Diagnose en therapie 2015-2016-J.J.E. van Everdingen 2015-02-06 Diagnose en therapie is hét standaardnaslagwerk voor diagnostiek en behandeling van de meest voorkomende ziektebeelden in de huisartsenpraktijk. Met als uitgangspunt de organen en de orgaansystemen worden bijna 1.000 klinische beelden beschreven. De diagnostiek en behandeling van deze ziektebeelden worden op een beknopte, heldere wijze behandeld door vakexperts, huisartsen en apothekers, de beste combinatie om de klinische relevantie voor de huisartsenpraktijk te waarborgen. Daarnaast behandelt Diagnose en therapie uitgebreid de indicatiestellingen en de therapieën met de meest voorgeschreven geneesmiddelen in de huisartsenpraktijk. De teksten zijn zo veel mogelijk gebaseerd op NHG-standaarden en richtlijnen van specialisten. De hoofdstukindeling en de index achterin het boek, maken dat het boek gemakkelijk is te raadplegen als men snel iets wil vinden. Het boek verschijnt tweejaarlijks in een geheel geactualiseerde editie. Regelmatig worden nieuwe hoofdstukken toegevoegd en verbeteringen doorgevoerd. Een abonnement op Diagnose en therapie is mogelijk. Kijk hiervoor op www.bsl.nl

Strafrecht en strafprocesrecht: doel of middel in veranderde samenleving?-Philip Traest 2017 Dat onze samenleving grondig veranderd is en immer evolueert, behoeft geen toelichting. Verandering moet vroeg of laat leiden tot nieuwe evenwichten en enige stabiliteit. Maatschappelijke vrede heet zo iets. In dit proces heeft het recht een belangrijke rol te spelen. Dat geldt inzonderheid voor het strafrecht en het strafprocesrecht. Hoewel de rol van het strafrecht niet mag worden overschat en de wet in het algemeen niet het meest geschikte instrument is om mentaliteiten te veranderen, blijft het strafrecht wel een nuttig en noodzakelijk instrument om rechtszekerheid in een snel veranderende samenleving te bewerkstelligen. In deze optiek werd ervoor geopteerd om, zoals in de editie van 2006, aandacht te besteden aan diverse aspecten van het materieel en formeel strafrecht en dit zowel vanuit nationaal- als internationaalrechtelijk oogpunt. Het bijzonder strafrecht en de strafuitvoering ontbreken evenmin.

Wetgeving gezondheidszorg (3de, herziene uitgave)-Martin A.J.M. Buijsen 2014-10-01 Wetgeving gezondheidszorg bevat de belangrijkste wetten, besluiten en regelingen op het terrein van de Nederlandse gezondheidszorg. De bundel is overzichtelijk, gemakkelijk hanteerbaar en voorzien van een uitgebreid trefwoordenregister. Deze herziene en vermeerderde uitgave is specifiek ontwikkeld voor de Rotterdamse masteropleiding Recht van de gezondheidszorg, maar leent zich uitstekend voor alle andere opleidingen waarin gezondheidsrecht aan bod komt. Daarnaast is de verzameling een handig hulpmiddel in de dagelijkse juridische praktijk. De teksten zijn geactualiseerd tot 1 augustus 2014.

IS - Tot alles in staat-Hans Jaap Melissen 2015-01-12 Ineens kende de hele wereld die twee letters: IS, een terreurgroep die midden in de chaos van Irak en Syrië de Islamitische Staat uitriep. Het Westen was overdonderd en greep in, maar IS laat zich niet makkelijk verslaan. Wie zijn deze mensen precies, wat willen ze en waar komen ze vandaan? In IS - Tot alles in staat neemt de ervaren oorlogsverslaggever Hans Jaap Melissen de lezer mee op reis; naar het New York van net na 9/11 en de oorlogen in Irak en Syrië. Als een van de weinige journalisten gaat Melissen nog naar plekken waar een aantal van zijn collega's is ontvoerd en later onthoofd. Melissen laat zien hoe een vruchtbare voedingsbodem kon ontstaan van waaruit een onbeduidend groepje rebellen uitgroeide tot een van de rijkste en meest meedogenloze terreurbewegingen ooit. Een beweging die handig gebruikmaakt van sociale media en een grote aantrekkingskracht uitoefent op buitenlandse jihadisten, ook uit Nederland. Inmiddels probeert een internationale coalitie onder leiding van de Verenigde Staten IS te verslaan. Maar gaat dat lukken? Of zal IS altijd weer van zich laten horen met aanslagen, waar ook ter wereld?

