The Law of Disability Discrimination-Ruth Colker 2014-03-19 The purpose of this book is to provide students with an in-depth understanding of the ADA, including the sections governing employment (Title I), public entities (Title II), and public accommodations (Title III). The book focuses on the major components of the ADA, with extensive reference to the implementing regulations and accompanying guidance statements--essential building blocks for a complete understanding of the Act. It also covers a wide range of additional topics, such as education, housing, insurance, and the protection of newborns with disabilities. Because the ADA intersects several other federal statutes, such as the IDEA, the FHAA, and Section 504 of the Rehabilitation Act, cross-references to these and other statutes are frequently provided. A companion book, The Law of Disability Discrimination Handbook: Statutes and Regulatory Guidance, includes reference material relevant to interpreting federal law prohibiting discrimination on the basis of disability. The Handbook includes the statutory language of each of the five Titles of the ADA. In addition, with respect to Titles I, II, and III, the Handbook includes the regulations and interpretive guidance promulgated by the EEOC and the United States DOJ. The Handbook also includes reference material relevant to interpreting Section 504 of the Rehabilitation Act of 1973 and the Fair Housing Act Amendments of 1998, as well as excerpts from the Civil Rights Act of 1991. Further, the Handbook contains the text of the IDEA, the Department of Education Regulations implementing the IDEA, and the Convention on the Rights of Persons with Disabilities.

Measuring Racial Discrimination-National Research Council 2004-07-24 Many racial and ethnic groups in the United States, including blacks, Hispanics, Asians, American Indians, and others, have historically faced severe discrimination--pervasive and open denial of civil, social, political, educational, and economic opportunities. Today, large differences among racial and ethnic groups continue to exist in employment, income and wealth, housing, education, criminal justice, health, and other areas. While many factors may contribute to such differences, their size and extent suggest that various forms of discriminatory treatment persist in U.S. society and serve to undercut the achievement of equal opportunity. Measuring Racial Discrimination considers the definition of race and racial discrimination, reviews the existing techniques used to measure racial discrimination, and identifies new tools and areas for future research. The book conducts a thorough evaluation of current methodologies for a wide range of circumstances in which racial discrimination may occur, and makes recommendations on how to better assess the presence and effects of discrimination.

Labor Guide to Labor Law-Bruce S. Feldacker 2014-08-12 Labor Guide to Labor Law is a comprehensive survey of labor law in the private sector, written from the labor perspective for labor relations students and for unions and their members. The text emphasizes issues of greatest importance to unions and employees. Where the law permits a union to make certain tactical choices, those choices are pointed out. Material is included on internal union matters that tend to be ignored in management texts. Bruce S. Feldacker and Michael J. Hayes cover applicable labor law principles from a union's initial organizing campaign to the mature bargaining relationship, including such subjects as the employee right to engage in protected concerted activity, the duty to bargain, labor arbitration, the use of strikes, picketing and other economic weapons in resolving a labor dispute, the duty of fair representation, internal union regulation, and employment discrimination. This book is also a useful reference and review for full-time union officers and representatives who have a working knowledge of labor law but wish to brush up on certain points as needed in their work. Both authors have extensive experience in the construction field, and they have been careful to include material on those aspects of labor law that are unique to that field. Labor Guide to Labor Law is structured to present an unbiased and comprehensive explanation of labor law principles for anyone interested in the field. Thus, labor relations educators, as well as practitioners in the field representing labor, management, or individual employees, should also find the text suitable for their use. Each chapter includes a summary, review questions and answers, a restatement of "Basic Legal principles" with citations to key cases, and a bibliography for additional research. The comprehensively revised and updated fifth edition covers new statutes, current issues, and the latest developments in labor and employment law.

A Concise Guide to the EU Anti-dumping/anti-subsidies Procedures-Themistoklis K. Giannakopoulos 2006-01-01 Unfair trading practices such as dumping and the granting of subsidies have long been identified as threats to open markets. Yet despite decades of international trading rules, global markets are still jeopardized by practices which can cause material injury to industries and put employment at risk. The European Union has been a leader in its determination to ensure that its industries are not disadvantaged by such practices, that Community interests are defended, and that fair competition is restored where needed. The basic texts which form the legal basis of anti-dumping and anti-subsidy investigations in the Community entered into force in 1996 and 1997. The procedures developed in these texts, as amended, and in their corresponding regulations, are the subject of this extremely helpful guide. Practitioners who must follow these often complex procedures will find precise guidelines for the substantive determinations that must be made such as calculating the material injury, determining the cause of injury, and applying the Community interest test and then be able to move confidently through every procedural step, including the following: Initial complaintQuestionnairesConfrontation meetings and oral hearingsInvestigations by Commission official:Offer and acceptance /rejection of undertaking;Commenting on the Commission's provisional decisionRequesting review of measures and refunds andJudicial review Throughout the presentation the author describes relevant cases and actual measures taken. Tables of cases and measures as well as a bibliography are included. Business people and their counsel, whether engaged in trade within the EU or between any country and an EU Member State, will benefit enormously from the detailed guidance offered in this incomparable volume.
