Modern Faith and Thought-Helmut Thielicke 1990-11 Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

Reading Zoos-Randy Malamud 1998 Through an examination of modern depictions of zoos, Reading Zoos presents a paradigm of how these institutions, and a range of reactions to them, illuminate the workings of our cultural sensibilities. The book explores how the nature of zoos and their significance to cultural

consumers is portrayed in over 100 works. It explores what animals' captivity signifies about the people who create, maintain, and patronize zoos; Malamud argues that zoos represent a cultural danger, a deadening of our sensibilities, because the institutions - rather than fostering an appreciation for animals' attributes - convince spectators that people are the imperial species.

The Biblical Theology of the New Testament-Ezra Palmer Gould 1900

Taming an Angel-Kathleen Lash 2010-08 As a final installment in a military career wrought with horrid events, Jess is sent to rescue a Braugh warrior and his men from prison. All she wants is to be safely on her home planet to forget her throwback status and find a normal existence. The warrior's intimidating size and raw strength contrast with his tender nature, skillful lips and gentle touch, awakening sexual urges she thought had been stripped away years prior. Shane knows the piercings adorning Jess' body once created pain and taught her to suppress arousal and desire. And he knows what's needed to take her beyond the torture. But providing a sexual release may prove easier than convincing her something stronger lies between them. All he needs to claim his angel, in every way, is her consent.

Zoo Renewal-Lisa Uddin 2015-04-01 Why do we feel bad at the zoo? In a fascinating counterhistory of American zoos in the 1960s and 1970s, Lisa Uddin revisits the familiar narrative of zoo reform, from naked cages to more naturalistic enclosures. She argues that reform belongs to the story of cities and feelings toward many of their human inhabitants. In Zoo Renewal, Uddin demonstrates how efforts to make the zoo more natural and a haven for particular species reflected white fears about the American city—and, pointedly, how the shame many visitors felt in observing confined animals drew on broader anxieties about race and urban life. Examining the campaign against cages, renovations at the National Zoo in Washington, D.C. and the San Diego Zoo, and the cases of a rare female white Bengal tiger and a collection of southern white rhinoceroses, Uddin unpacks episodes that challenge assumptions that zoos are about other worlds and other creatures and expand the history of U.S. urbanism. Uddin shows how the drive to protect endangered species and to ensure larger, safer zoos was shaped by struggles over urban decay, suburban growth, and the dilemmas of postwar American whiteness. In so doing, Zoo Renewal ultimately reveals how feeling bad, or good, at the zoo is connected to our feelings about American cities and their residents.

Emotions Go to Work-Zoe Beloff 2018-04-16 Emotions Go To Work is an investigation into how technology is used to turn our feelings into valuable assets. One might call it the transformation of emotion into capital. It asks what is at stake in our relationship with the companions we call smart objects? What does the future hold in store for a world where people are treated more and more like things, while the billions of gadgets that make up the Internet of Things are increasingly anthropomorphized, granted agency? Spanning an arc of time from the 18th century to 21st century and beyond, Emotions Go To Work traces the codification and instrumentalization emotional data in ways both playful and serious. It considers the role emojis play our mental life and their potential to evolve and grow monstrous. It suggests that anthropomorphized technological creatures from early cartoons might inspire a utopian society. Proposing that the first step to re-wiring our world is to picture possibilities in games and in play, in dreams and in far-fetched fictions, so that we can begin new conversations between people and things. Hand printed 5 color Risograph artist book with two pullout pages, printed in a limited edition of 200 copies.

Metamodern Leadership-James Surwillo 2020-11-06 The great liberal arts tradition of leadership is dead, and our twentieth-century leaders have killed it.

