Markets in Profile-James F. Dalton 2011-01-11 Markets in Profile explores the confluence of three disparate philosophical frameworks: the Market Profile, behavioral finance, and neuroeconomics in order to present a unified theory of how markets work. The Market Profile is an ever-evolving, multidimensional graphic that gives visual form to the market's continuing auction process, revealing the myriad underlying dynamics that influence market activity. Behavioral finance posits that investors are driven more by emotional factors and the subjective interpretation of minuita than by "rationality" when making investment decisions. And neuroeconomics is the study of how investor psychology permeates and affects the financial markets. Mr. Dalton explicates the ways in which irrational human behavior influences the market's natural auction process, creating frequently predictable market structure, which results in opportunities for investors to ameliorate risk. The book will provide investors ability to interpret change in markets, enabling better, more confident investment decisions.

Nikolai Gumilev's Africa-Nikolai Gumilev 2018-09-06 Gumilev holds a unique position in the history of Russian poetry as a result of his profound involvement with Africa. He extensively wrote both poetry and prose on the culture of the continent in general and on Ethiopia (Abyssinia, as it was called in Gumilev's time) in particular. During his abbreviated lifetime Gumilev made four trips to Northern and Eastern Africa, the most extensive of which was a 1913 expedition to Abyssinia undertaken on assignment from the St. Petersburg Imperial Museum of Anthropology and Ethnography. During that trip Gumilev collected Ethiopian folklore and ethnographic objects, which, upon his return to St. Petersburg, he deposited at the Museum. He and his assistant Nikolai Sverchkov also made more than 200 photographs that offer a unique picture of the African continent in the early part of the century. This volume collects all of Gumilev's poetry and prose written about Africa for the first time as well as a number of the photographs that he and Nikolai Sverchkov took during their trip that give a fascinating view of that part of the world in the early twentieth century. Translated by Slava I. Yastremski, Michael M. Naydan, and Maria Badanova.

Using German Synonyms-Martin Durrell 2000-05-29 This book, designed for students who have already developed a basic competence in German, aims to broaden and improve their vocabulary by providing detailed information on groups of German words with related meanings. It is invaluable as a guide to finding the right word for the context. In order to enhance understanding of the structure of the German vocabulary, groups of synonyms are organised under German (rather than English) headwords. All entries are accompanied by an example of usage and English glosses and there are two indexes allowing users quickly to locate words in German or English. The book takes full account of register variation, indicating the degree of formal or informal use, and reflects regional usage especially in Austria and Switzerland. It is an essential reference for intermediate and advanced students as well as teachers and other professional linguists seeking access to the finer nuances of the German language.

The Creation of the Black Russian Terrier. Moscow: Birma Group-Donald B. Anderson 2019-07-30 Black & White EditionThis is a fascinating exploration of the genesis of a new breed born of necessity from the ashes of the Second World War. Donald B. Anderson looks in some detail at the formative years and the [verifiable] breeds employed in creating the Black Russian Terrier.In 2004, Anderson discovered the fabled existence of a new breed, the massive, aggressive Black [Russian] Terrier. Having been a breeder of Giant Schnauzers, he was immediately captivated by a statement proclaiming this canine to be based on the Giant Schnauzer.With little information readily available, Anderson (launching himself onto the investigative trail) decided to undertake the search for more knowledge on the evolution and development of this Stalin-era, post-WWII-Russia, military dog. Data strongly suggests that this beast was created as the result of a post World War II edict of Premier Josef Stalin's demand for a national military and gulag guard dog. With the Stalin years fraught with secrecy and ruled by applying unbridled psychological fear on the public, discovering sources of information, and forging a spirit of mutual trust, was not to be an easy task.What Anderson discovered was an undertaking of monumental proportions, a project that could only be accomplished through the availability of unlimited government financial resources, and political commitment.A strategy was launched by a large team of Russia's foremost geneticists and cynologists to undertake massive multi-breed experimental combinations of dogs with the aim of melding a collection of the best traits into a "super" military canine.In outlining this "historical" exploration, Anderson has ferreted out evidence previously not readily available outside Russia, and has made every effort to gather, evaluate and produce an account that can be substantiated as being reasonably accurate. Anderson's stratagem was not only to describe the emerging "Black Terrier", but to include historical data on the origins of the breeds that went into its makeup, thus providing readers with a Paint by Number portrait of the big picture.Anderson portrays the evolution from the original concept of a dog of war to that of a family companion. His purpose for this eight-year odyssey was not only with writing an historical presentation for the English-speaking canine fancy, but an invitation to journey with him along a road of adventure.His chronology of the Black Russian Terrier became so massive and complex that it could only be rationally presented in a series of volumes.

Dante-Barbara Reynolds 2006 Dante is one of the towering figures of European literature, yet there remain a surprising number of questions about his life and works; Who was the leader that would bring peace to the world, as Virgil and Beatrice prophesied in the Commedia? Who was Beatrice, really? Was De Vulgari Eloquentia truly a treatise on the art of writing? Did he need a medicinal muse? Dante scholar and translator Barbara Reynolds contends the master used cannabis to soar to greater creative heights. Besides proposing a solution to the famous prophecies, this lively, engaging, and elegantly written biography contains a provocative new idea in virtually every chapter, offering alternative interpretations of his work. Drawing from an impressive array of sources, Reynolds provides a comprehensive analysis of the poet, placing him within the context of his culture and society to deepen our understanding of a complicated man who was irritable, opinionated, and vengeful—and an extraordinary genius.

Other pedagogical tools include "Procedural Ponderables" that challenge students to think beyond the rules, "Litigation Lingo and Logistics" that provides hypotheticals and interesting exercises, and "Techno Tips" that introduce readers to helpful computer programs, formatting, and other technical issues.ALSO AVAILABLECOMING SOONWest Paralegal Comprehensive CTB-2000-II, ISBN: 0-7668-1773-3