Kairos-Joke J. Hermsen 2015-10-27 Rust en aandacht zijn belangrijke voorwaarden voor creativiteit en helder nadenken, betoogde Joke J. Hermsen in Stil de tijd. Maar hoe komen we na de rust weer in beweging? In Kairos houdt Hermsen een hartstochtelijk pleidooi voor een andere, meer bevlogen tijd. We kennen Chronos als de lineaire, meetbare tijd, maar we zijn Kairos als `de god van het geschikte ogenblik vergeten. Toch kan juist deze tijdervaring ons onverwachte kansen en inzichten bieden. Hermsen vindt Kairos terug in het werk van o.a. Nietzsche, Arendt, Bloch, Benjamin en Heidegger, en verbindt deze aan begrippen als enthousiasme, inspiratie, empathie en bezieling. Deze essays over filosofie, kunst, cultuur en onderwijs ontvouwen nieuwe manieren van hoopvol denken, die ons kunnen inspireren een uitweg uit de crisis te vinden en veranderingen op gang te brengen.

Internationalizing the Curriculum-Betty Leask 2015-03-27 The drive to internationalize higher education has seen the focus shift in recent years towards its defining element, the curriculum. As the point of connection between broader institutional strategies and the student experience, the curriculum plays a key role in the success or failure of the internationalization agenda. Yet despite much debate, the role and power of curriculum internationalization is often unappreciated. This has meant that critical questions, including what it means and how it can be achieved in different disciplines, have not been consistently or strategically addressed. This volume breaks new ground in connecting theory and practice in internationalizing the curriculum in different disciplinary and institutional contexts. An extensive literature review, case studies and action research projects provide valuable insights into the concept of internationalization of the curriculum. Best practice in curriculum design, teaching and learning in higher education are applied specifically to the process of internationalizing the curriculum. Examples from different disciplines and a range of practical resources and ideas are provided. Topics covered include: why internationalize the curriculum?; designing internationalized learning outcomes; using student diversity to internationalize the curriculum; blockers and enablers to internationalization of the curriculum; assessment in an internationalized curriculum; connecting internationalization of the curriculum with institutional goals and student learning. Internationalizing the Curriculum provides invaluable guidance to university managers, academic staff, professional development lecturers and support staff as well as students and scholars interested in advancing theory and practice in this important area.

Access Contested-Ronald Deibert 2011-09-30 Experts examine censorship, surveillance, and resistance across Asia, from China and India to Malaysia and the Philippines. A daily battle for rights and freedoms in cyberspace is being waged in Asia. At the epicenter of this contest is China—home to the world's largest Internet population and what is perhaps the world's most advanced Internet censorship and surveillance regime in cyberspace. Resistance to China's Internet controls comes from both grassroots activists and corporate giants such as Google. Meanwhile, similar struggles play out across the rest of the region, from India and Singapore to Thailand and Burma, although each national dynamic is unique. Access Contested, the third volume from the OpenNet Initiative (a collaborative partnership of the Citizen Lab at the University of Toronto's Munk School of Global Affairs, the Berkman Center for Internet and Society at Harvard University, and the SecDev Group in Ottawa), examines the interplay of national security, social and ethnic identity, and resistance in Asian cyberspace, offering in-depth accounts of national struggles against Internet

controls as well as updated country reports by ONI researchers. The contributors examine such topics as Internet censorship in Thailand, the Malaysian blogosphere, surveillance and censorship around gender and sexuality in Malaysia, Internet governance in China, corporate social responsibility and freedom of expression in South Korea and India, cyber attacks on independent Burmese media, and distributed-denial-of-service attacks and other digital control measures across Asia.