Around the eighteenth century, the world began to revive the ancient wisdom of mankind in a period called the Enlightenment. By the late twentieth century, the truth and wisdom learned in the Enlightenment was in remission due to the fragmentation caused by new insights and complexities developed in the postmodern period. In recent years, metamodernism as a cultural era claims that thanks

The Breathless Zoo-Rachel Poliquin 2012-09-12 From sixteenth-century cabinets of wonders to contemporary animal art, The Breathless Zoo: Taxidermy and the Cultures of Longing examines the cultural and poetic history of preserving animals in lively postures. But why would anyone want to preserve an animal, and

what is this animal-thing now? Rachel Poliquin suggests that taxidermy is entwined with the enduring human longing to find meaning with and within the natural world. Her study draws out the longings at the heart of taxidermy—the longing for wonder, beauty, spectacle, order, narrative, allegory, and remembrance. In so doing, *The Breathless Zoo* explores the animal spectacles desired by particular communities, human assumptions of superiority, the yearnings for hidden truths within animal form, and the loneliness and longing that haunt our strange human existence, being both within and apart from nature.

Tolstoy and the Genesis of "War and Peace"-Kathryn B. Feuer 2018-10-18 Kathryn B. Feuer offers remarkable insights into Leo Tolstoy's creative process while he wrote *War and Peace*. She follows the novel through countless drafts and notes, illuminating its connection to earlier, unpublished, novels and to crucial new sources, both European and Russian. A novelist herself, Feuer explores the problems of character development, narrative voice, genre, and structure that Tolstoy ultimately resolved so brilliantly.

Medieval Identity Machines-Jeffrey Jerome Cohen In *Medieval Identity Machines*, Jeffrey J. Cohen examines the messiness, permeability, and perversity of medieval bodies, arguing that human identity always exceeds the limits of the flesh. Combining critical theory with a rigorous reading of medieval texts, Cohen asks if the category "human" isn't too small to contain the multiplicity of identities. As such, this book is the first to argue for a "posthuman" Middle Ages and to make extensive use of the philosophical writings of Gilles Deleuze to rethink the medieval. Among the topics that Cohen covers are the passionate bond between men and horses in chivalric training; the interrelation of demons, celibacy, and colonialism in an Anglo-Saxon saint's life; Lancelot's masochism as envisioned by Chretien de Troyes; the voice of thunder echoing from Margery Kempe; and the fantasies that sustained some dominant conceptions of race. This tour of identity--in all its fragility and diffusion--illustrates the centrality of the Middle Ages to theory as it enhances our understanding of self, embodiment, and temporality in the medieval world.

Night Dogs-Kent Anderson 2018-11-13 Acclaimed crime writer Kent Anderson's "fiercely authentic and deeply disturbing" police novel, following a Vietnam veteran turned cop on the meanest streets of 1970s Portland, Oregon (Los Angeles Times). Two kinds of cops find their way to Portland's North Precinct: those who are sent there for punishment, and those who come for the action. Officer Hanson is the second kind, a veteran who survived the war in Vietnam only to decide he wanted to keep fighting at home. Hanson knows war, and in this battle for the Portland streets, he fights not for the law but for his own code of justice. Yet Hanson can't outrun his memories of another, warmer battleground. A past he thought he'd left behind, that now threatens to overshadow his future. An enemy, this time close to home, is prying into his war record. Pulling down the shields that protect the darkest moments of that fevered time. Until another piece of his past surfaces, and Hanson risks his career, his sanity--even his life--for honor.

Indicators of Quality of Life in Latin America-Graciela Tonon 2016-03-21 This volume sheds new light on the use of quantitative, qualitative and synthetic indicators for the measurement of quality of life in different countries of Latin America. Organized in three parts, the book presents the methodology for the construction of new indicators, discusses quality of urban life from a geographical perspective, and examines quality of life of different populations. The book focuses on the social, economic, political, geographical and demographic dimensions. It covers a wide range of topics, including the ways to measure social, political and spatial inequalities, the changes in urban quality of life, the construction of a synthetic indicator for the assessment of habitability, the measuring of spatial segregation in midsize and smaller cities by using thematic cartography and synthesis maps, and the concept of habitability. It includes research conducted on the quality of life of different population groups: working boys and girls, high-school students, and older people.

great many stills and an unusually detailed filmography."—Sight and Sound Yasujiro Ozu, the man whom his kinsmen consider the most Japanese for all film directors, had but one major subject, the Japanese family, and but one major theme, its dissolution. The Japanese family in dissolution figures in every one of his fifty-three films. In his later pictures, the whole world exists in one family, the characters are family members rather than members of a society, and the ends of the earth seem no more distant than the outside of the house.

