The Fifth Discipline-Peter M. Senge 2010-03-31 Completely Updated and Revised This revised edition of Peter Senge's bestselling classic, *The Fifth Discipline*, is based on fifteen years of experience in putting the book's ideas into practice. As Senge makes clear, in the long run the only sustainable competitive advantage is your organization's ability to learn faster than the competition. The leadership stories in the book demonstrate the many ways that the core ideas in *The Fifth Discipline*, many of which seemed radical when first published in 1990, have become deeply integrated into people's ways of seeing the world and their managerial practices. In *The Fifth Discipline*, Senge describes how companies can rid themselves of the learning "disabilities" that threaten their productivity and success by adopting the strategies of learning organizations—ones in which new and expansive patterns of thinking are nurtured, collective aspiration is set free, and people are continually learning how to create results they truly desire. The updated and revised Currency edition of this business classic contains over one hundred pages of new material based on interviews with dozens of practitioners at companies like BP, Unilever, Intel, Ford, HP, Saudi Aramco, and organizations like Roca, Oxfam, and The World Bank. It features a new Foreword about the success Peter Senge has achieved with learning organizations since the book's inception, as well as new chapters on Impetus (getting started), Strategies, Leaders' New Work, Systems Citizens, and Frontiers for the Future. Mastering the disciplines Senge outlines in the book will:

- Reignite the spark of genuine learning driven by people focused on what truly matters to them
- Bridge teamwork into macro-creativity
- Free you of confining assumptions and mindsets
- Teach you to see the forest and the trees
- End the struggle between work and personal time

Taxing Ourselves-Joel Slemrod 2008-02-08 The fourth edition of a popular guide to the key issues in tax reform, discussing the current system and alternative

proposals clearly and without a political agenda. As Albert Einstein may or may not have said, "The hardest thing in the world to understand is the income tax." Indeed, to follow the debate over tax reform, the interested citizen is forced to choose between misleading sound bites and academic treatises. *Taxing Ourselves* bridges the gap between the two by discussing the key issues clearly and without a political agenda: Should the federal income tax be replaced with a flat tax or sales tax? Should it be left in place and reformed? Can tax cuts stimulate the economy, or will higher deficits undermine any economic benefit? Authors and tax policy experts Joel Slemrod and Jon Bakija lay out in accessible language what is known and not known about how taxes affect the economy, offer guidelines for evaluating tax systems, and provide enough information to assess both the current income tax system and the leading proposals to reform or replace it (including the flat tax and the consumption tax). The fourth edition of this popular guide has been extensively revised to incorporate the latest information, covering such recent developments as the Bush administration's tax cuts (which expire in 2011) and the alternatives proposed by the President's Advisory Panel on Federal Tax Reform. Slemrod and Bakija provide us with the knowledge and the tools—including an invaluable voter's guide to the tax policy debate—to make our own informed choices about how we should tax ourselves.

For 45 years it has remained unrivalled as an introduction to the whole subject, from the earliest cave paintings to the experimental art of today. Readers of all ages and backgrounds

throughout the world have found in Professor Gombrich a true master, who combines knowledge and wisdom with a unique gift for communicating directly his own deep love of the works of art he describes." "The Story of Art owes its lasting popularity to the directness and simplicity of the writing, and also the author's skill in presenting a clear narrative. He describes his aim as 'to bring some intelligible order into the wealth of names, periods and styles which crowd the pages of more ambitious works', and using his insight into the psychology of the visual arts, he makes us see the history of art as 'a continuous weaving and changing of traditions in which each work refers to the past and points to the future, a living chain that still links our own time with the Pyramid age'. In its new format, the 16th edition of this classic work is set to continue its triumphant progress for future generations and to remain the first choice for all newcomers to art."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Picturing the Celestial City-Michael Watt Cothren 2006 The cathedral of Saint-Pierre in Beauvais, France, is most famous as a failure--its choir vaults came crashing down in 1284--and only secondarily for its soaring beauty. This lavishly illustrated and elegantly written book represents the first serious look at the stunning collection of Gothic stained glass windows that has always dominated the experience of those who enter Beauvais Cathedral. Chapter by chapter, Michael Cothren traces the glazing through four successive campaigns that bridged the century between the 1240s and the 1340s. The reader is transported back in history, gaining fascinating insight into what the glazing of Beauvais actually would have looked like as well as what it would have communicated to those who frequented the cathedral. Contrary to the widespread assumption that these windows are heavily restored, Cothren shows that they are in fact surprisingly well preserved, especially in light of the cathedral's infamous history of architectural disaster. More importantly, Cothren goes far to dismantle a long-held misconception about medieval painted windows, and indeed monumental medieval pictorial art in general: the notion that it was conceived and produced as a substitute text for ignorant, illiterate folks, providing for them a "Bible of the Poor." Indeed, Cothren shows us that stained glass windows, rich with shaded meanings, functioned more like sermon than scripture. As an ensemble, they created a radiant interpretive backdrop that explicated and situated the performance of the Mass in this giant liturgical theater.
