Dinh 2013-07-18 This book argues that light manufacturing is appropriate for a resource-based country like Zambia. While Zambia's recent growth has been impressive, it has not been accompanied with adequate job creation. Long-term job creation in copper production is very small; links to the rest of the economy tend to be weak as well. Besides, the development of natural resources tends to discourage job-creating sectors such as manufacturing. To be sustainable and to create productive employment for its people, growth needs to be accompanied by structural transformation. Such transformation entails a growing share of manufacturing output in the economy. In the past, Zambia's efforts to promote and facilitate industrial growth have not been very successful. Policy regimes swung from one extreme to another. In the 1980s, Zambia put complete control of the industrial sector in the hands of the state. When this model proved unsuccessful, policy shifted in the opposite direction in the 1990s, and all earlier government interventions were lifted. Neither extreme led to sustained growth of manufacturing. This book suggests an alternative: directing government policies toward removing constraints in a few of the most promising light manufacturing sectors using practical and innovative solutions inspired by the fast-growing Asian economies whose starting point 20 years ago was not very different from Zambia's today. This book has several innovative features. First, it provides in-depth cost comparisons between Zambia and four other countries in Asia and Africa at sector and product levels. Second, the book uses a wide array of quantitative and qualitative techniques to identify key constraints to enterprises and to evaluate differences in the performance of firms across countries. Third, it uses a focused approach to identify country- and industry- specific constraints. It proposes market based measures and selected government intervention to ease these constraints. Fourth, it highlights the interconnectedness of constraints and solutions. For example, solving the manufacturing input problem requires actions in agriculture, education, and infrastructure. The book shows that Zambia has the potential to become regionally competitive in several light manufacturing subsectors by leveraging its comparative advantage in natural resource industries such as agriculture, livestock, and forestry. Interventions include both the provision of public goods and the removal of existing policy distortions in the economy. Growing production of light manufacturing goods would allow Zambia to capture more value from its raw materials and create more jobs. Performance of Manufacturing Firms in Africa-Hinh T. Dinh 2012-02-23 This book argues that light manufacturing can offer a viable solution for Sub-Saharan Africa, given potential competitiveness based on low wage costs and an abundance of natural resources that supply raw materials needed for industries. World Development Report 2013-World Bank 2012-10-15 Jobs provide higher earnings and better benefits as countries grow, but they are also a driver of development. Poverty falls as people work their way out of hardship and as jobs empowering women lead to greater investments in children. Efficiency increases as workers get better at what they do, as more productive jobs appear, and less productive ones disappear. Societies flourish as jobs bring together people from different ethnic and social backgrounds and provide alternatives to conflict. Jobs are thus more than a byproduct of economic growth. They are transformational—they are what we earn, what we do, and even who we are. High unemployment and unmet job expectations among youth are the most immediate concerns. But in many developing countries, where farming and self-employment are prevalent and safety nets are modest are best, unemployment rates can be low. In these countries, growth is seldom jobless. Most of their poor work long hours but simply cannot make ends meet. And the violation of basic rights is not uncommon. Therefore, the number of jobs is not all that matters: jobs with high development payoffs are needed. Confronted with these challenges, policy makers ask difficult questions. Should countries build their development strategies around growth, or should they focus on jobs? Can entrepreneurship be fostered, especially among the many microenterprises in developing countries, or are entrepreneurs born? Are greater investments in education and training a prerequisite for employability, or can skills be built through jobs? In times of major crises and structural shifts, should jobs, not just workers, be protected? And is there a risk that policies supporting job creation in one country will come at the expense of jobs in other countries? The World Development Report 2013: Jobs offers answers to these and other difficult questions by looking at jobs as drivers of development—not as derived labor demand—not as considering all types of jobs—not just formal wage employment. The Report provides a framework that cuts across sectors and shows that the best policy responses vary across countries, depending on their levels of development, endowments, demography, and institutions. Policy fundamentals matter in all cases, as they enable a vibrant private sector, the source of most jobs in the world. Labor policies can help as well, even if they are less critical than is often assumed. Development policies, from making smallholder farming viable to fostering functional cities to engaging in global markets, hold the key to success. Tales from the Development Frontier-Hinh T. Dinh 2013-09-16 Tales from the Development Frontier presents analytical reviews and case studies that show how selected countries have developed light manufacturing to create jobs and foster prosperity. The focus is on China, a current powerhouse in light manufacturing, but the volume also analyzes a selection of countries in Africa and Asia. Justice Brennan-Seth Stern 2010-10-04 A sweeping insider look at the life of William Brennan, champion of free speech and widely considered the most influential Supreme Court justice of the twentieth century Before his death, William Brennan granted Stephen Wermiel access to volumes of personal and court materials that are sealed to the public until 2017. These are what Jeffrey Toobin has called "a coveted set of documents" that includes Brennan's case histories—in which he recorded strategies behind all the major battles of the past half century, including Roe v. Wade, affirmative action, the death penalty, obscenity law, and the constitutional right to privacy—as well as more personal documents that reveal some of Brennan's curious contradictions, like his refusal to hire female clerks even as he wrote groundbreaking women's rights decisions; his complex stance as a justice and a Catholic; and details on Brennan's unprecedented working relationship with Chief Justice Earl Warren. Wermiel distills decades of valuable information into a seamless, riveting portrait of the man behind the Court's most liberal era. A Court Divided-Mark V. Tushnet 2005 In this authoritative reckoning with the eighteen-year record of the Rehnquist Court, Georgetown law professor Mark Tushnet reveals how the decisions of nine deeply divided justices have left the future of the Court; and the nation; hanging in the balance. Many have assumed that the chasm on the Court has been between its liberals and its conservatives. In reality, the division was between those in tune with the modern post-Reagan Republican Party and those who, though considered to be in the Court's center, represent an older Republican tradition. As a result, the Court has modestly promoted the agenda of today's economic conservatives, but has regularly defeated the agenda of social issues conservatives; while paving the way for more radically conservative path in the future. Reversible Destiny-Peter T. Schneider 2003-03-13 Reversible Destiny traces the history of the Sicilian mafia to its nineteenth-century roots and examines its late twentieth-century involvement in urban real estate and construction as well as drugs. Based on research in the regional capital of Palermo, this book suggests lessons regarding secretive organized crime: its capacity to reproduce a subculture of violence through time, its acquisition of a dense connective web of political and financial protectors during the Cold War era, and the sad reality that repressing it easily risks harming vulnerable people and communities. Charting the efforts of both the judiciary and a citizen's social movement to reverse the mafia's economic, political, and cultural power, the authors establish a framework for understanding both the difficulties and the accomplishments of Sicily's multifaceted antimafia efforts.