Global and Local Internationalization-Elspeth Jones 2015-12-14 "Offering a range of perspectives on internationalization in higher education from a globally dispersed group of authors, this book reflects the many facets of the theme. It reminds us that, while internationalization is strongly connected to the globalization of society, at the same time it is deeply embedded in local political, economic and social structures, systems and cultures. The increasing attention given to internationalization by institutions all around the world is leading to diversification and broadening of practice. This in turn deepens our understanding of what is needed to enhance the educational experiences of students, and how the outcomes of internationalization contribute to the skills needed in a globalized and multicultural society. Yet inevitably the impact is becoming more noticeable locally and the six sections of the book focus on these dimensions: • Internationalization in Local and Global Contexts • Local and Global Drivers for Change • Global and Local Dimensions of Curriculum Internationalization • The Outcomes of Local and Global International Education • Internationalization for Local and Global Employability • Regional and National Cases of Local and Global Internationalization How can we define more precise learning outcomes that underpin learning and teaching? How do we avoid the societal risks of internationalization and ensure that internationalization opportunities and benefits are shared equally? How do we prevent brain drain and commercialization? What are the values that underlie our actions? These are just some of the questions that will occupy our minds, locally and globally, in the years to come and which this book seeks to highlight."

Advanced Nursing Practice-Gary Rolfe 1998 Discusses the nature of advanced nursing, with particular reference to the continuing NHS changes. The authors draw out clear guidance on the role of the advanced practitioner and explore practical issues, such as reflective practice, clinical supervision and educational needs.

The Sugar Plantation in India and Indonesia-Ulbe Bosma 2013-10-07 European markets almost exclusively relied on Caribbean sugar produced by slave labor until abolitionist campaigns began around 1800. Thereafter, importing Asian sugar and transferring plantation production to Asia became a serious option for the Western world. In this book, Ulbe Bosma details how the British and Dutch introduced the sugar plantation model in Asia and refashioned it over time. Although initial attempts by British planters in India failed, the Dutch colonial administration was far more successful in Java, where it introduced in 1830 a system of forced cultivation that tied local peasant production to industrial manufacturing. A century later, India adopted the Java model in combination with farmers' cooperatives rather than employing coercive measures. Cooperatives did not prevent industrial sugar production from exploiting small farmers and cane cutters, however, and Bosma finds that much of modern sugar production in Asia resembles the abuses of labor by the old plantation systems of the Caribbean.

The Platform Society-José van Dijck 2018-10-02 Individuals all over the world can use Airbnb to rent an apartment in a foreign city, check Coursera to find a course on statistics, join PatientsLikeMe to exchange information about one's disease, hail a cab using Uber, or read the news through Facebook's Instant Articles. The promise of connective platforms is that they offer personalized services and contribute to innovation and economic growth, while bypassing cumbersome institutional or industrial overhead. In *The Platform Society*, Van Dijck, Poell and De Waal offer a comprehensive analysis of a connective world where platforms have penetrated the heart of societies-disrupting markets and labor relations, circumventing institutions, transforming social and civic practices and affecting democratic processes. This book questions what role online platforms play in the organization of Western societies. First, how do platform mechanisms work and to what effect are they deployed? Second, how can platforms incorporate public values and benefit the public good? *The Platform Society* analyzes intense struggles between competing ideological systems and contesting societal actors-market, government and civil society-raising the issue of who is or should be responsible for anchoring public values and the common good in a platform society. Public values include of course privacy, accuracy, safety, and security, but they also pertain to broader societal effects, such as fairness, accessibility, democratic control, and accountability. Such values are the very stakes in the struggle over the platformization of societies around the globe. *The Platform Society* highlights how this struggle plays out in four private and public sectors: news, urban transport, health, and education. Each struggle highlights local dimensions, for instance fights over regulation between individual platforms and city governments, but also addresses the level of the platform ecosystem as well as the geopolitical level where power clashes between global markets and (supra-)national governments take place.

