Dying, Death, and Grief in an Online Universe-Paul Gilbert, FBPsS

2012-02-09 "[This book] is an excellent resource for the diverse practitioners and educators who are involved in this nascent area."--

Cruse Bereavement Care "[This] book is innovative and timely,

challenging the reader to think 'out of the box.' Sofka, Cupit, and

Gilbert provide a framework to explore thanatology in an online

universe while encouraging continuous research to adapt to this

ever-changing digital world."--Death Studies "Historically we have

always employed our foremost technology in the service of the dead.

We have used whatever we had at our disposal to mourn, to

support, to share memories and to tell stories. Carla J. Sofka, Illene

Noppe Cupit, and Kathleen R. Gilbert reaffirm that principle

reminding us that this new digital world both offers dramatic

technologies and creates considerable opportunities to deal with

dying, death, and grief. The editors are extraordinarily sensitive to

the multiple ways that this new technology has impacted upon the

death system or the ways that a society organizes behavior around

dying and death. Dying, Death, and Grief in an Online Universe is

bound to be a classic." Kenneth J Doka, PhD Professor, The College

of New Rochelle Senior Consultant, The Hospice Foundation of

America Modern communication technology has profoundly

influenced societal practices and views about dying, death, and loss.

This text, written for death educators, clinicians, researchers, and

students of thanatology, provides current information about "thanatechnology," the communication technology used in providing death education, grief counseling, and thanatology research. The book offers a broad overview of how the communication technology revolution affects individuals coping with end-of-life issues, death-related and non-death loss and grief, and implications of the "digital divide" between those who are knowledgeable about and have access to modern technology, and those who are not. It describes the proliferation of online support groups and social network sites to cope with loss, and mechanisms for the memorialization and commemoration of loss. It also highlights blogging as a mechanism for storytelling and SKYPE as a communication tool during times of loss and grief. The unique issue of disenfranchised grief experienced by online community members is also explored along with ethical issues. Appendices provide guidance regarding the online availability of different types of informational support, tools to evaluate the integrity of online resources, and ethical standards. Key Features: Examines the ways in which modern communication technology has revolutionized societal practices and views about dying, death, and loss Offers time-tested strategies for providing death education online Addresses ethical issues related to availability and use of technology Explores the implications of the "digital divide" between technology and non-technology users in relation to issues of death and loss Analyzes how technology has shaped and changed thanatology research

Awareness, Verbal Ability in English, Numerical Ability, Reasoning and Military Aptitude Test (including Spatial Reasoning). • Detailed theory along with solved examples and short-cuts to solve problems; • The Verbal Ability in English section also covers the Cloze Test as asked in the past exam. • The General Awareness section (thoroughly updated) covers questions on Current Affairs, Sports, Defence, History, Geography, General Politics, Basic Science, Arts & Culture etc. • The Reasoning and Military Aptitude section includes Verbal and Non-verbal Reasoning, Spatial Ability, Rotated Blocks, Hidden Figures etc.. • An exhaustive question bank has been provided at the end of each chapter in the form of an exercise. Solutions to the exercise have been provided at the end of each chapter.

Handbook of the Economics of International Migration-Barry Chiswick 2014-12-08 The economic literature on international migration interests policymakers as well as academics throughout the social sciences. These volumes, the first of a new subseries in the Handbooks in Economics, describe and analyze scholarship created since the inception of serious attention began in the late 1970s. This literature appears in the general economics journals, in various field journals in economics (especially, but not exclusively, those covering labor market and human resource issues), in interdisciplinary immigration journals, and in papers by economists published in journals associated with history, sociology, political science, demography, and linguistics, among others. Covers a range of topics from labor market outcomes and fiscal consequences to the effects of international migration on the level and distribution of income - and everything in between. Encompasses a wide range of topics related to migration and is multidisciplinary in some aspects, which is crucial on the topic of migration Appeals to a large community of scholars interested in this topic and for whom no overviews or summaries exist

