The Invention of Fire-Bruce Holsinger 2015-04-21 The author of the acclaimed medieval mystery A Burnable Book once again brings fourteenth-century London alive in all its color and detail in this riveting thriller featuring medieval poet and fixer John Gower—a twisty tale rife with intrigue, danger mystery, and murder. Though he is one of England’s most acclaimed intellectuals, John Gower is no stranger to London’s wretched slums and dark corners, and he knows how to trade on the secrets of the kingdom’s most powerful men. When the bodies of sixteen unknown men are found in a privy, the Sheriff of London seeks Gower’s help. The men’s wounds—ragged holes created by an unknown object—are unlike anything the sheriff’s men have ever seen. Tossed into the sewer, the bodies were meant to be found. Gower believes the men may have been used in an experiment—a test for a fearsome new war weapon his informants call the “handgonne,” claiming it will be the “future of death” if its design can be perfected. Propelled by questions of his own, Gower turns to courtier and civil servant Geoffrey Chaucer, who is working on some poems about pilgrims that Gower finds rather vulgar. Chaucer thinks he just may know who commissioned this new weapon, an extremely valuable piece of information that some will pay a high price for—and others will kill to conceal. . .

Fires of Hatred-Norman M. Naimark 2002-09-19 Of all the horrors of the last century--perhaps the bloodiest century of the past millennium--ethnic cleansing ranks among the worst. The term burst forth in public discourse in the spring of 1992 as a way to describe Serbian attacks on the Muslims of Bosnia-Herzegovina, but as this landmark book attests, ethnic cleansing is neither new nor likely to cease in our time.

Fire on the Water-Scott MacGregor 2020-05-12 A novel based on a true tale of heroism and invention in the tunnels beneath Lake Erie in 1916 This original graphic novel imagines the lives of blue-collar workers involved in the real-life Lake Erie tunnel disaster of 1916 in Cleveland. Author Scott MacGregor and illustrator Gary Dumm tell the intersecting stories of a brilliant African American inventor, Ben Beltran (based on the real-life Garrett Morgan, Sr.), desperate immigrants tunneling beneath Lake Erie, and corrupt overseers who risk countless lives for profit. As historical fiction, Fire on the Water sheds light not only on one of America’s earliest man-made ecological disasters but also on racism and the economic disparity between classes in the Midwest at the turn of the century.

Hiding in Plain Sight-Sarah Kendzior 2020-04-07 Instant New York Times Bestseller Washington Post Bestseller USA Today Bestseller Indie Bound Bestseller Authors Round the South Bestseller Midwest Indie Bestseller New York Times bestselling author Sarah Kendzior documents the truth about the calculated rise to power of Donald Trump since the 1980s and how the erosion of our liberties made an American demagogue possible. The story of Donald Trump's rise to power is the story of a buried American history - buried because people in power liked it that way. It was visible without being seen, influential without being named, ubiquitous without being overt. Sarah Kendzior's Hiding in Plain Sight pulls back the veil on a history spanning decades, a history of an American autocrat in the making. In doing so, she reveals the inherent fragility of American democracy - how our continual loss of freedom, the rise of consolidated corruption, and the secrets behind a burgeoning autocratic United States have been hiding in plain sight for decades. In Kendzior's signature and celebrated style, she expertly outlines Trump's meteoric rise from the 1980s until today, interlinking key moments of his life with the degradation of the American political system and the continual erosion of our civil liberties by foreign powers. Kendzior also offers a never-before-seen look at her lifelong tendency to be in the wrong place at the wrong time - living in New York through 9/11 and in St. Louis during the Ferguson uprising, and researching media and authoritarianism when Trump emerged using the same tactics as the post-Soviet dictatorships she had long studied. It is a terrible feeling to sense a threat coming, but it is worse when we let apathy, doubt, and fear prevent us from preparing ourselves. Hiding in Plain Sight confronts the injustice we have too long ignored because the truth is the only way forward.

But whose Republic will it be? Senators, generals, and elemental mages vie for the power to shape the future of the city of Aven. Latona of the Vitelliae, a mage of Spirit and Fire, has suppressed her phenomenal talents for fear they would draw unwanted attention from unscrupulous men. Now that the Dictator who threatened her family is gone, she may have an opportunity to seize a greater destiny as a protector of the people—if only she can find the courage to try. Her siblings—a widow who conceals a canny political mind in the guise of a frivolous socialite, a young prophetess learning to navigate a treacherous world, and a military tribune leading a dangerous expedition in the province of Iberia—will be her allies as she builds a place for herself in this new world, against the objections of their father, her husband, and the strictures of Aventan society. Sacred law dictates that no mage may hold high office, but Sempronius, a Shadow mage who has kept his abilities a life-long secret, intends to do just that. As rebellion brews in the provinces, Sempronius must outwit the ruthless leader of the opposing Senate faction to claim the political and military power he needs to secure a glorious future for Aven and his own place in history. As politics draw them together and romance blossoms between them, Latona and Sempronius will use wit, charm, and magic to shape Aven's fate. But when their foes resort to brutal violence and foul sorcery, will their efforts be enough to save the Republic they love?

