The Heart and the Fist-Eric Greitens 2011-04-11 THE HEART AND THE FIST shares one man’s story of extraordinary leadership and service as both a humanitarian and a warrior. In a life lived at the raw edges of the human experience, Greitens has seen what can be accomplished when compassion and courage come together in meaningful service. As a Rhodes Scholar and Navy SEAL, Greitens worked alongside volunteers who taught art to street children in Bolivia and led US Marines who hunted terrorists in Iraq. He’s learned from nuns who fed the destitute in one of Mother Teresa’s homes for the dying in India, from aid workers who healed orphaned children in Rwanda, and from Navy SEALs who fought in Afghanistan. He excelled at the hardest military training in the world, and today he works with severely wounded and disabled veterans who are rebuilding their lives as community leaders at home. Greitens offers each of us a new way of thinking about living a meaningful life. We learn that to win any war, even those we wage against ourselves; to create and obtain lasting peace; to save a life; and even, simply to live with purpose requires us—every one of us—to be both good and strong.

Digital Libraries: International Collaboration and Cross-Fertilization-Zhaoneng Chen 2004-11-29 The International Conference on Asian Digital Libraries (ICADL) is an annual international forum that provides opportunities for librarians, researchers and experts to exchange their research results, innovative ideas, service experiences and state-- the-art developments in the field of digital libraries. Building on the success of the first six ICADL conferences, the 7th ICADL conference hosted by the Shanghai Jiao Tong University and the Shanghai Library in Shanghai, China aimed to further strengthen the academic collaboration and strategic alliance in the Asia- Pacific Region in the development of digital libraries. The theme of ICADL 2004 was: Digital library: International Collaboration and Cross-fertilization, with its focus on technology, services, management and localization. The conference began with an opening ceremony and the conference program featured 9 keynote speeches and 5 invited speeches by local and international experts. During the 3-day program, 40 research paper presentations were given in 3 parallel sessions. The conference also included 6 tutorials and an exhibition. The conference received 359 submissions, comprising 248 full papers and 111 short papers. Each paper was carefully reviewed by the Program Committee members. Finally, 44 full papers, 15 short papers and 37 poster papers were selected. On behalf of the Organizing and Program Committees of ICADL 2004, we would like to express our appreciation to all authors and attendees for participating in the conference. We also thank the sponsors, Program Committee members, supporting organizations and helpers for making the conference a success. Without their efforts, the conference would not have been possible.

The Professor Is In-Karen Kelsky 2015-08-04 The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor Is In, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right The Professor Is In addresses all of these issues, and many more.

A Manual for Writers of Research Papers, Theses, and Dissertations, Ninth Edition-Kate L. Turabian 2018-04-27 When Kate L. Turabian first put her famous guidelines to paper, she could hardly have imagined the world in which today’s students would be conducting research. Yet while the ways in which we research and compose papers may have changed, the fundamentals remain the same: writers need to have a strong research question, construct an evidence-based argument, cite their sources, and structure their work in a logical way. A Manual for Writers of Research Papers, Theses, and Dissertations—also known as “Turabian”—remains one of the most popular books for writers because of its timeless focus on achieving these goals. This new edition filters decades of expertise into modern standards. While previous editions incorporated digital forms of research and writing, this edition goes even further to build information literacy, recognizing that most students will be doing their work largely or entirely online and on screens. Chapters include updated advice on finding, evaluating, and citing a wide range of digital sources and also recognize the evolving use of software for citation management, graphics, and paper format and submission. The ninth edition is fully aligned with the recently released Chicago Manual of Style, 17th edition, as well as with the latest edition of The Craft of Research. Teachers and users of the previous editions will recognize the familiar three-part structure. Part 1 covers every step of the research and writing process, including drafting and revising. Part 2 offers a comprehensive guide to Chicago’s two methods of source citation: notes-bibliography and author-date. Part 3 gets into matters of editorial style and the correct way to present quotations and visual material. A Manual for Writers also covers an issue familiar to writers of all levels: how to conquer the fear of tackling a major writing project. Through eight decades and millions of copies, A Manual for Writers has helped generations shape their ideas into compelling research papers. This new edition will continue to be the gold standard for college and graduate students in virtually all academic disciplines.

How to Write the Perfect Personal Statement-Mark Alan Stewart 2012-03-26 The admissions process for law, business, medical, or graduate school is more competitive today than ever before. Peterson's How to Write the Perfect Personal Statement provides essential tips on how to create and write personal statements that respond to the questions that appear on the applications of many popular graduate schools. Putting Auction Theory to Work-Paul Milgrom 2004-01-12 This book provides a comprehensive introduction to modern auction theory and its important new applications. It is written by a leading economic theorist whose suggestions guided the creation of the new spectrum auction designs. Aimed at graduate students and professionals in economics, the book gives the most up-to-date treatments of both traditional theories of 'optimal auctions' and newer theories of multi-unit auctions and package auctions, and shows by example how these theories are used. The analysis explores the limitations of prominent older designs, such as the Vickrey auction design, and evaluates the practical responses to those limitations. It explores the tension between the traditional theory of auctions with a fixed set of bidders, in which the seller seeks to squeeze as much revenue as possible from the fixed set, and the theory of auctions with endogenous entry, in which bidder profits must be respected to encourage participation. The Message-Eugene H. Peterson 2017-10 Improved design and enhanced features make this version of The Message Numbered Edition the contemporary translation of choice. This regular size Message features: • Handcrafted maps and charts • Satin ribbon marker Trim size: 6 x 9 3/16

National Healing-Claude Hurlbert 2013-02-01 In National Healing, author Claude Hurlbert persuasively relates nationalism to institutional racism and contends that these are both symptoms of a national ill health afflicting American higher education and found even in the field of writing studies. Teachers and scholars, even in progressive fields like composition, are unwittingly at odds with their own most liberatory purposes, he says, and he advocates consciously broadening our understanding of rhetoric and writing instruction to include rhetorical traditions of non-Western cultures. Threading a personal narrative of his own experiences as a student, professor, and citizen through a wide ranging discussion of theory, pedagogy, and philosophy in the writing classroom, Hurlbert weaves a vision that moves beyond simple polemic and simplistic multiculturalism. National Healing offers a compelling new aesthetic, epistemological, and rhetorical configuration.