The Geography of Transport Systems-Jean-Paul Rodrigue

2013-07-18 Mobility is fundamental to economic and social activities

Downloaded from www.jaremicarey.com

such as commuting, manufacturing, or supplying energy. Each movement has an origin, a potential set of intermediate locations, a destination, and a nature which is linked with geographical attributes. Transport systems composed of infrastructures, modes and terminals are so embedded in the socio-economic life of individuals, institutions and corporations that they are often invisible to the consumer. This is paradoxical as the perceived invisibility of transportation is derived from its efficiency. Understanding how mobility is linked with geography is main the purpose of this book. The third edition of *The Geography of Transport Systems* has been revised and updated to provide an overview of the spatial aspects of transportation. This text provides greater discussion of security, energy, green logistics, as well as new and updated case studies, a revised content structure, and new figures. Each chapter covers a specific conceptual dimension including networks, modes, terminals, freight transportation, urban transportation and environmental impacts. A final chapter contains core methodologies linked with transport geography such as accessibility, spatial interactions, graph theory and Geographic Information Systems for transportation (GIS-T). This book provides a comprehensive and accessible introduction to the field, with a broad overview of its concepts, methods, and areas of application. The accompanying website for this text contains a useful additional material, including digital maps, PowerPoint slides, databases, and links to further reading and websites. The website can be accessed at: <http://people.hofstra.edu/geotrans> This text is an essential resource for undergraduates studying transport geography, as well as those interest in economic and urban geography, transport planning and engineering.

The Bookseller- 1894

Doing Gender, Doing Geography-Saraswati Raju 2012-12-06 Until the 1970s gender had been invisible in analyses of social space and place in the androcentric discipline of geography. While recent contributions to feminist geography have challenged this, in India the engagement of geographers with gender, by being conservative in its choice of focus and orthodox in methodology, has been unable to destabilise the established disciplinary order. However, with younger scholars becoming increasingly interested in studying

Downloaded from
jaremicarey.com on

gender in geography, novel and innovative methods that include combinations of quantitative and qualitative analyses, visual sources and in-depth case studies are being tried out and accepted in geography despite its masculine legacy. This pioneering study brings together Indian geographers' contributions to understanding gender, and through them, seeks to enrich the discipline of geography. It engages with the recent 'spatial turn' in the social sciences, which has reclaimed the explanatory power of space and place in social theory that had been nearly lost to deconstructive postmodernist scholarship. The volume draws entirely from the Indian scholarship, showcasing contextualised knowledge production, but hopes to initiate a dialogue with scholars elsewhere working with feminist methodologies.

O Level Topical Geography- 2011 Provides a thorough revision for students taking the GCE O' Level Geography Examination. Past examination questions have been carefully classified into the relevant topics to enable students to revise and practise systematically.

Fundamentals of Physical Geography-James F. Petersen 2011

FUNDAMENTALS OF PHYSICAL GEOGRAPHY, International Edition uses the combined expertise of three respected geographers to show how Earth's physical geography impacts humans, and how humans impact Earth's physical geography. The text emphasizes three essential themes to demonstrate the major roles for the discipline—Geography from a Physical Science perspective, Geography from a Spatial perspective, and Geography from an Environmental perspective. With a focus on examining relationships and processes among Earth systems, this text helps students understand like never before how the various systems interrelate and how humans are an integral aspect of geography. The human-environment relationship and the importance of conservation

prevalent themes. This new title offers thorough coverage of physical geography in a concise, well-organized structure, making it feasible to cover all topics in a one-semester course, and approachable for all students, especially those who are new to the concepts presented herein.

Suburban Governance-Pierre Hamel 2015-02-05 North American gated communities, African squatter settlements, European housing estates, and Chinese urban villages all share one thing in common: they represent types of suburban space. As suburban growth becomes the dominant urban process of the twenty-first century, its governance poses an increasingly pressing set of global challenges. In *Suburban Governance: A Global View*, editors Pierre Hamel and Roger Keil have assembled a groundbreaking set of essays by leading urban scholars that assess how governance regulates the creation of the world's suburban spaces and everyday life within them. With contributors from ten countries on five continents, this collection covers the full breadth of contemporary developments in suburban governance. Examining the classic North American model of suburbia, contemporary alternatives in Europe and Latin America, and the emerging suburbanisms of Africa and Asia, *Suburban Governance* offers a strong analytical introduction to a vital topic in contemporary urban studies.
