Engines for Education-Roger C. Schank 1995 Most six-year-olds can't wait to go to school on that first day in September. It's a sign of coming of age. They get to go to school like the big kids. For an alarmingly large number of these children, however, boredom, anxiety, and fear of learning quickly set in. This happens because societies build schools that achieve much less than they promise, are frustrating for students, and generally fail to help children become adults who can think for themselves. The development of flexible, inquiring minds has rarely been the primary consideration in the design of educational systems. Making students into proper members of society has usually been of much greater concern than developing students who are creative thinkers. Today's schools are organized around yesterday's ideas, needs, and resources. The purpose of this volume is to raise consciousness about the changes needed in the educational system. It is concerned with what is wrong with the educational system and how to improve it. It presents a pragmatic view of what education could be through the use of computer technology -- technology permitting us to pursue the radical notion that children must be allowed to guide their own education because interested learners learn more. Children can and will become voracious learners if they are in charge of their own education. This does not mean letting them play video games all day, but it does mean allowing them to pursue the intellectual goals that interest them, rather than being force-fed knowledge according to someone else's schedule. The school system must face the responsibility of creating learning environments that are so much fun that children cannot wait to get up in the morning and go to school. This volume describes the progress being made at The Institute for the Learning Sciences using computers to provide motivating environments for learning -- environments that enable students to explore new worlds, and learn things by doing them. This technology will allow society to support what is one of the most important parts of a good educational system: the cultivation of individual initiative in students. This text documents the authors' work from the cognitive psychology which underlies it on through to guided tours of a number of the software learning environments they've developed. The CD ROM version of Engines for Education illustrates the types of innovative education software being developed at the Institute for the Learning Sciences at Northwestern University. In addition to providing tours of seven different ILS programs, the CD ROM itself provides an example of a new form of hypermedia system developed at ILS. Containing the complete text of the book with full-text search, the CD ROM enables readers to move fluidly between pages as they would with a traditional book; it also engages the reader through question-answer interactions with the system. Hardware Requirements: Macintosh (not a Macintosh Power PC) with 16M of RAM (13M of free RAM) and a CD ROM Drive. Software Requirements: System 7 (or later version) and Quicktime.

Mere Education-Mark A Pike 2013-09-26 The word 'mere' is used in the title of this book in its Middle English sense as an adjective 'nothing less than, complete'. This book is about schooling for a fair and vibrant society; it is about an education of hope, education that completes a person. In 'The Magician's Nephew' (1955), the first in C.S. Lewis' Chronicles of Narnia series, Digory and Polly are dragged back through time into a world that is

Crisis in the Muslim Mind-AbdulHamid AbuSulayman 2004-01-01 Across the Muslim world today, if anything is self-evident across the Muslim world today it is that the Ummah is badly in need of reform. On this point it can be stated with confidence that Muslims are agreed. Poverty and injustice characterize the face of Muslim lands from the Atlantic to the Pacific. Pollution and corruption are the order of the day in the societies where the gulf between them and the developed countries of the world has never been wider. Politics in the Muslim world are all too often the politics of deprivation, and culture the culture of despair. "Crisis in the Muslim Mind" examines the intellectual and historical roots of the malaise that has encompassed the Ummah and threatens to efface its identity. First published in Arabic in 1991, this important work (in an abridged English translation) is designed to familiarize educated and concerned Muslims with the nature of the crisis confronting them, and to suggest the steps necessary to overcome it.

The Ghana Reader-Kwasi Konadu 2016-01-29 Covering 500 years of Ghana's history, The Ghana Reader provides a multitude of historical, political, and cultural perspectives on this iconic African nation. Whether discussing the Asante kingdom and the Gold Coast's importance to European commerce and transatlantic slaving, Ghana's brief period under British colonial rule, or the emergence of its modern democracy, the volume's eighty selections emphasize Ghana's enormous symbolic and pragmatic value to global relations. They also demonstrate that the path to fully understanding Ghana requires acknowledging its ethnic and cultural diversity and listening to its population's varied voices. Readers will encounter selections written by everyone from farmers, traders, and the clergy to intellectuals, politicians, musicians, and foreign travelers. With sources including historical documents, poems, treaties, articles, and fiction, The Ghana Reader conveys the multiple and intersecting histories of Ghana's development as a nation, its key contribution to the formation of the African diaspora, and its increasingly important role in the economy and politics of the twenty-first century.

