YEARS OF THE FOREST-Helen Hoover 2013-08-28 This is a book that takes us inside the Hoovers' wilderness home during those sixteen Years of the Forest and lets us experience not only the joys and the techniques but also the challenges and travails of going it alone in the beautiful but not always accommodating wilderness, far from the technology and services that city people take for granted. It is a

book of wilderness adventure, it is an education in the ingenuities of wilderness housekeeping, filled with practical details about making do, building and rebuilding, gardening for fun and for food, even advice about getting away from getting-away-from-it-all. Good times and Hard times, good neighbors and bad neighbors, the strains engendered by conflicting views—and passions—about the use of the environment: Mrs. Hoover shares her experience without stint. But above all—over, under, and all around her straightforward and practical approach to life in the wilderness—there is, as always, the sensitive and moving awareness of nature (especially of the animals with whom she and her husband shared the forest, often helping them through starving winters) that is the special quality of her writing and her life.

Freakonomics-Steven D. Levitt 2011-09-20 Which is more dangerous, a gun or a swimming pool? What do schoolteachers and sumo wrestlers have in common? How much do parents really matter? These may not sound like typical questions for an economist to ask. But Steven D. Levitt is not a typical economist. He studies the riddles of everyday life--from cheating and crime to parenting and sports--and reaches conclusions that turn conventional wisdom on its head. Freakonomics is a groundbreaking collaboration between Levitt and Stephen J. Dubner, an award-winning author and journalist. They set out to explore the inner workings of a crack gang, the truth about real estate agents, the secrets of the Ku Klux Klan, and much more. Through forceful storytelling and wry insight, they show that economics is, at root, the study of incentives--how people get what they want or need, especially when other people want or need the same thing.
