Medical Disaster Response-David Goldschmitt 2009-05-22 While the job of a clinician in a disaster scenario is to save lives without regard for the cause or rationale for the injury, medical and emergency professionals who understand the diverse aspects of a disaster are better equipped to respond effectively. Giving emergency personnel the tools they need to perform in catastrophic situations, Medical Disaster Response: A Survival Guide for Hospitals in Mass Casualty Events addresses the critical planning and response issues surrounding a mass casualty disaster before, during, and after the event. Industrial Bank-B. Doyle Mitchell, Jr. 2012-10-29 Pres. Franklin D. Roosevelt declared a bank holiday on March 5, 1933, closing banks across the country until they proved financial soundness. Meanwhile, as the United States crawled out of the Great Depression, Jesse H. Mitchell and a group of black businessmen accomplished the extraordinary—they started a black-owned bank on a street known as "Black Broadway" in the nation's capital. Mitchell, a Howard University-educated lawyer and attorney, and his friends sold \$65,000 in stock, and in the sweltering heat on August 20, 1934, Industrial Bank of Washington opened for business. A range of black investors rallied around the effort, from individuals, churches, and service-oriented organizations to savvy business owners. The bank has carried on for three generations: Mitchell's son B. Doyle Mitchell Sr. succeeded him as president in 1953, who was then succeeded in 1993 by his grandson B. Doyle Mitchell Jr. as president and CEO and his granddaughter Patricia A. Mitchell as executive vice president.
Box Boats-Brian J. Cudahy 2006 Fifty years ago-on April 26, 1956-the freighter Ideal X steamed from Berth 26 in Port Newark, New Jersey. Flying the flag of the Pan-Atlantic Steamship Company, she set out for Houston with an unusual cargo: 58 trailer trucks lashed to her top deck.But they weren't trucks-they were steel containers removed from their running gear, waiting to be lifted onto empty truck beds when Ideal X reached Texas. She docked safely, and a revolution was launched-not only in shipping, but in the way the world trades. Today, the more than 200 million containers shipped every year are the lifeblood of the new global economy. They sit stacked on thousands of box boatsthat grow more massive every year. In this fascinating book, transportation expert Brian Cudahy provides a vivid, fast-paced account of the container-ship revolution-from the maiden voyage of the Ideal X to the entrepreneurial vision and technological breakthroughs that make it possible to ship more goods more cheaply than every before.Cudahy tells this complex story easily, starting with Malcom McLean, Pan-Atlantic's owner who first thought about loading his trucks on board. His line grew into the container giant Sea-Land Services, and Cudahy chartisits dramatic evolution into Maersk Sealand, the largest container line in the world. Along the way, he provides a concise, colorful history of world shipping-from freighter types to the fortunes of steamship lines-and explores the spectacular growth of global trade fueled by the mammoth ships and new seaborne lifelines connecting Asia, Europe, and the Americas.Masterful maritime history, Box Boats shows how fleets of these ungainly ships make the modern world possible-with both positive and negative effects. It's also a tale of an historic home port, New York, where old piers lie silent while 40-foot steel boxes of toys and televisions come ashore by the thousands, across the bay in New Jersey.
