Healing Invisible Wounds-Richard F. Mollica 2008-12-29 In these personal reflections on his thirty years of clinical work with victims of genocide, torture, and abuse in the United States, Cambodia, Bosnia, and other parts of the world, Richard Mollica describes the surprising capacity of traumatized people to heal themselves. Here is how Neil Boothby, Director of the Program on Forced Migration and Health at the Mailman School of Public Health, Columbia University, describes the book: "Mollica provides a wealth of ethnographic and clinical evidence that suggests the human capacity to heal is innate--that the 'survival instinct' extends beyond the physical to include the psychological as well. He enables us to see how recovery from 'traumatic life events' needs to be viewed primarily as a 'mystery' to be listened to and explored, rather than solely as a 'problem' to be identified and solved. Healing involves a quest for meaning--with all of its emotional, cultural, religious, spiritual and existential attendants--even when biochemical reactions are also operative." Healing Invisible Wounds reveals how trauma survivors, through the telling of their stories, teach all of us how to deal with the tragic events of everyday life. Mollica's important discovery that humiliation--an instrument of violence that also leads to anger and despair--can be transformed through his therapeutic project into solace and redemption is a remarkable new contribution to survivors and clinicians. This book reveals how in every society we have to move away from viewing trauma survivors as "broken people" and "outcasts" to seeing them as courageous people actively contributing to larger social goals. When violence occurs, there is damage not only to individuals but to entire societies, and to the world. Through the journey of self-healing that survivors make, they enable the rest of us not only as individuals but as entire communities to recover from injury in a violent world.

Total Renewal-Frank Lipman 2004-12-16 In terms of health, most of us live at 50 percent of our capacity. Total Renewal takes us the rest of the way there. To varying degrees, we all suffer from digestive disorders, low-grade toxicity, or fluctuating blood sugar levels. While not ballooning into full-fledged diseases, these conditions limit our enjoyment of life and prefigure illnesses that loom in our future. Consisting of seven steps, Dr. Frank Lipman's Total Renewal Program is the key to reversing the unhealthy habits and poor functioning that we have slowly developed and accepted over the course of our lives. The program replaces them with new behaviors that leave us stronger, healthier, and more durable. Dr. Lipman's seven steps are: 1. Take Responsibility for Your Health and Well-Being 2. Remove Toxins and Decrease Your Total Load 3. Recognize Your Unique Diet 4. Replenish Nutrients and Balance Hormones 5. Release Tension and Relieve Stress 6. Revitalize with a Detox 7. HEALING THE WOUNDS-David Hilfiker, M.D. 2013-05-08 Healing the Wounds is the most revealing book ever written by a doctor about his own profession. In it, David Hilfiker breaks the code of silence surrounding the everyday practice of medicine and gives us a dramatically different personal account of how the family doctor gets by in a world of spiraling information and high anxiety. Drawing on his years of rural and urban experience, Dr. Hilfiker lets us all know what it really feels like to be a doctor. What do you do when you make a serious medical mistake? Is it enjoyable to play God? What do you say to a patient who wants reassurance when the essence of diagnosis is uncertainty? What about money? What happens when a patient is taking forever, your waiting room is full, and you want to get home? Dr. Hilfiker uses incidents from his own practice to examine many of the kinds of behavior for which doctors are criticized—aloofness, authoritarianism, lack of caring, and money. With compassion for doctor and patient alike, he shows how the stresses of medical practice lead to a climate of misunderstanding and hostility in which the goal of healing is the first casualty. Never before have we heard the voice of the doctor ever American is most likely to meet—the family doctor—telling the often painful truths of medical practice. A book for the medical community and the lay person alike, Healing the Wounds is a powerful exploration of what frustrates doctors (and infuriates patients) and what might be done about it).

Cura Personalis-Antonia C. Johns 2013-02 The physician-patient bond is a significant relationship, intended to effect healing in our patient -- but is it the patient alone who benefits? We are all patients at some point. As a patient, how well do we know our self, how clearly do we communicate what troubles us to our doctor, to others? Even when we are feeling healthy, we remain aware of some aspects of our lives that need healing. For many of us, it is our relationships that need healing. This book is an essential exploration into the challenges inherent in the physician-patient dynamic and extends the findings to other important encounters. The reason it is appropriate for everyone, physician or not, is because the principles adhered to in its writing are universal in reach and eternally relevant. Its sole purpose is to promote healing in our world, individually and collectively. Whatever our vocation we are each called to be an essential effective healer in some way that is natural to us, our gift to the world. Here we are reminded that when we promote conditions for healing in our relationships we manifest miracles naturally.

The Use of Self in Therapy-Michele Baldwin 2013-02-11 One of the most powerful factors in therapy is that it involves the intensive relationship between two (or more) human beings. The issues of transparency and self-disclosure therefore become important concerns for therapists; how can they use themselves effectively in their work without transgressing on professional regulations? These issues and concerns are addressed in this new edition of The Use of Self in Therapy by experienced therapists, who share their own wisdom, research, and experiences in valuable ways. Disregarding methodology or approach, the authors demonstrate how to train and develop the self and person of the therapist as a powerful adjunct to successful therapy. They enable practitioners to become more effective in helping their clients to realize and regain their own powers of healing and healthy recovery. This 3rd edition also examines the impact of increasing professional regulation, as well as the impact of the internet and social media on the conduct of therapy. Also new to this edition are discussions of how therapists can use themselves in cultures that are less individually-oriented. This book is a valuable addition to any therapist's library and therapy supervisor's teaching arsenal.