Optimal Sampled-Data Control Systems-Tongwen Chen 2012-12-06 Among the many techniques for designing linear multivariable analogue controllers, the two most popular optimal ones are H<sub>2</sub> and H<sub>∞</sub> optimization. The fact that most new industrial controllers are digital provides strong motivation for adapting or

extending these techniques to digital control systems. This book, now available as a corrected reprint, attempts to do so. Part I presents two indirect methods of sampled-data controller design: These approaches include approximations to a real problem, which involves an analogue plant, continuous-time performance specifications, and a sampled-data controller. Part II proposes a direct attack in the continuous-time domain, where sampled-data systems are time-varying. The findings are presented in forms that can readily be programmed in, e.g., MATLAB.

Chieftaincy in Ghana-Irene K. Odotei 2006 Chieftaincy is one of the most enduring traditional institutions in Ghana, which has displayed remarkable resilience from pre-colonial through colonial to postcolonial times. In the past, the role of a chief was to lead his people in war to defend, protect and extend their territories. The modern role is to combat poverty and other social ills: illiteracy, ignorance, environmental degradation, and the depletion of resources. Nowadays, chiefs are under pressure to achieve good governance in their traditional areas. They are challenged to integrate tradition and modernity, a process about which there is considerable debate. They carry out their duties in an increasingly globalised world where the accent is on democracy, human rights, health delivery, employment, human development and regional integration. Their ability to come to terms with these challenges will provide an indication of their relevance and the relevance of the institution to Ghana's long-term development. This massive volume is arguably the most comprehensive and detailed scholarly study of the institution of chieftaincy to appear on the subject to date. The subjects and approaches are wide-ranging, and cover most aspects of the institution in every geographical area in Ghana. Some thirty contributors from the humanities and social sciences tell the story of chieftaincy past and present from a multitude of perspectives: anthropological, historical, economic, sociological, gender, literary, religious and philosophical.

Steel's Edge-Ilona Andrews 2012-11-27 The Edge lies between worlds, on the border between the Broken, where people shop at Wal-Mart and magic is a fairy tale—and the Weird, where blueblood aristocrats rule, changelings roam, and the strength of your magic can change your destiny... Charlotte de Ney is as noble as they come, a blueblood straight out of the Weird. But even though she possesses rare magical healing abilities, her life has brought her nothing but pain. After her marriage crumbles, she flees to the Edge to build a new home for herself. Until Richard Mar is brought to her for treatment, and Charlotte's life is turned upside down once again. Richard is a swordsman without peer, future head of his large and rambunctious Edger clan—and he's on a clandestine quest to wipe out slavers trafficking humans in the Weird. So when his presence leads his very dangerous enemies to Charlotte, she vows to help Richard destroy them. The slavers' operation, however, goes deeper than Richard knows, and even working together, Charlotte and Richard may not survive...

An Introductory History of Education-D. N. Sifuna 2006 This book makes a survey of the development of educational theory and practice in the western world up to the twentieth century. A number of educational systems are selected for discussion. There is reference to prehistoric, ancient Egyptian, Indian, Chinese and Hebraic education, all of which have had an important impact on Greek education, Hellenistic education ideals in the Roman Empire, medieval education and the rise of universities. The book gives due consideration to African indigenous education; developments in education in Africa within the colonial context; and post independence educational activities in Africa. The historical context of educational events in Kenya is duly highlighted, leading to the era of the 8-4-4 system of education. A chapter in Islamic Education in Africa is also included with a discussion on the Integration of Islamic and Western Education.