Platform Revolution: How Networked Markets Are Transforming the Economy and How to Make Them Work for You-Geoffrey G. Parker 2016-03-28 A practical guide to the new economy that is transforming the way we live, work, and play. Uber. Airbnb. Amazon. Apple. PayPal. All of these companies disrupted their markets when they launched. Today they are industry leaders. What's the secret to their success? These cutting-edge businesses are built on platforms: two-sided markets that are revolutionizing the way we do business. Written by three of the most sought-after experts on platform businesses, *Platform Revolution* is the first authoritative, fact-based book on platform models. Whether platforms are connecting sellers and buyers, hosts and visitors, or drivers with people who need a ride, Geoffrey G. Parker, Marshall W. Van Alstyne, and Sangeet Paul Choudary reveal the what, how, and why of this revolution and provide the first "owner's manual" for creating a successful platform business. *Platform Revolution* teaches newcomers how to start and run a successful platform business, explaining ways to identify prime markets and monetize networks. Addressing current business leaders, the authors reveal strategies behind some of today's up-and-coming platforms, such as Tinder and SkillShare, and explain how traditional companies can adapt in a changing marketplace. The authors also cover essential issues concerning security, regulation, and consumer trust, while examining markets that may be ripe for a platform revolution, including healthcare, education, and energy. As digital networks increase in ubiquity, businesses that do a better job of harnessing the power of the platform will win. An indispensable guide, *Platform Revolution* charts out the brilliant future of platforms and reveals how they will irrevocably alter the lives and careers of millions.

While the Gods Were Sleeping-Erwin Mortier 2015-02-10 *While the Gods Were Sleeping* is a novel about the magnitude and impact of the First World War, the recollections of which are recorded in the notebooks of the elderly Helena. The young Helena is sent to her uncle's country house before the war, and from here she witnesses scenes of indescribable horror. But it is also where she meets Matthew again, a British Army photographer who she goes on to marry. This is a story not about spectacular events; rather, Mortier is concerned with writing about war, history and the past with great empathy and engagement, and with a mixture of melancholy, qualification and resignation.

Drukwerk-Karel Martens 2001 Karel Martens's work occupies a unique place in the European art and design landscape. While working in the tradition of Dutch modernism, he maintains distance from the main developments of his time: from both the practices of routinized Modernism and the facile reactions against it. His work is personal and experimental, while at the same time publicly answerable.

Treadmill of Production-Kenneth A. Gould 2015-11-17 Schnaiberg's concept of the treadmill of production is arguably the most visible and enduring theory to emerge in three decades of environmental sociology. Elaborated and tested, it has been found to be an accurate predictor of political-economic changes in the global economy. In the global South, it has figures prominently in the work of structural environmental analysts and has been used by many political-economic movements. Building new extensions and applications of the treadmill theory, this new book shows how and why northern analysts and governments have failed to protect our environment and secure our future. Using an empirically based political-economic perspective, the authors outline the causes of environmental degradation, the limits of environmental protection policies, and the failures of institutional decision-makers to protect human well-being.

Opportunity to Learn, Curriculum Alignment and Test Preparation-Jaap Scheerens 2016-08-30 This book provides a review of the effectiveness of Opportunity to Learn (OTL) operationalized as the association between OTL and student achievement. In addition, it presents an elaborate conceptual map in which OTL is regarded as part of a larger concept of curriculum alignment. Major components of this framework are national goals and standards, school curricula, formative tests, textbooks, actual delivery of content as part of teaching, and summative tests and examinations. Alignment between educational goals, intended and implemented curricula, and educational outcomes is considered an important prerequisite for effective education. The expectation is that better alignment leads to better student performance. The concept of OTL is commonly used to compare content covered, as part of the implemented curriculum, with student achievement. As such it is to be seen as a facet of the broader concept of "alignment". As it comes to enhancing OTL in educational policy and practice, proactive curriculum development is compared to a more retroactive orientation. Legitimate forms of test and examination preparation belong to this retroactive orientation, and are seen as favorable conditions for optimizing OTL. This book reviews the research evidence on the effects of OTL on student achievement by means of detailed descriptions of key-empirical studies, a review of meta-analyses, a "vote count" syntheses of 51 empirical studies, conducted between 1995 and 2015, and a secondary analysis based on TIMSS 2011, and PISA 2012 data. It concludes that the effect size of OTL, at about .30, is modest, but comparable in size to other effectiveness-enhancing conditions in schooling. The final chapter of the book provides suggestions for educational policy and practice to further optimize OTL. /div

