Step-by-step guidelines walk readers through the process, and new Behind the Scenes boxes provide unprecedented insight into the new subtests and the test development process. The book highlights common errors and complex aspects so readers can avoid them, and includes illustrative case studies based on data collected during the scale's standardization to assist in proper administration and interpretation. The companion CD provides software that automates score interpretation, and supplies users with tools to enhance WPPSI-IV administration and report writing. Used to evaluate for learning or intellectual disabilities, developmental or language delays, or gifted and talented classification, the Wechsler Preschool and Primary Scale of Intelligence is the most widely used assessment of intelligence for young children. Essentials of WPPSI-IV Assessment applies an interpretive approach that allows flexibility in response to the real constraints and challenges inherent in working with children, describing performance in both normative and interpersonal contexts to facilitate interpretive case formulations from multiple theoretical and clinical perspectives. Topics include: WPPSI-IV administration and clinical applications Scoring, score analysis, and interpretation Strengths and weaknesses of the WPPSI-IV Differences across demographic groups The book and accompanying CD also provide alternatives for situations in which published comparison scores may not be available or applicable to a particular child, and supplies composite scores aimed at facilitating WPPSI-IV interpretation from a variety of theoretical approaches. Those who employ the WPPSI-IV must have a thorough grasp of the full potential of the tool, and Essentials of WPPSI-IV Assessment contains the insight and information that allow for deeper understanding.</div> <div>Dialectics of Nature-Frederick Engels 2012-06 This is a new edition of Engels' main work on Marxist theory.</div> <div>Lectura y vida- 1987</div> <div>Las transformaciones de la educación en diez años de democracia-Guillermina Tiramonti 1995</div> <div>Biology-Eldra P. Solomon 1999-07-01</div> <div>White on Black-Jan Nederveen Pieterse 1992-01-01 White on Black is a compelling visual history of the development of European and American stereotypes of black people over the last two hundred years. Its purpose is to show the pervasiveness of prejudice against blacks throughout the western world as expressed in stock-in-trade racist imagery and caricature. Reproducing a wide range of illustrations--from engravings and lithographs to advertisements, candy wrappings, biscuit tins, dolls, posters, and comic strips--the book challenges the hidden assumptions of even those who view themselves as unprejudiced. Jan Nederveen Pieterse sets Western images of Africa and blacks in a chronological framework, including representations from medieval times, from the colonial period with its explorers, settlers, and missionaries, from the era of slavery and abolition, and from the multicultural societies of the present day. Pieterse shows that blacks have been routinely depicted throughout the West as servants, entertainers, and athletes, and that particular countries have developed their own comforting black stereotypes about blacks: Sambo and Uncle Tom in the United States, Golliwog in Britain, Bamboula in France, and Black Peter in the Netherlands. Looking at conventional portrayals of blacks in the nursery, in sexual arenas, and in commerce and advertising, Pieterse analyzes the conceptual roots of the stereotypes about them. The images that he presents have a direct and dramatic impact, and they raise questions about the expression of power within popular culture and the force of caricature, humor, and parody as instruments of oppression.</div> <div>The Presented Past-B. L. Molyneaux 2003-09-02 The Presented Past is concerned with the differences between the comparatively static, well-understood way in which the past is presented in schools, museums and at historic sites compared to the approaches currently being explored in contemporary archaeology. It challenges the all-too-frequent representation of the past as something finished, understood and objective, rather than something that is `constructed' and therefore open to co-existing interpretations and constant re-interpretation. Central to the book is the belief that the presentation of the past in school curricula and in museum and site interpretations will benefit from a greater use of non-documentary sources derived from archaeological study and oral histories. The book suggests that a view of the past incorporating a larger body of evidence and a wider variety of understanding will help to invigorate the way history is taught. The Presented Past will be of interest to teachers, archaeologists, cultural resource managers, in fact anyone who is concerned with how the past is presented.</div> <div>An Elephantasy-María Elena Walsh 2016-08</div> <div>The Origin of Life-Aleksandr Ivanovich Oparin 2003 This classic of biochemistry offered the first detailed exposition of the theory that living tissue was preceded upon Earth by a long and gradual evolution of nitrogen and carbon compounds. "Easily the most scholarly authority on the question...it will be a landmark for discussion for a long time to come." — New York Times.</div>
