of the world's leading experts, provides the first comprehensive account of China's aid and economic cooperation overseas. Deborah Brautigam tackles the myths and realities, explaining what the Chinese are doing, how they do it, how much aid they give, and how it all fits into their "going global" strategy. Drawing on three decades of experience in China and Africa, and hundreds of interviews in Africa, China, Europe and the US, Brautigam shines new light on a topic of great interest. China has ended poverty for hundreds of millions of its own citizens. Will Chinese engagement benefit Africa? Using hard data and a series of vivid stories ranging across agriculture, industry, natural resources, and governance, Brautigam's fascinating book provides an answer. It is essential reading for anyone concerned with China's rise, and what it might mean for the challenge

of ending poverty in Africa.

Things are moving at a faster pace than ever before and trying to keep up has become intimidating and overwhelming. It's tempting to bury your head in the sand than try to make head or tail of it all. But none of the buzzwords actually matter! You don't have to jump aboard every single change and adjustment in the market, or trade in your suit for a T-shirt, jeans and sneaker combo. If you have the right context, it's a lot simpler to understand and use technological shifts as an opportunity to transform your business. Tech Adjacent is about understanding the principles of tech and its pace, hearing the footsteps of where it might be going, knowing how disruption and innovation work tangibly and, most importantly, leveraging it for your individual exponential success. This book shares stories and case studies of African businesses, exposing who is getting disrupted as we speak and why, as well as how new companies are leading the next wave of growth. Mushambi Mutuma's experience and expertise in both business and as a tech entrepreneur give real-life context to rapid change, unlocking future opportunities and offering tools to predict where your audience and industry are heading. He sells no big ideas, but genuinely shares his unique perspectives and know-how to help whoever he can in the process. Tech Adjacent isn't just another book on growing your business in 100 days, nor is it dry academic theory. It is the guidebook for not only surviving but excelling in a world of exponential growth.
