Superintendent Performance Evaluation: Current Practice and Directions for Improvement-I. Carl Candoli 2012-12-06 Every school district needs a system of sound superintendent performance evaluation. School district superintendents are and must be accountable to their school boards, communities, faculties, and students for delivering effective educational leadership. To assure that they are evaluated fairly, competently, and functionally, superintendents need to help their school boards plan and implement evaluation systems that adhere to the evaluation standards. Superintendent Performance Evaluation outlines some of the problems and deficiencies in current evaluation practice and offers professionally-based leads for strengthening or replacing superintendent performance evaluation systems. This book focuses on the on-the-job performance of school district superintendents as they implement school board policy. The decision to focus on performance evaluation reflects the importance of this kind of evaluation in the move to raise educational standards and improve educational accountability. Boards and superintendents are advised to make superintendent performance evaluation an integral part of the district's larger system for evaluating district needs, plans, processes, and accomplishments.

Hunley traces launch-vehicle technology from Goddard's early rockets through the Titan IVA and the Space Shuttle, with a focus on space-launch vehicles. Focusing especially on the engineering culture of the program, Hunley communicates the very human side of technological development by means of anecdotes, character sketches, and case studies of problems faced by rocket engineers. African Rain Forest Ecology and Conservation-William Weber 2001 Extending from west Africa to Madagascar, from the vast lowland Congo Basin to the archipelago of forest islands on its eastern rim, the African rain forest is surpassed in size only by the Amazon. This book sheds light on the current efforts to understand and conserve the African rain forest, an area in need of urgent action to save its biological wealth, cultural heritage, and economic potential. Written by conservation scientists and practitioners based in the African rain forest, the book offers a multidisciplinary perspective that integrates many biological and social sciences. Early chapters trace the forces--from paleoecological factors to recent human actions--that have shaped the African forest environment. The next chapters discuss the dominant biological patterns of species ranging from the distinctive elephants, gorillas, and okapi to the less well known birds, butterflies, and amphibians. Other chapters focus on how such different groups as hunter-gatherers, forest farmers, bushmeat hunters, recent immigrants, and commercial foresters have used the forests. Several authors stress the need for tighter links between research and conservation action. The final section draws lessons from the collective experience of those working in an Africa wracked by political strife and economic hardship.

In this New York Times bestselling biography, Chris Matthews answers that question with the verve of a novelist. American: People have often wondered what makes America truly great. In American, Matthews explores the best America stands for and portrays our country as a beacon for the modern world. American-Chris Matthews 2013-10-01 From Chris Matthews, host of MSNBC's Hardball and NBC's The Chris Matthews Show, and New York Times bestselling author of Now, Let Me Tell You What I Really Think, comes a definitive work on the lifeblood of America -- its enduring spirit. People have often wondered what makes America truly great. With a citizenry of vastly different races, religions, cultures, and ethnic backgrounds, what intangible bond unites and defines us as "Americans"? In his own inimitable style, Chris Matthews offers a portrait of a country born of contradictions. We are a people reluctant to fight, who become ferocious when threatened or attacked. We are a deeply practical nation, yet we stand as the world's great optimists. Inherently suspicious of governmental power, we still embrace our flag in times of danger. Fiercely independent, in love with freedom, and eager to face the future, we are like no other people on earth. Matthews asserts that our greatest strength is a set of distinct notions that comprise our national character. The self-made man. The reluctant warrior. The lone hero. We celebrate them in our popular culture and throughout our history, from 1776 to 9/11. In American, Matthews explores the best America stands for and portrays our country as a beacon for the modern world -- unafraid of challenges, moving ever forward, and ready and willing to prevail.