Reimagining Capitalism in a World on Fire-Rebecca Henderson 2020-04-28 A renowned Harvard professor debunks prevailing orthodoxy with a new intellectual foundation and a practical pathway forward for a system that has lost its moral and ethical foundation in this "powerful" book (Daron Acemoglu). Free market capitalism is one of humanity's greatest inventions and the greatest source of prosperity the world has ever seen. But this success has been costly. Capitalism is on the verge of destroying the planet and destabilizing society as wealth rushes to the top. The time for action is running short. Rebecca Henderson's rigorous research in economics, psychology, and organizational behavior, as well as her many years of work with companies around the world, gives us a path forward. She debunks the worldview that the only purpose of business is to make money and maximize shareholder value. She shows that we have failed to reimagine capitalism so that it is not only an engine of prosperity but also a system that is in harmony with environmental realities, striving for social justice and the demands of truly democratic institutions. Henderson's deep understanding of how change takes place, combined with fascinating in-depth stories of companies that have made the first steps towards reimagining capitalism, provides inspiring insight into what capitalism can be. With rich discussions of how the worlds of finance, governance, and leadership must also evolve, Henderson provides the pragmatic foundation for navigating a world faced with unprecedented challenge, but also with extraordinary opportunity for those who can get it right.

Catching Fire-Richard W. Wrangham 2010 In this stunningly original book, Richard Wrangham argues that it was cooking that caused the extraordinary transformation of our ancestors from apelike beings to Homo erectus. At the heart of Catching Fire lies an explosive new idea: the habit of eating cooked rather than raw food permitted the digestive tract to shrink and the human brain to grow, helped structure human society, and created the male-female division of labour. As our ancestors adapted to using fire, humans emerged as "the cooking apes". Covering everything from food-labelling and overweight pets to raw-food faddists, Catching Fire offers a startlingly original argument about how we came to be the social, intelligent, and sexual species we are today. "This notion is surprising, fresh and, in the hands of Richard Wrangham, utterly persuasive ... Big, new ideas do not come along often in evolution these days, but this is one." -Matt Ridley, author of Genome

Out of the Flames-Lawrence Goldstone 2008-12-10 Out of the Flames is an extraordinary story - providing testament to the power of ideas, the enduring legacy of books, and the triumph of individual courage. Out of the Flames tracks the history of The Christianismi Restituto, examining Michael Servetus's life and times and the politics of the first information during the sixteenth century. The Christianismi Restituto, a heretical work of biblical scholarship, written in 1553, aimed to refute the orthodox Christianity that Michael Servetus' old colleague, John Calvin, supported. After the book spread through the ranks of Protestant hierarchy, Servetus was tried and agonizingly burned at the stake, the last known copy of the Restitutio chained to his leg. Servetus's execution marked a turning point in the quest for freedom of expression, due largely to the development of the printing press and the proliferation of books in Renaissance Europe. Three copies of the Restitutio managed to survive the burning, despite every effort on the part of his enemies to destroy them. As a result, the book became almost a surrogate for its author, going into hiding and relying on covert distribution until it could be read freely, centuries later. Lawrence and Nancy Goldstone follow the clandestine journey of the three copies through the subsequent centuries and explore its author's legacy and influence over the thinkers that shared his spirit and genius, such as Leibniz, Voltaire, Rousseau, Jefferson, Clarence Darrow, and William Osler.

The Grimke's daughter, Sarah, has known from an early age she is meant to do something large in the world, but she is hemmed in by the limits imposed on women. Fire Alarm-Michael Lowy 2016-10-04 This illuminating study of Benjamin's final essay helps unlock the mystery of this great philosopher Revolutionary critic of the philosophy of progress, nostalgic of the past yet dreaming of the future, romantic partisan of materialism—Walter Benjamin is in every sense of the word an "unclassifiable" philosopher. His essay "On the Concept of History" was written in a state of urgency, as he attempted to escape the Gestapo in 1940, before finally committing suicide. In this scrupulous, clear and fascinating examination of this essay, Michael Löwy argues that it remains one of the most important philosophical and political writings of the twentieth century. Looking in detail at Benjamin's celebrated but often mysterious text, and restoring the philosophical, theological and political context, Löwy highlights the complex relationship between redemption and revolution in Benjamin's philosophy of history.

In this informative book, Gene Barretta brings Benjamin Franklin's genius to life, deepening our appreciation for one of the most influential figures in American history. Now & Ben is a 2007 Bank Street - Best Children's Book of the Year. The Invention of Craft-Glenn Adamson 2019-01-10 Glenn Adamson's last book, Thinking Through Craft, offered an influential account of craft's position within modern and contemporary art. Now, in his engaging sequel, The Invention of Craft, his theoretical discussion of skilled work is extended back in time and across numerous disciplines. Adamson searches out the origins of modern craft, locating its emergence in the period of the industrial revolution. He demonstrates how craft was invented as industry's "other", a necessary counterpart to ideas of progress and upheaval. In the process, the magical and secretive culture of artisans was gradually dominated through division and explication. This left craft with an oppositional stance, a traditional or anti-modern position. The Invention of Craft ranges widely across media, from lock-making, wood-carving and iron-casting to fashion, architecture and design. It also moves back and forth between periods, from the 18th century to the present day, demonstrating how contemporary practice can be informed through the study of modern craft in its moment of invention.

A Wrinkle in Time-Madeleine L'Engle 2019-07-18 A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.
