Safe Spaces-Cornelia Roux 2012-10-26 This book examines the crucial issues affecting Human Rights Education in contexts of culture, religious and societal diversity. It exhibits an impressive scholarly achievement, capturing and combining the insights of both established academics and emerging researchers. Each author succeeds in distilling the knowledge of their particular fields of interest, as well as conveying the essence of their intuitive understanding and the richness of the context. This book considers a variety of connected content and methodological issues in three major sections: 'Philosophical and policy perspectives', 'Gender discourses: diverse perspectives' and 'Discourses on narratives as safe spaces'. The Edition is further strengthened by allowing international reviewers the opportunity of engaging with the contributors in the Introduction and Conclusion, an innovative departure from conventional formats and which will provide a global perspective to the readers. The focus of the various chapters succeeds in establishing both a foundation and platform for dialogue surrounding human rights and human rights education in modern policy and governance. Aptly named "Safe Spaces", the Edition offers in-depth and credible ("safe") nuances ("spaces"), in terms of the somewhat reified concept of human rights, at a time when human rights remains a highly topical and contested international issue. As such, the book imparts an immense scope of theoretical and empirical perspectives, reflected by the distinguished intellectuals who navigate the terrain of their respective disciplines with profound erudition. This book represents a collaborative effort of immeasurable value. This exemplary edition is both timeous, and will prove timeless.

Handbook of African Medicinal Plants, Second Edition-Maurice M. Iwu 2014-02-04 With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

Chaka-Thomas Mofolo 2013-05-21 Chaka is a genuine masterpiece that represents one of the earliest major contributions of black Africa to the corpus of modern world literature. Mofolos fictionalized life-story account of Chaka (Shaka), translated from Sesotho by D. P. Kunene, begins with the future Zulu kings birth followed by the unwarranted taunts and abuse he receives during childhood and adolescence. The author manipulates events leading to Chakas status of great Zulu warrior, conqueror, and king to emphasize classic tragedys psychological themes of ambition and power, cruelty, and ultimate ruin. Mofolos clever nods to the supernatural add symbolic value. Kunenes fine translation renders the dramatic and tragic tensions in Mofolos tale palpable as the richness of the authors own culture is revealed. A substantial introduction by the translator provides valuable context for modern readers.

Occupational Science-Gail E. Whiteford 2012-02-13 "The book begins with a comprehensive review of the current literature and the knowledge generated to date. Reasons for the field's limited impact are proposed, including its focus on individuals rather than groups and communities, its psychological view of occupation, and its narrow focus on socially approved occupations. Global realities such as poverty, anti-social behaviour and ageing populations are discussed and implications for action are considered. The second section of the books comprises a series of chapters that address the philosophical, theoretical and scientific bases that underpin and inform everyday decision making in occupational therapy practice. This is followed by a section on methodological and structural considerations. The concluding chapter offers a critical reflection on methods, strategies, values and relationships for the future, to achieve a relevant science that makes a difference to current occupational realities. Written by an internationally renowned team of contributors, this book offers a truly comprehensive critique of the field. "--Publisher.

Multilingual Education for South Africa-Kathleen Heugh 1995 This publication sets out to give content to the debate about multilingual education by providing both a conceptual framework and example of successful practice in bi/multilingual classrooms. Based on the firm belief in the maintenance and development of first-language medium of instruction throughout schooling, and on the need to learn at least a second language, the book argues strongly in favour of a policy of additive bi/multilingualism for formal schooling.

The Pedi-Hermann Otto Mönnig 1967 At the inaugural meeting in 1932 of the South African Inter-University Committee on African Studies a sub-committee was appointed to review the state of ethnographic work, and to plan a programme of future research. Of the four initial projects planned by the sub-committee one was a study of the Pedi. This work was to be undertaken by Dr. W.W.M. Eiselen, one of the most promising of South African anthropologists who, born and brought up among the Pedi as the son of a missionary in Sekhukhuneland, was ideally equipped for the work. Unfortunately Dr. Eiselen could not complete this task since he soon left his academic post to embark on a career in the Public Service. This left a gap in South African ethnographic literature which has never been filled; all other major ethnic groups in South Africa have been well documented by basic descriptive works. For a number of reasons it was felt that this gap had to be filled, and in this book the author hopes to offer a reasonably full and accurate ethnography of the Pedi.
