Understanding Urbanisation in Northeast India-M. Amarjeet Singh 2020-04-07 This volume explores the dynamics of urbanisation in Northeast India. It discusses the impact of the process of urbanisation on the environment, infrastructure and socio-economic conditions of the region. The chapters in the book: Examine various challenges and opportunities of urbanisation, such as frontier urbanism, urban congestion, smart cities, vernacular architecture, urban water and waste management, cross-border migration and ethnicity. Draw attention to critical issues that have massively disturbed the urban landscape including deterioration of water quality, seismic activity and air pollution. Give alternatives that could present possible solutions to the problems afflicting this region. Drawing on case studies rooted in extensive fieldwork, this book will be indispensable to researchers and students of urban studies, human geography, development economics, cultural studies and South Asian studies. It will also be of interest to policy-makers, government representatives and town planners.

From Dust to Digital-Maja Kominko 2015-02-16 Much of world's documentary heritage rests in vulnerable, little-known and often inaccessible archives. Many of these archives preserve information that may cast new light on historical phenomena and lead to their reinterpretation. But such rich collections are often at risk of being lost before the history they capture is recorded. This volume celebrates the tenth anniversary of the Endangered Archives Programme at the British Library, established to document and publish online formerly inaccessible and neglected archives from across the globe. From Dust to Digital showcases the historical significance of the collections identified, catalogued and digitised through the Programme, bringing together articles on 19 of the 244 projects supported since its inception. These contributions demonstrate the range of materials documented — including rock inscriptions, manuscripts, archival records, newspapers, photographs and sound archives — and the wide geographical scope of the Programme. Many of the documents are published here for the first time, illustrating the potential these collections have to further our understanding of history.

New Trends in Urban Planning-Dan Soen 2013-10-22 New Trends in Urban Planning: Studies in Housing, Urban Design and Planning presents the trends in urban planning with a wide array of theory and practice in various countries. This book deals with the overall problems facing urban planners in their striving at an enhanced quality of life in human settlements. Organized into seven panels encompassing 29 chapters, this book begins with an overview of the planning aspects of a general nature. This text then highlights some of the important trends in the recent change of focus due to the view that the settlement is a better contemporary definition than urban planning. Other chapters consider that the theory and practice of urban planning is found to be inadequate for the purpose of remedying deficiencies in urban areas. The final chapter deals with the specific developments that are taking place in Israel and elsewhere. This book is a valuable resource for teachers, practitioners, researchers, administrators, and politicians.

Ecological Networks and Greenways-Rob H. G. Jongman 2004-07 The establishment of ecological networks in Europe and greenways in America has required some of the most advanced applications of the principles of landscape ecology to land use planning. This book provides a thorough overview of recent developments in this emerging field, combining theoretical concepts of landscape ecology with the actual practice of landscape planning and management. In addition to biological and physical considerations important to biodiversity protection and restoration, equal weight is given to cultural and aesthetic issues to illustrate how sympathetic, sustainable land use policies can be implemented. Examples are given for large scale areas (Estonia and Florida) as well as regional areas such as Milano, Chicago and the Argentinian Yungas. This invaluable book will provide a wealth of information for all those concerned with biodiversity conservation through networks and greenways and their relevance to the planning process, whether researcher, land manager or policy maker.