Representative Bureaucracy in Action-Patrick von Maravić 2013-01-01 This volume confronts one of the most central issues in the study and practice of bureaucracy. Questions about representativeness of public institutions raises key issues about legitimacy, especially in contexts characterised by ethnic diversity and cleavages. Debates are shaped by normatively informed positions that contrasts those in favour of representativeness with those who point to

limitations and side-effects. This volume offers a set of important contributions to these debates by linking the long-standing debates about representative bureaucracy with an impressive range of country studies. This volume is a fundamental contribution to the theme of representative bureaucracy. Õ Ð Martin Lodge, London School of Economics, UK The book explores one of the most topical issues of public bureaucracies worldwide: the relationship between the composition of the public sector workforce and the nature of the society it serves. Taking a comparative and analytical perspective, the authoritatively, yet accessibly written, country chapters show how salient the politics of representativeness have become in increasingly diverse societies. At the same time, they illustrate the wide variety of practice based on different political systems, administrative structures, and cultural settings. Providing comprehensive up-to-date information and analysis, these studies will interest scholars and practitioners alike, from comparative public administration and management, government, public policy, and diversity studies.

The Future of Ecocriticism-Serpil Oppermann 2011-05-25 As we enter the second decade of the twenty-first century, environmental concerns dominate the media headlines, from rampant poverty in the developing world to nuclear accidents in industrialized nations. How did human civilization arrive at its current predicaments, and what can we do to temper our habits of mind and mitigate society's environmentally (and socially) destructive behaviors? The field of ecocriticism (also sometimes called "environmental criticism") attempts to grapple with such issues. A branch of literary and cultural studies that essentially began in North America in the 1970s, ecocriticism is currently one of the most quickly developing areas of environmental research and teaching. The Future of Ecocriticism: New Horizons brings together thirty-two of the latest articles in the field, including work by some of the leading scholars from around the world. Although ecocriticism has been particularly active in North America, Western Europe, and East Asia, important studies of traditional environmental thought, environmental communication strategies, and environmental aesthetics have begun to emerge in every region of this world. This new book, co-edited by three prominent Turkish scholars and a leading American ecocritic, offers a special cluster of Turkish ecocriticism, with a focus on environmental stories and ideas in this culture that bridges Europe and Asia. Another unique feature of The Future of Ecocriticism: New Horizons is the concluding dialogue among the four editors about the current state of the field.

World of Difference-Naomi Ellemers 2017 Public debates tend to see social inequality as resulting from individual decisions people make, for instance with respect to their education or lifestyle. Solutions are often sought in supporting individuals to make better choices. This neglects the importance of social groups and communities in determining individual outcomes. A moral perspective on social inequality questions the fairness of insisting on individual responsibilities, when members of some groups systematically receive fewer opportunities than others. The essays in this book have been prepared by experts from different disciplines, ranging from philosophy to engineering, and from economics to epidemiology. On the basis of recent scientific insights, World of Difference examines how group memberships impact on individual outcomes in four key domains: health, education and work, migration, and the environment. This offers a new moral perspective on social inequality, which policy makers tend to neglect.

Critical Reflection for Nursing and the Helping Professions-Gary Rolfe 2001 Critical reflection, like all practice-based skills, can only be mastered by doing it. This practical user's guide takes the reader through a structured and coherent course in reflective practice, with frequent reflective writing exercises, discussion breaks and suggestions for further reading. With chapters on individual and group supervision, reflective writing, research and education, this book will be of interest to students and practitioners at all levels of nursing, midwifery, health visiting and social work.