Closing the Circle-Sean A. Walmsley 2008-03-07 In Closing the Circle, Sean Walmsley offers education practitioners at all levels—district and school administrators, curriculum supervisors, staff developers, literacy coaches, classroom teachers, and special education teachers—a coherent framework along with practical advice for setting K-12 language arts expectations and for effectively guiding instruction, assessment, reporting, and data analysis. Distilled from the author's extensive experience working with schools and districts, the framework enables educators to prioritize literacy learning and work together more productively to achieve better literacy outcomes for all students. The innovative framework includes five major elements: (1) a set of clearly defined literacy attributes (concise expectations for what students should know, do, understand, and experience in the language arts); (2) instructional contributions that best support students, including struggling learners, in acquiring the attributes; (3) appropriate assessments for tracking students' progress; (4) reporting practices that clearly explain the progress achieved; and (5) rigorous analysis of data to inform instruction. The model embraces a broad conception of literacy and includes expectations for reading, writing, listening, and speaking as well as viewing and representing,

making it especially suitable for learning in the digital era.

State Government and Economic Performance-Paul Brace 1994-08 Despite abundant conjecture in the scholarly community, and heated rhetoric in state capitols throughout the land, there is remarkably little evidence that state governments can have any effect at all on the economic performance of their states. Working from a broadened historical perspective, and employing political and economic analysis, Paul Brace places the states and their economies in a more understandable light in State Government and Economic Performance. Over time the states have manifested differing degrees of economic activism with notable success. For much of the twentieth century, the dominance of the federal government and the extensive reach of the national economy overwhelmed state-level economic efforts. By the end of the 1970s, however, states began to show greater diversity in their economic performance. Beginning in the Reagan administration, shifting federal priorities and declining resources from Washington forced states to be increasingly self-reliant. In this new, more challenging environment, state-level activism reemerges as an important influence on income growth. The book concerns the economic fortunes of all states, but turns to four case studies to describe in depth how states have responded to economic and political challenges since the 1960s. For example, Arizona and Texas enjoyed booms, but this prosperity was due to forces outside their boundaries. Their traditions of weak government and minimal intervention served them well when the national economy was expanding, yet they were unprepared to stimulate their own economic development in the more challenging environment of the 1980s. Michigan and New York, which initially experienced slow growth, managed to stimulate economic performance because of strong government apparatus and interest - although they too were seriously challenged as the national economy slowed in the early 1990s. These contrasting experiences allow Brace to propose a model for evaluating the economic impact of state government and policy in a changing national economic context. Brace observes that the institutional characteristics of states, the policies they adopt, and their levels of taxation all have statistically discernible effects on their rates of growth in income, but little impact on employment or manufacturing growth. "In essence", he writes, "the institutionally more powerful, entrepreneurial state has been better suited to sustain income in the changing environment of the 1980s". At the same time, however, income growth may serve to retard other forms of growth, most notably in jobs, because of the mobility of capital and labor between the states. Because of this, the states face formidable, even insurmountable, structural barriers to self-sustained economic development. As open economies they are extremely sensitive to competition from other jurisdictions, and ultimately this undermines long-range intervention by the states.

Post-polio Syndrome-Julie K. Silver 2001 The effects of polio that occur decades after the disease has run its course--weakness, fatigue, pain, intolerance to cold, difficulty with breathing and swallowing--are often more devastating than the original disease. This book on the diagnosis and management of polio-related health problems is an essential resource for polio survivors and their families and health care providers. Dr. Julie K. Silver, who has both personal and professional experience with post-polio syndrome, begins the book by defining and describing PPS and providing a historical overview of its diagnosis and treatment. Chapters that follow discuss finding good medical care, dealing with symptoms, maintaining proper nutrition and weight, preventing osteoporosis and falls, and sustaining mobility. Dr. Silver reviews the latest in braces, shoes, assistive devices, and wheelchairs and scooters. She also explores issues involving managing pain, surgery, complementary and alternative medicine, safe and comfortable living environments, insurance and disability, and sex and intimacy.

57 Ways to Screw Up in Grad School-Kevin D. Haggerty 2015-08-15 Every year almost half a million people start a graduate program of some sort. For many, grad school is the critical step toward a career as a researcher or teacher in higher education. Others might be pursuing a masters or a doctorate for personal fulfillment or to obtain the skills and credentials for a career outside the academy. No matter which group you are in, this book provides brilliant and unflinching advice about how to make a disaster out of graduate school. Kevin D. Haggerty and Aaron Doyle--two veteran directors of graduate programs and recipients of mentoring awards--have seen it all, the good and the bad. Here in this funny and shrewd book they lay out the fifty-seven ways to screw up grad school...so that you can avoid them. Their litanies of foul-ups are organized by theme and cover the grad school experience from beginning to end: from how to select your university and program, to your interactions with your advisor, committee, and fellow students, to balancing your personal and academic lives, through the pitfalls of completing your thesis and hunting for a job or postdoctoral fellowship. Although the authors guarantee that following their 57 step program will result in a spectacular crash and burn, their primary goal is to breathe some life and humor into a concise, accessible, and engaging guide for students and potential students on how to navigate and ultimately succeed in graduate school.
