Drying Out Buildings-H.M.S.O. 1974 The aims in drying out a building are to bring it to a fit state to receive internal finishes and decoration and to avoid damage or disfigurement of work already done. This digest describes some ways of drying out and also methods of testing the condition of walls, floors and joinery. Although economic considerations will usually call for early completion and, hence, rapid drying, excessively fast drying will cause troubles.

Steamboat Disasters of the Lower Missouri River-Vicki Berger Erwin 2020-02-24 During the nineteenth century, more than three hundred boats met their end in the steamboat graveyard that was the Lower Missouri River, from Omaha to its mouth. Although derided as little more than an "orderly pile of kindling," steamboats were, in fact, technological marvels superbly adapted to the river's conditions. Their light superstructure and long, wide, flat hulls powered by high-pressure engines drew so little water that they could cruise on "a heavy dew" even when fully loaded. But these same characteristics made them susceptible to fires, explosions and snags—tree trunks ripped from the banks, hiding under the water's surface. Authors Vicki and James Erwin detail the perils that steamboats, their passengers and crews faced on every voyage.

Ethics and Management in the Public Sector-Alan Lawton 2013-05-02 Grappling with ethical issues is a daily challenge for those working in organizations that deliver public services. Such services are delivered through an often bewildering range of agencies and amidst this constant change, there are fears that a public service ethos, a tradition of working in the public interest, becomes blurred. Using extensive vignettes and case studies, Ethics and Management in the Public Sector illuminates the practical decisions made by public officials. The book takes a universal approach to ethics reflecting the world-wide impact of public service reforms and also includes discussions on how these reforms impact traditional values and principles of public services. This easy-to-use textbook is a definitive guide for postgraduate students of public sector ethics, as well as students of public management and administration more generally.

A Fair Penitent-Wilkie Collins 2016-04-01 This early work by Wilkie Collins was originally published in 1857. Born in Marylebone, London in 1824, Collins' family enrolled him at the Maida Hill Academy in 1835, but then took him to France and Italy with them between 1836 and 1838. Returning to England, Collins attended Cole's boarding school, and completed his education in 1841, after which he was apprenticed to the tea merchants Antrobus & Co. in the Strand. In 1846, Collins became a law student at Lincoln's Inn, and was called to the bar in 1851, although he never practiced. It was in 1848, a year after the death of his father, that he published his first book, The Memoirs of the Life of William Collins, Esq., R.A., to good reviews. The 1860s saw Collins' creative high-point, and it was during this decade that he achieved fame and critical acclaim, with his four major novels, The Woman in White (1860), No Name (1862), Armadale (1866) and The Moonstone (1868). The Moonstone, meanwhile is seen by many as the first true detective novel - T. S. Eliot called it "the first, the longest, and the best of modern English detective novels...in a genre invented by Collins and not by Poe." Many of the earliest books, particularly those dating back to the 1900's and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions.

The Final Leap-John Bateson 2012-04-18 The Golden Gate Bridge is one of the most beautiful and most photographed structures in the world. It's also the most deadly. Since it opened in 1937, more than 1,500 people have died jumping off the bridge, making it the top suicide site on earth. It's also the only international landmark without a suicide barrier. Weaving drama, tragedy, and politics against the backdrop of a world-famous city, The Final Leap is the first book ever written about Golden Gate Bridge suicides. John Bateson leads us on a fascinating journey that uncovers the reasons for the design decision that led to so many deaths, provides insight into the phenomenon of suicide, and examines arguments for and against a suicide barrier. He tells the stories of those who have died, the few who have survived, and those who have been affected—from loving families to the Coast Guard, from the coroner to suicide prevention advocates.

Studying Educational and Social Policy-Ronald H. Heck 2004-07-19 The overall purpose of this text is to introduce beginning researchers to the study of educational and social policy, how it has been examined from a scholarly perspective, and the salient issues to consider in conceptualizing and conducting policy research. The emphasis is on "introduce," as the various policy fields within the public sector (for example, education, energy, health, labor) are much too diverse to include in depth in a single volume on theoretical concepts and research methods. The focus is not so much on the substance of policymaking as on understanding the interplay between how policy is made and implemented and the various conceptual approaches and methods researchers can use to frame and conduct policy studies. The underlying assumption is that a critique of the substantive, theoretical, and methodological issues involved in studying policy can help researchers conduct policy studies that are more informative in guiding policy development and more effective in assessing the impact of policy reforms. \*Part I acquaints readers with substantive issues and challenges related to the study of the policy process, and includes chapters on federalism and policymaking, and on studying policy development, implementation, and impact. \*Part II examines different conceptual frameworks and theories for the study of policy, with chapters on political culture and policymaking, the punctuated-equilibrium theory and the advocacy coalition framework, economic and organizational perspectives, and new approaches (e.g., feminism, critical theory, postmodernism). \*Part III focuses research methods for studying policy, covering research design, qualitative methods, multilevel methods for policy research, and growth modeling methods for examining policy change. \*Part IV compares the diversity of approaches used by policy scholars with respect to their strengths and weaknesses, and presents a number of issues for further consideration in conducting policy research. This introduction to theories and methods of conducting policy research is intended to give prospective researchers an appreciation of the relationship among policy problems, empirical methods, and practice, and to contribute to building their skills in conceptualizing and conducting policy research that answers important questions. The text includes examples of studies to illustrate the diversity of methodological techniques, and discusses issues related to the design and conduct of original educational policy studies. Studying Educational and Social Policy: Theoretical Concepts and Research Methods is designed primarily for graduate courses in educational policy and educational research and is appropriate as well for research methodology courses in other disciplines, including statistics and research methodology in the social sciences, organizational studies, public policy, and political science
