Physiology of Sport and Exercise Test Bank-Jack H. Wilmore 1995-11-01

A Military History of Canada-Desmond Morton 1992 Is Canada really "a peaceable kingdom" with "an unmilitary people"? Desmond Morton says no. This is a country that has been shaped, divided, and transformed by war - there is no greater influence in Canadian history, recent or remote. Through the Cold War, the Gulf War, and after, Canadians had to make difficult decisions about defence and foreign policy, and these events have shaped the country, developing our industries, changing the role of women, realigning our political factions, and changing Canada's status in the world.

All the Bright Company of Heaven-Renny Richardson 2011-09-01 The forgotten story of the Cook family, Crawley and the Great War.

Food Will Win the War-Ian Mosby 2014-05-21 During the Second World War, as Canada struggled to provide its allies with food, public health officials warned that malnutrition could derail the war effort. Posters admonished Canadians to "Eat Right" because "Canada Needs You Strong" while cookbooks helped housewives become "housoldiers" through food rationing, menu substitutions, and household production. Ian Mosby explores the symbolic and material transformations that food and eating underwent as the Canadian state took unprecedented steps into the kitchens of the nation, changing the way women cooked, what their families ate, and how people thought about food. Canadians, in turn, rallied around food and nutrition to articulate new visions of citizenship for a new peacetime social order.

As an author, he has proved equally popular: With combined sales of more than two million copies, Carlin's three books of razor-sharp and hilarious observations have topped bestseller lists nationwide. Now, just in time for the holidays, Hyperion proudly collects all three volumes -- When Will Jesus Bring the Pork Chops, Napalm and Silly Putty, and Brain Droppings - into one hilarious omnibus, a slipcased edition that also includes new material.

Thermodynamics and Statistical Mechanics-Robert J. Hardy 2014-06-12 This textbook brings together the fundamentals of the macroscopic and microscopic aspects of thermal physics by presenting thermodynamics and statistical mechanics as complementary theories based on small numbers of postulates. The book is designed to give the instructor flexibility in structuring courses for advanced undergraduates and/or beginning graduate students and is written on the principle that a good text should also be a good reference. The presentation of thermodynamics follows the logic of Clausius and Kelvin while relating the concepts involved to familiar phenomena and the modern student's knowledge of the atomic nature of matter. Another unique aspect of the book is the treatment of the mathematics involved. The essential mathematical concepts are briefly reviewed before using them, and the similarity of the mathematics to that employed in other fields of physics is emphasized. The text gives in depth treatments of low density gases, harmonic solids, magnetic and dielectric materials, phase transitions, and the concept of entropy. The microcanonical, canonical, and grand canonical ensembles of statistical mechanics are derived and used as the starting point for the analysis of fluctuations, blackbody radiation, the Maxwell distribution, Fermi-Dirac statistics, Bose-Einstein condensation, and the statistical basis of computer simulations. Supplementary material including PowerPoint slides and detailed worked solutions can be downloaded online at <http://booksupport.wiley.com>

Out of Concealment-Terri-Lynn Williams-Davidson 2017-06-01 A stunning collection of powerful and whimsical photo collages celebrating supernatural female beings rooted in Haida culture. Out of Concealment presents the origin stories of the Haida Nation through the vibrant depiction of its female supernatural beings. Passed on from generation to generation through oral tradition, these stories are important historical narratives that illustrate the Haida's values, customs, rituals, and relationships with the earthly and metaphysical realms. It is said that in Haida Gwaii, people recognize these supernatural beings all around them. This book features over thirty full-colour surreal photo collages by Haida artist, performer, and activist Terri-Lynn Williams-Davidson. The collages also integrate traditional Haida form-line art by Robert Davidson. Each image is accompanied by insightful, reflective text describing the being's place in Haida mythology. Out of Concealment encourages readers—both within the Haida Nation and the general public—to see the feminine and the powerful land and seascapes of Haida Gwaii through a worldview where the environment is worthy of respect, not to be dominated or exploited. The book is being released to coincide with a larger exhibition of Williams-Davidson's work at the Haida Gwaii Museum in June 2017.