Geo-Electromagnetism-James Wait 2012-12-02 Geo-Electromagnetism surveys the theoretical concepts and applications of electrical prospecting methods. This book is divided into seven chapters that specifically tackle the basic electromagnetic concepts and the special mathematical functions. This text deals first with the numerical and analytical approaches to delineate earth resistivity principles, followed by a description of the three-layer model. These topics are followed by a discussion on the theory of induced electrical polarization. The subsequent chapters are devoted to relevant electromagnetic theory of low-frequency current flow in conducting with varying fields. The discussion then shifts to the geophysical problems associated with vertical electric dipole sources, with an emphasis on the quasi-static range in which all significant distances are small compared with the free-space wavelength. The last chapters outline the relevant analytical development of the magnetotelluric theory and the theoretical principles of the transient electromagnetic methods used in geophysical exploration.

Geophysicists, theoreticians, and undergraduate level students will find this book invaluable.

Social Movements for Global Democracy-Jackie Smith 2010-04-01 This groundbreaking study sheds new light on the struggle to define the course of globalization. Synthesizing extensive research on transnational activism, Social Movements for Global Democracy shows how transnational networks of social movement activists—democratic globalizers—have worked to promote human rights and ecological sustainability over the predominant neoliberal system of economic integration. Using case studies of recent and ongoing campaigns for global justice, Jackie Smith provides valuable insight into whether and how these activists are succeeding. She argues that democratic globalizers could be more effective if they presented a united front organized around a global vision that places human rights and ecological stability foremost and if they were to directly engage governments and the United Nations. Illuminating the deep-seated struggles between two visions of globalization, Smith reveals a network of activists who have long been working to democratize the global political system. --

Social Movements and World-System Transformation-Jackie Smith 2016-10-26 At a particularly urgent world-historical moment, this volume brings together some of the leading researchers of social movements and global social change and other emerging scholars and practitioners to advance new thinking about social movements and global transformation. Social movements around the world today are responding to crisis by defying both political and epistemological borders, offering alternatives to the global capitalist order that are imperceptible through the modernist lens. Informed by a world-historical perspective, contributors explain today's struggles as building upon the experiences of the past while also coming together globally in ways that are inspiring innovation and consolidating new thinking about what a fundamentally different, more equitable, just, and sustainable world order might look like. This collection offers new insights into contemporary movements for global justice, challenging readers to appreciate how modernist thinking both colors our own observations and complicates the work of activists seeking to resolve inequities and contradictions that are deeply embedded in Western cultural traditions and institutions.

Contributors consider today's movements in the *longue durée*—that is, they ask how Occupy Wall Street, the Arab Spring, and other contemporary struggles for liberation reflect, build upon, or diverge from anti-colonial and other emancipatory struggles of the past. Critical to this volume is its exploration of how divisions over gender equity and diversity of national cultures and class have impacted what are increasingly intersectional global movements. The

contributions of feminist and indigenous movements come to the fore in this collective exploration of what the movements of yesterday and today can contribute to our ongoing effort to understand the dynamics of global transformation in order to help advance a more equitable, just, and ecologically sustainable world. How to Do Everything and Be Happy-Peter Jones 2011 Every now and then a self-help book comes along that questions the very nature of happiness, shakes the very foundation of all the things you hold dear, and forces you to reconsider every assumption you've ever made. This isn't one of those books. How To Do Everything And Be Happy is a book for ordinary people. With ordinary lives. It's for people who have been ambling along and wondering why they're not - well - just that little bit happier. It's a book for most people. It's a book for you. Mumbo jumbo & jargon free, How To Do Everything And Be Happy is direct, practical, occasionally witty, and stuffed full of ways to make your life just that bit happier. If you've got a brain in your head, if you can pick up a pen, if you've got half an inkling about what makes you smile, How To Do Everything And Be Happy will show you how to fit those things into your life and, as a consequence, feel much, much happier.