Secrets and Democracy-L. Quill 2014-03-11 Secrets and Democracy develops a new approach to understanding the centrality of secrecy to political life. From the ancient world to the modern, this book considers the growing importance of secrets, the dilemmas this poses to conceptions of democracy and the challenges that collecting secrets poses to publicity and privacy in the network society.

The Data Revolution-Rob Kitchin 2014-08-18 "Carefully distinguishing between big data and open data, and exploring various data infrastructures, Kitchin vividly illustrates how the data landscape is rapidly changing and calls for a revolution in how we think about data." - Evelyn Ruppert, Goldsmiths, University of London "Deconstructs the hype around the 'data revolution' to carefully guide us through the histories and the futures of 'big data.' The book skilfully engages with debates from across the humanities, social sciences, and sciences in order to produce a critical account of how data are enmeshed into enormous social, economic, and political changes that are taking place." - Mark Graham, University of Oxford Traditionally, data has been a scarce commodity which, given its value, has been either jealously guarded or expensively traded. In recent years, technological developments and political lobbying have turned this position on its head. Data now flow as a deep and wide torrent, are low in cost and supported by robust infrastructures, and are increasingly open and accessible. A data revolution is underway, one that is already reshaping how knowledge is produced, business conducted, and governance enacted, as well as raising many questions concerning surveillance, privacy, security, profiling, social sorting, and intellectual property rights. In contrast to the hype and hubris of much media and business coverage, The Data Revolution provides a synoptic and critical analysis of the emerging data landscape. Accessible in style, the book provides: A synoptic overview of big data, open data and data infrastructures An introduction to thinking conceptually about data, data infrastructures, data analytics and data markets A critical discussion of the technical shortcomings and the social, political and ethical consequences of the data revolution An analysis of the implications of the data revolution to academic, business and government practices

Sociology for Health Professionals in Ireland-Abbey Hyde 2004

Dynamism in Islamic Activism- 2006 Though the media frequently cover tensions surrounding radical Muslim communities within Western countries, coverage and understanding of similar tensions within Muslim nations themselves are far more limited. This study of the Netherlands Scientific Council for Government Policy analyzes developments in Islamic beliefs, political activism, society and law in twelve Islamic countries since the 1970s. Dynamism in Islamic Activism is a penetrating, timely study that helps citizens and policy makers look beyond simplistic, stereotypical understandings of Islamic societies.

Stratification in Higher Education-Yossi Shavit 2007-06-13 The mass expansion of higher education is one of the most important social transformations of the second half of the twentieth century. In this book, scholars from 15 countries, representing Western and Eastern Europe, East Asia, Israel, Australia, and the United States, assess the links between this expansion and inequality in the national context. Contrary to most expectations, the authors show that as access to higher education expands, all social classes benefit. Neither greater diversification nor privatization in higher education results in greater inequality. In some cases, especially where the most advantaged already have significant access to higher education, opportunities increase most for persons from disadvantaged origins. Also, during the late twentieth century, opportunities for women increased faster than those for men. Offering a new spin on conventional wisdom, this book shows how all social classes benefit from the expansion of higher education.

Drones and Responsibility-Ezio Di Nucci 2016-07-01 How does the use of military drones affect the legal, political, and moral responsibility of different actors involved in their deployment and design? This volume offers a fresh contribution to the ethics of drone warfare by providing, for the first time, a systematic interdisciplinary discussion of different responsibility issues raised by military drones. The book discusses four main sets of questions: First, from a legal point of view, we analyse the ways in which the use of drones makes the attribution of criminal responsibility to individuals for war crimes more complicated and what adjustments may be required in international criminal law and in military practices to avoid 'responsibility gaps' in warfare. From a moral and political perspective, the volume looks at the conditions under which the use of military drones by states is impermissible, permissible, or even obligatory and what the responsibilities of a state in the use of drones towards both its citizens and potential targets are. From a socio-technical perspective, what kind of new human machine interaction might (and should) drones bring and which new kinds of shared agency and responsibility? Finally, we ask how the use of drones changes our conception of agency and responsibility. The book will be of interest to scholars and students in (military) ethics and to those in law, politics and the military involved in the design, deployment and evaluation of military drones.

