Macroeconomics-Douglas McTaggart 2012-10-04 High quality, engaging content for students...ultimate flexibility for educators The seventh edition of this benchmark Australian text continues to offer students a comprehensive and relevant introduction to economics whilst offering educators the ability to customise and deliver content - your way. Economics 7th edition provides a streamlined approach to study and recognises the difficulties some students may face in comprehending key concepts. By leaving the more technical content and application until later, students can enjoy the more exciting policy material from the beginning and engage with the content early. Through compelling examples, clear explanations and the latest instructive on-line resources, the text draws students into the content and reinforces learning through practice and solving problems which are relevant to them. The authors train students to think about issues in the way real economists do, and learn how to explore difficult policy problems and make more informed decisions by offering a clear introduction to theory and applying the concepts to today's events, news, and research.

The Rise of the Value-Added Tax-Kathryn James 2015-04-30 This book explores one of the most significant trends in the evolution of global tax systems by asking how, within less than half a century, the value-added tax (VAT) has risen from relative obscurity to become one of the world's most dominant revenue instruments. Despite its significance, very little is known about why so many countries have adopted the VAT and, in particular, why different countries adopt the types of VAT that they do. The popular mythology provides that the merits of the VAT have underpinned its global spread; however, this book contends that much scholarship confuses the question of why the VAT has risen to dominance with the issue of what makes a good VAT. This book combines policy and legal analysis to propose a new way of understanding the rise of this important revenue instrument so as to better reflect the realities of the VATs that are actually implemented.

Economics-Michael Parkin 2003 This text offers students a solid modern foundation in the study of economic theory, and includes an expanded software package, Economics in Action. The new edition has a revised organisation of the macro section for greater flexibility.

Hegel: Arguments Philosophers-M.J. Inwood 2013-02-01 This clear, critical examination makes Hegel's arguments fully accessible.

Hegel's system is considered as a whole and examines the wide range of problems that it was designed to solve.

The Economist- 1855

Hegel-Michael Inwood 2017-09-25 In this clear, critical examination of the ideas of one of the greatest and most influential of modern philosophers, M.J. Inwood makes Hegel's arguments fully accessible. He considers Hegel's system as a whole and examines the wide range of problems that it was designed to solve - metaphysical, epistemological theological and political. He concentrates especially on the logical and metaphysical ideas which underpin the system and which supply the key to understanding much of what is obscure in Hegel's thought. Throughout the book, M.J Inwood reconstructs Hegel's thought by arguing with him. He examines Hegel's arguments and restates his views precisely and clearly. He also conveys the impressive unity of Hegel's system and its links with the thought of such philosophers as Aristotle.

The Technological and Economic Future of Nuclear Power-Reinhard Haas 2019-01-01 This open access book discusses the eroding economics of nuclear power for electricity generation as well as technical, legal, and political acceptance issues. The use of nuclear power for electricity generation is still a heavily disputed issue. Aside from technical risks, safety issues, and the unsolved problem of nuclear waste disposal, the economic performance is currently a

major barrier. In recent years, the costs have skyrocketed especially in the European countries and North America. At the same time, the costs of alternatives such as photovoltaics and wind power have significantly decreased. Contents History and Current Status of the World Nuclear Industry The Dramatic Decrease of the Economics of Nuclear Power Nuclear Policy in the EU The Legacy of Csernobl and Fukushima Nuclear Waste and Decommissioning of Nuclear Power Plants Alternatives: Heading Towards Sustainable Electricity Systems Target Groups Researchers and students in the fields of political, economic and technical sciences Energy (policy) experts, nuclear energy experts and practitioners, economists, engineers, consultants, civil society organizations The Editors Prof. Dr. Reinhard Haas is University Professor of energy economics at the Institute of Energy Systems and Electric Drives at Technische Universität Wien, Austria.
