Halftoning for Multi-Channel Printing-Paula Žitinski Elías 2014-11-20 A seemingly straightforward way to enhance the quality of printed images is to increase the number of colorants, beyond the four traditionally used, in multi-channel printing. Potential improvements to reproduced images include: increased colour accuracy, enhanced colour smoothness and reduced image graininess. Nevertheless, numerous challenges exist, one of them being the implementation of halftoning algorithms, which transform the original image into a binary one that is reproducible by the printing system. This thesis concerns the development, implementation and verification of halftoning algorithms suitable for an increased number of colorants in multi-channel printing. The first focus in this thesis is on the implementation of an amplitude modulated (AM) halftoning method for seven-channel printing utilizing CMYKRGB colorants. The proposed AM halftoning method utilizes non-orthogonal halftone screens instead of orthogonal ones (dots), thus enabling a wider angle range for the channels that makes possible to accommodate multi-channel impressions. The performance of the non-orthogonal halftoning method was evaluated by computational simulation of channel misregistration for 1600 different scenarios and assessment of printed orthogonal and non-orthogonal patches. The simulated and printed results demonstrate that the proposed halftoning method utilizing non-orthogonal screens shows no visible moiré and produces smaller colour shifts in case of misregistration when compared to orthogonal halftoning. However, the layer thickness of the combined colorants is not controlled by the aforementioned multi-channel AM halftoning approach. Therefore, the second focus in this thesis concerns the adjustment and implementation of a multilevel halftoning algorithm for achromatic and chromatic inks. In this algorithm, a channel is processed so that it can be printed using multiple inks of same hue value, achieving a single ink layer. Here, the thresholds for ink separation and dot gain compensation pose an interesting challenge. Since dot gain originates from the interaction between a specific ink and specific paper, compensating the original image for multilevel halftoning means expressing the dot gain of multiple inks in terms of the nominal coverage of a single ink. The applicability of the proposed multilevel halftoning workflow is demonstrated using multiple inks while avoiding dot-on-dot placement and accounting for dot gain. The results also show that the multilevel halftoned image is visually improved in terms of graininess and detailenhancement when compared to a bi-level halftoned image.

Computer Vision -- ECCV 2014-David Fleet 2014-08-14 The seven-volume set comprising LNCS volumes 8689-8695 constitutes the refereed proceedings of the 13th European Conference on Computer Vision, ECCV 2014, held in Zurich, Switzerland, in September 2014. The 363 revised papers presented were carefully reviewed and selected from 1444 submissions. The papers are organized in topical sections on tracking and activity recognition; recognition; learning and inference; structure from motion and feature matching; computational photography and low-level vision; vision; segmentation and saliency; context and 3D scenes; motion and 3D scene analysis; and poster sessions.

Introduction to Statistical Investigations-Nathan Tintle 2015-12-17 Introduction to Statistical Investigations leads students to learn about the process of conducting statistical investigations from data collection, to exploring data, to statistical inference, to drawing appropriate conclusions. The text is designed for a one-semester introductory statistics course. It focuses on genuine research studies, active learning, and effective use of technology. Simulations and randomization tests introduce statistical inference, yielding a strong conceptual foundation that bridges students to theory-based inference approaches. Repetition allows students to see the logic and scope of inference. This implementation follows the GAISE recommendations endorsed by the American Statistical Association.

Evolution-Joe Manganiello 2013-12-03 Joe Manganiello first gained recognition around the world for his incredible, sculpted body while winning both popular and critical praise as the star of HBO's True Blood. Now, from the man that Magic Mike director Steven Soderbergh called "walking CGI," comes the cutting-edge guide to achieving the perfect body and therefore enhancing your overall quality of life. With a build that men envy and women adore, Joe Manganiello is more than qualified to write the end-all guide to sculpting the perfect body. His fit physique catapulted him to the top of the list of Hollywood's most desired male actors following his memorable performances in HBO's hit show True Blood and in the 2012 film Magic Mike—and he will expand on that role in this summer's highly anticipated Magic Mike XXL. In Evolution, Manganiello shares his lifetime of experience and research in terms of diet, cardio, and anatomy to bring you the only fitness book you'll ever need in order to look and feel your best. Throughout the book are black-and-white photographs and Manganiello's step-by-step workout routine that combines weights, intense cardio, and a high protein diet. With a lifetime of athletic achievement behind him, Manganiello was named one of Men's Health's 100 Fittest Men of All Time alongside Arnold Schwarzenegger, Michael Jordan, Bo Jackson, Michael Phelps, Carl Lewis, and others. His Men's Fitness and Men's Health covers consistently rank among the top selling around the globe. In 2014, People magazine named him the Hottest Bachelor Alive, and he is one of the few actors to have ever graced the cover of the #1 selling body building magazine in the US, Muscle & Fitness, not once but twice (with a third on the way). "A comprehensive yet straightforward and effective roadmap to better health and fitness" (Shawn Perine, editor in chief of Muscle & Fitness), Evolution reveals exactly how to get the body of one of Hollywood's hottest stars—promising to turn any Average Joe into a Joe Manganiello!

A Deadly Affair-Tom Henderson 2014-03-25 A promising young attorney and a dedicated family man, Michael Fletcher seemed to have it all. But in the summer of 2000, Michael found himself standing trial for the murder of his pregnant wife, Leann. The verdict--guilty of second-degree murder--would leave friends, family, and the public at large scrambling to make sense of a twisted and frightening series of events that ended in the brutal killing of Leann Fletcher. What could possibly have led Michael Fletcher to commit such a gruesome act? As a college student, Michael Fletcher married the girl of his dreams after a three-year courtship. It seems like a fairy-tale romance come true: a match made in heaven. So why would a man with no history of domestic violence murder his

devoted wife right after he told her how much he loved her? Why would Michael shoot Leann in the back of the head, not only killing her but also the child that she was carrying inside her? According to prosecutors, Fletcher has been involved in an extramarital affair with a beautiful judge for two years. Was his relationship with respected District Judge Susan Chrzanowski enough cause for him to murder his wife in cold blood? Raising even more troubling questions, the startling discovery colored Leann's already shocking murder with shadings of sex, political scandal, and deadly betrayal.
