The Cambridge Companion to Keats-Susan J. Wolfson 2001-05-10 In The Cambridge Companion to Keats, leading scholars discuss Keats's work in several fascinating contexts: literary history and key predecessors; Keats's life in London's intellectual, aesthetic and literary culture and the relation of his poetry to the visual arts. These specially commissioned essays are sophisticated but accessible, challenging but lucid, and are complemented by an introduction to Keats's life, a chronology, a list of contemporary people and periodicals, a source reference for famous phrases and ideas articulated in Keats's letters, a glossary of literary terms and a guide to further reading.

Mobile Web 2.0-Syed A. Ahson 2010-12-07 From basic concepts to research grade material, Mobile Web 2.0: Developing and Delivering Services to Mobile Devices provides complete and up-to-date coverage of the range of technical topics related to Mobile Web 2.0. It brings together the work of 51 pioneering experts from around the world who identify the major challenges in Mobile Web 2.0 applications and provide authoritative insight into many of their own innovations and advances in the field. To help you address contemporary challenges, the text details a conceptual framework that provides modeling facilities for context-aware, multi-channel Web applications. It compares various platforms for developing mobile services—from the developer and user perspectives—and explains how to use high-level modeling constructs to drive the application development process through automatic code generation. Proposes an expanded model of mobile application context Explores mobile social software as an Information and Communications Technology (ICT) Discusses the effect of context on mobile usability Through empirical study, the book tests a number of hypotheses on the use of software implementation technology and location context in mobile applications. It introduces Reusable End-User Customization (REUC)—a technique that allows users to adapt the layout of Web pages and automatically reapplies those preferences on subsequent visits. It also investigates the need for non-visual feedback with long system response times, particularly when downloading Web pages to mobile devices.

Fabric of Life - Textile Arts in Bhutan-Karin Altmann 2015-11-27 This extensive work dedicated to the unique textile art of Bhutan is an impressive illustration of how closely art, spirituality, and life are interwoven in the last of the Buddhist kingdoms in the Himalayas. It gives new insight into Bhutanese cosmology, worldview, culture, and society, which is associated with a variety of historical, philosophical, religious, social, and artistic perspectives. The remote mountain location, low-key foreign policy, and basic principles of Buddhism has made it possible for Bhutan, the last of the Buddhist kingdoms in the Himalayas, to preserve a remarkable form of textile art that is interwoven with all aspects of life. Karin Altmann shows us Bhutan textiles in their diversity: they are clothes and everyday objects, currency and commodity, mark important events as gifts during life, and are testament to the social status of a person. But they are also an integral aspect of religious festivals, dances, and rituals that provide insight into the mystical and religious beliefs of the Bhutanese people, and reflect the concept of gender in Bhutanese society. The book also tells the story of a country that is searching for a sensitive balance between tradition and progress in a globalized world.

An Essay at Removing National Prejudices Against a Union with Scotland-Daniel Defoe 1706

Eager-Helen Fox 2008-12-18 It's the end of the 21st century where technocrats rule and robots take care of humans' every need. Your house watches you, knows your secrets, and talks to you. And your closest friend can be—a machine? Gavin Bell and his teenage sister Fleur come from a middle-class family. Their much-loved, old-fashioned robot, Grumps, is running down and can't be repaired, so a scientist friend loans them EGR3, an experimental new robot to help Grumps. EGR3, known as Eager, learns from his experiences, as a child would. He feels emotions—wonder, excitement, and loss. When the ultra high-tech, eerily human BDC4 robots begin to behave suspiciously, Eager and the Bells are drawn into a great adventure that is sometimes dark and often humorous. As Eager's extraordinary abilities are tested to the limit, he will try to find the answer to this question: What does it mean to be alive? From the Hardcover edition.

Getting Over the X-Steve Brookstein 2014-10-31 It was the stuff dreams were made of. It became the ultimate nightmare. Being the first winner of the X Factor in 2004, Steve Brookstein should have had it all. Instead, he tells a story of a man sold down the river by his own record label as they championed the runner-up, G4, and forced him into an album of cover songs. This is the story of what really happened, from vicious personal attacks by Sharon Osborne and Louis Walsh to threats from Max Clifford about going public. A decade on, and Max Clifford is inside and severely discredited. So, too was Andy Coulson, an editor who ran many of the untrue stories about Steve. He has been dubbed a pub singer, a fake, a flop and bitter as the narrative that begun on the show became adopted by journalists who thought he was fair game, frequently reviewing gigs that they hadn't been to or inventing quotes he hadn't said, and always regulated by a toothless Press Complaints Commission. Ten years on, Steve is now able to lift the lid on the show itself and analyse for the first time exactly what Max Clifford said when he rang to say, 'Talk to the press and we'll bury you.'

