Transnational Library Relations-Madhukar Bhimrao Konnur 1990

Colon Classification, 7th Edition-Mohinder Partap Satija 1989

Encyclopedia of Library and Information Science-Allen Kent 1971-07-01 "The Encyclopedia of Library and Information Science provides an outstanding resource in 33 published volumes with 2 helpful indexes. This thorough reference set--written by 1300 eminent, international experts--offers librarians, information/computer scientists, bibliographers, documentalists, systems analysts, and students, convenient access to the techniques and tools of both library and information science. Impeccably researched, cross referenced, alphabetized by subject, and generously illustrated, the Encyclopedia of Library and Information Science integrates the essential theoretical and practical information accumulating in this rapidly growing field."

Cataloging and Classification-Lois Mai Chan 2007 Discusses cataloging rules, subject analysis and headings, classification systems, bibliographic utilities, and MARC formats.

Colon Classification-Sewa Singh 1992

Indexing and Classification-Winifred F. Desmond 1966

Colon Classification, 7th Edition-Mohinder Partap Satija 1989

Prolegomena to Library Classification-S. R. Ranganathan 2006-04 Works of Dr. Shiyali Ramamrita Ranganathan (S.R. Ranganathan) need no introduction. They are renowned not because they cover certain facet of library and information science, but because they have been written by the father of library science in india, Dr. Ranganathan. These library science classics have been reprinted to make Dr. Ranganathan's work available to the current generation of librarians and for those to come. The ideas contained in this book form the foundation of subject classification and the book is S.R. Ranganathanâ??s magnum opus in that field. â??A most precise, theoretical, practical, and comparative exposition of library classification theory ... intensely original. It is not within my space here to say in what ways it over-rode many of the obstacles to real understanding of the art of analyzing and assembling books; that the student will discover by the rewarding study of the book itselfâ? (In Preface to edition 2 by W.C. Berwick Sayers). In the present digital age, Ranganathanâ??s ideas on subject classification provide guidelines for the organization of knowledge in whatever medium, including digital, audio, video forms and the www, that knowledge may be embodied . â??... in homage to Ranganathan, I believe he, more than any other scholar of our discipline, has striven to establish classification upon a scientific foundation.â? (Dr. Elaine Svenonius, former Professor, UCLA, in Libri, v.42, No. 3 (1992); p. 176)

AJCC Cancer Staging Manual-Frederick L. Greene 2013-11-21 The American Joint Committee on Cancer's Cancer Staging Manual is used by physicians throughout the world to diagnose cancer and determine the extent to which cancer has progressed. All of the TNM staging information included in this Sixth Edition is uniform between the AJCC (American Joint Committee on Cancer) and the UICC (International Union Against Cancer). In addition to the information found in the Handbook, the Manual provides standardized data forms for each anatomic site, which can be utilized as permanent patient records, enabling clinicians and cancer research scientists to maintain consistency in evaluating the efficacy of diagnosis and treatment. The CD-ROM packaged with each Manual contains printable copies of each of the book's 45 Staging Forms.

Dewey Decimal Classification, Universal Decimal Classification, and Colon Classification-Abdul Majid Baba 1988

Colon Classification: Schedules for classification-Shiyali Ramamrita Ranganathan 1987

International Classification of Diseases for Oncology-World Health Organization Staff 2000 This edition of ICD-O, the standard tool for coding diagnoses of neoplasms in tumour and cancer registrars and in pathology laboratories, has been developed by a working party convened by the International Agency for Research on Cancer / WHO. ICD-O is a dual classification with coding systems for both topography and morphology. The book has five main sections. The first provides general instructions for using the coding systems and gives rules for their implementation in tumour registries and pathology laboratories. Section two includes the numerical list of topography codes, which remain unchanged from the previous edition. The numerical list of morphology codes is presented in the next section, which introduces several new terms and includes considerable revisions of the non-Hodgkin lymphoma and leukaemia sections, based on the WHO Classification of Hematopoietic and Lymphoid Diseases. The five-digit morphology codes allow identification of a tumour or cell type by histology, behaviour, and grade. Revisions in the morphology section were made in consultation with a large number of experts and were finalised after field-testing in cancer registries around the world. The alphabetical index gives codes for both topography and morphology and includes selected tumour-like lesions and conditions. A guide to differences in morphology codes between the second and third editions is provided in the final section, which includes lists of all new code numbers, new terms and synonyms added to existing code definitions, terms that changed morphology code, terms for conditions now considered malignant, deleted terms, and terms that changed behaviour code.

Library Manual, 4th Edition-Kumar Krishan 1996 The book contains catalogue entries prepared according to S. R. Ranganathan's classified catalogue code (5th Edition) and Anglo-American cataloguing rules (AACR1 and AACR2), Class numbers prepared according to Colon classification (6th Edition) and Dewey decimal classification (19th Edition) has also been provided. During recent years library science has become a vast and specialized field of study using a technical terminology. With the above point in view, this book has been especially written to meet the requirements of semi-professionals undergoing short-term training. This will serve as an introductory work for students preparing for their library science/information science/documentation diplomas and degrees. Librarians working for small libraries will also benefit equally from it.

Colon Classification-Gopal Das Bhargava 1975

International Classification- 1992 Journal on theory and practice of universal and special classification systems and thesauri.

Decimal, Universal Decimal & Colon Classification-Addepali Appala Narasimha Raju 1984

Classified Catalogue Code-S. R. Ranganathan 2006-08 The works of the renowned Dr. Shiyali Ramamrita Ranganathan â?? considered the father of library science in India â?? cover certain facets of library and information science. These library science classics â?? reprinted by Ess Ess Publications â?? make Dr. S.R. Ranganathan's work available to the current generation of librarians.

Library Administration-S. R. Ranganathan 2006-08 Works of Dr. Shiyali Ramamrita Ranganathan (S.R. Ranganathan) need no introduction. They are renowned not because they cover certain facet of library and information science, but because they have been written by the father of library science in india, Dr. Ranganathan. These library science classics have been reprinted to make Dr. Ranganathan's work available to the current generation of librarians and for those to come. The book is a remarkable illustration of the application of systems analysis, study of work flow, and time and motion study to libraries. It also illustrates the need for the library manager and management to pay attention to the minutiae of library work and at the same to have a holistic view of library's functions. It is only very appropriate that Ranganathan provides an extract from the 'Mother' (page 66-72) by the mystic Shri Aurobindo to support this holistic approach to library administration.