Piloting Your Life-Terri Hanson Mead 2019-08-20 Are you feeling blindsided by midlife? You're not alone and you're not crazy. Our current culture tells us that midlife (ages 40-65) is a time of unraveling, chaos, and uncertainty for women. This doesn't have to be true. MIDLIFE IS AN OPPORTUNITY, NOT A CRISIS. Our bodies, minds, and lives are changing. Many of us feel off balance, wondering if this is all there is? Some of us feel completely unprepared. No one told us what to expect, or that midlife is a magical and transformative time of renewal that is just the beginning, not the end. In Piloting Your Life, diverse women from around the world share their personal stories of learning, growing, and thriving through midlife to inspire you to explore and experiment. Terri Hanson Mead candidly shares her extensive research on happiness, sex, friendship, money, and health to help you discover and live your life. It's time to throw off the chains of embarrassment and shatter the stereotypes for women in midlife. Disengage autopilot, take the controls, and be the pilot in your own life. "Tells the ugly truth and offers hope and solutions." Allison (Oklahoma)

Siloxanes in the Nordic Environment- 2005 Siloxanes belong to a group of substances used in a number of industrial applications and in consumer products such as additives in fuel, car polish, cleaners, anti foamers and car waxes. Besides this, they are widely used in e.g. personal care and biomedical products. As a result of their wide use, siloxanes are presumably spread into the environment both via point sources and via diffuse sources and may be found in the environment. Recent studies have suggested that siloxanes may have direct or indirect toxic effects on various biological processes. The aim of this screening study was to obtain a snapshot of the occurrence of siloxanes in the Nordic environment. The here presented screening study involved six countries: Denmark, Faroe Islands, Finland, Iceland, Norway and Sweden. Sampled media types were air, biota, sediment, sludge, soil and water. Siloxanes were found in all the analysed samples types except soils. The results indicate that there is a general pollution of siloxanes in the Nordic environment, close to dense population and major sources. There was, however, a great variation in concentrations. The cyclic siloxanes occurred in all media in significantly higher concentrations than the linear siloxanes. At present, the observed concentrations are not alarmingly high, and many background sites seem to be non-contaminated. However, the use of siloxanes is extensive and it is possible that continued use will lead to increased environmental levels, eventually reaching effect concentrations.

How (Not) to Speak of God-Peter, Rollins 2006-01-01 With sensitivity to the Christian tradition and a rich understanding of postmodern thought, Peter Rollins argues that the movement known as the "emerging church" offers a singular, unprecedented message of transformation that has the potential to revolutionize the theological and moral architecture of Western Christianity. How (not) to Speak of God sets out to explore the theory and praxis of this contemporary expression of faith. Rollins offers a clear exploration of this embryonic movement and provides key resources for those involved in communities that are conversant with, and seeking to minister effectively to, the needs of a postmodern world. "Here in pregnant bud is the rose, the emerging new configuration, of a Christianity that is neither Roman nor Protestant, neither Eastern nor monastic; but rather is the re-formation of all of them. Here, in pregnant bud, is third-millennium Christendom." —Phyllis Tickle "I am a raving fan of the book you are holding. I loved reading it. I have already begun widely recommending it. Reading it did good for my mind and for my soul. It helped me understand my own spiritual journey more clearly, and it gave me a sense of context for the work I'm involved in. In fact, I would say this is one of the two or three most rewarding books of theology I have read in ten years." —Brian McLaren, from the Foreword