Reflection and Action-James N. Hardin 1991 The purpose of this collection of essays by eminent American & European scholars is to provide an overview of the state of research on the history & theory of the Bildungsromane & our understanding of the term.

iGovernment-D. Broeders 2011 The authors of this incisive study explore the problems of the ongoing digitization of government, such as the creeping loss of data quality, and how citizens and officials must respond to these complications in the coming years. The iGovernment is running full speed on information networks and digitization, but it is also seriously out of step with existing bureaucracies. iGovernment offers an accurate picture of how the digital

technologies are shaping modern governments, and also a powerful corrective for the dissonance between technology and organizational management. "This book will be a valuable resource for researchers and scholars seeking to understand the possibilities, dilemmas, and challenges of bringing the Internet and related technologies to center stage in government and public services"—Helen Margetts, University of Oxford

Big Books in Times of Big Data-Inge Van de Ven 2020-01-15 This book explores the aesthetics, medial affordances, and cultural economics of monumental literary works of the digital age and offers a comparative and cross-cultural perspective on a wide range of contemporary writers. Using an international archive of hefty tomes by authors such as Mark Z. Danielewski, Roberto Bolaño, Elena Ferrante, Karl Ove Knausgård, George R.R. Martin, Jonathan Franzen, and William T. Vollmann, van de Ven investigates multiple strands of bigness that speak to the tenuous position of print literature in the present but also to the robust stature of literary discourse within our age of proliferating digital media. Her study makes a case for the cultural agency of the big book—as a material object and a discursive phenomenon, entangled in complex ways with questions of canonicity, materiality, gender, and power. Van de Ven takes us into a contested terrain beyond the 1,000-page mark, where issues of scale and reader comprehension clash with authorial aggrandizement and the pleasures of binge reading and serial consumption.

Trust on the Line-Esther Keymolen 2016-10-10 Governments, companies, and citizens all think trust is important. Especially today, in the networked era, where we make use of all sorts of e-services and increasingly interact and buy online, trust has become a necessary condition for society to thrive. But what do we mean when we talk about trust and how does the rise of the Internet transform the functioning of trust? This book starts off with a thorough conceptual analysis of trust, drawing on insights from—amongst others—philosophy and sociology to sharpen our understanding of the topic. The book explains how the arrival of large systems—such as the internet—has changed the character of trust which today is no longer based on interpersonal interactions but has become completely mediated by technologies. Based on the layered building plan of the Internet itself, a new conceptual lens called 4 Cs is developed to analyse and understand trust in the networked era. The 4Cs refer to the 4 layers which all have to be taken into account to assess trust online, namely: context, code, codification, and curation. The 4cs bring together the firsthand experiences of the user (context), the sort of technology that is being used (code), the legal implication (codification) and business interests (curation) in order to get a clear picture of the trust issues that may arise. In the final part of the book some real-life cases are discussed (digital hotel keys, Airbnb, online personalization) to illustrate how trust—analysed through the 4 Cs lens—might flourish or be challenged in our current networked era.

Dutch Enterprise in the 20th Century-Keetie E. Sluyterman 2013-07-04 This is the first book to summarise the twentieth century economic history of the Netherlands from a business history perspective. It has a broad historical coverage of Dutch business development including in particular the major multinationals such as Philips, Shell, and Unilever. Although focused on Dutch business it has a strong international flavour.

Self Continuity-Fabio Sani 2010-08-18 This volume is the first to bring together the fast-growing research on self-continuity from multiple perspectives within and beyond social psychology. The book covers individual and collective aspects of self-continuity, while a final section explores the relationship between these two forms. Topics include environmental and cultural influences on self-continuity; the interplay of autobiographical memory and personal self-continuity; the psychological function of self-continuity; personal and collective self-continuity; and resistance to change. The volume is rounded off with commentaries on the central issues and themes that have been discussed. The book provides a unique sourcebook for this important topic and will appeal not only to upper-level students and researchers in social psychology, but, in view of the multiple perspectives represented in the volume, it will also appeal to cognitive, developmental, and personality psychologists.