Born to Dance-Jordan Matter 2018-10-16 A New York Times bestseller! "In Jordan Matter's photos, dancers make all the world their stage." —New York Times From Jordan Matter, YouTube star and New York Times bestselling author of Dancers Among Us, a celebration of what it means to be young and full of possibility, featuring gorgeous photographs of well-known dancers (including Tate McRae and Sofie Dossi) as well as stars in the making. Jordan Matter is

known to millions for his 10 Minute Photo Challenge YouTube videos. Now, in one dazzling photograph after another, he portrays dancers—ages 2 through 18—in ordinary and extraordinary pursuits, from hanging with friends to taking selfies, from leaping for joy to feeling left out. The subjects include TV and internet stars like Chloé Lukasiak, Kalani Hilliker, Nia Sioux, and Kendall Vertes, as well as boys and girls from around the neighborhood. What they all share is the skill to elevate their hopes and dreams with beauty, humor, grace, and surprise. Paired with empowering words from the dancers themselves, the photographs convey each child's declaration that they were born to dance. Bonus Features: Scan the QR code next to dozens of photos and watch behind-the-scenes videos documenting the shoots. "Breathtaking photos to free your imagination." —Diane Sawyer, ABC World News "When you take the natural grace of dancers and put them in unexpected places, you get photos that really tell a story." —Fox News

Russian Learners' Dictionary-Nicholas Brown 2013-09-05 This dictionary contains 10,000 Russian words in order of importance starting with the most common and finishing with words that occur about 8 times in a million. All the words have English translations, many have examples of usage and the entries include information on stress and grammatical irregularities. There is also a complete alphabetical index to the words in the list. A learner who knows all or most of these 10,000 words can be regarded as competent in Russian for all normal purposes. The list takes you from a beginner's core vocabulary through to postgraduate level.

Quantum and Non-Commutative Analysis-Huzihiro Araki 1993-11-30 In the past decade, there has been a sudden and vigorous development in a number of research areas in mathematics and mathematical physics, such as theory of operator algebras, knot theory, theory of manifolds, infinite dimensional Lie algebras and quantum groups (as a new topics), etc. on the side of mathematics, quantum field theory and statistical mechanics on the side of mathematical physics. The new development is characterized by very strong relations and interactions between different research areas which were hitherto considered as remotely related. Focussing on these new developments in mathematical physics and theory of operator algebras, the International Oji Seminar on Quantum Analysis was held at the Kansai Seminar House, Kyoto, JAPAN during June 25-29, 1992 by a generous sponsorship of the Japan Society for the Promotion of Science and the Fujihara Foundation of Science, as a workshop of relatively small number of (about 50) invited participants. This was followed by an open Symposium at RIMS, described below by its organizer, A. Kishimoto. The Oji Seminar began with two key-note addresses, one by V.F.R. Jones on Spin Models in Knot Theory and von Neumann Algebras and by A. Jaffe on Where Quantum Field Theory Has Led. Subsequently topics such as Subfactors and Sector Theory, Solvable Models of Statistical Mechanics, Quantum Field Theory, Quantum Groups, and Renormalization Group Approach, are discussed. Towards the end, a panel discussion on Where Should Quantum Analysis Go? was held.

Managing Quality Service in Hospitality-Robert C. Ford 2012 MANAGING QUALITY SERVICE IN HOSPITALITY: HOW ORGANIZATIONS ACHIEVE EXCELLENCE IN THE GUEST EXPERIENCE, International Edition teaches the concept of treating customers as guests and creating a "WOW" experience for them. Many other texts in this subject area skip over guest-focused service strategy in hospitality or service This text fully covers the topic of managing hospitality organizations by using academic studies and real life experience from companies like Walt Disney Company, Marriott, Ritz-Carlton, Darden Restaurants, Southwest Airlines and many others. The text is written in three sections: strategy, staffing, and systems. Each chapter includes at suggested hospitality activities for students, in which students are encouraged to visit local organizations to talk with guests, employees and managers to obtain a variety of perspectives on the guest experience. Other activities will have students going to the internet to visit established sites for hospitality organizations. Real and hypothetical hotels, restaurants, and other business types found in the hospitality industry are included as case studies giving the opportunity for discussion of

hospitality concepts and principles. "Ethics in Business" segments encourage students to analyze ethical issues associated with chapter topics. Each chapter opens with learning objectives and discussion questions at the end. The included Instructor's Guide provides answers to the end-of-chapter questions and to the discussion questions following the chapter cases, additional field exercises in hospitality, true-false and multiple-choice quizzes, and additional material to assist the instructor in preparing course outlines and lesson plans, providing the best known about managing hospitality organizations big or small.

Greek and Roman Coins in the Athenian Agora-Fred S. Kleiner 1975 Over 75,000 coins have been found during excavations at the Agora, many minted in the city but others brought from Athens's far-flung commercial contacts. In addition to the mostly bronze and copper coins themselves, a building that may have served as the Athenian mint is described in this booklet. After describing the physical techniques of production, the author takes a chronological approach and includes numerous black and white photographs, making this concise guide a useful aid to the identification of lower-value Greek and Roman coinage.

Fundamentals of Space Systems-Vincent L. Pisacane 2005 Fundamentals of Space Systems was developed to satisfy two objectives: the first is to provide a text suitable for use in an advanced undergraduate or beginning graduate course in both space systems engineering and space system design. The second is to be a primer and reference book for space professionals wishing to broaden their capabilities to develop, manage the development, or operate space systems. The authors of the individual chapters are practicing engineers that have had extensive experience in developing sophisticated experimental and operational spacecraft systems in addition to having experience teaching the subject material. The text presents the fundamentals of all the subsystems of a spacecraft missions and includes illustrative examples drawn from actual experience to enhance the learning experience. It includes a chapter on each of the relevant major disciplines and subsystems including space systems engineering, space environment, astrodynamics, propulsion and flight mechanics, attitude determination and control, power systems, thermal control, configuration management and structures, communications, command and telemetry, data processing, embedded flight software, survivability and reliability, integration and test, mission operations, and the initial conceptual design of a typical small spacecraft mission.
