This includes a comparative analysis of all River Basin Organizations worldwide and three in-depth case studies from three different continents. The detailed case studies are the Senegal (West Africa), Mekong (South-east Asia) and Danube (Europe) rivers. The book contributes to the academic debate on how shared natural and environmental resources can be managed in a sustainable way and which institutional and legal mechanisms actually matter for doing so. It adopts the neo-institutionalist approach, according to which international environmental institutions do make a difference. The analysis not only confirms this argument for the specific case of shared water resources, but also refines existing hypotheses on the influence of different independent variables, namely the nature of the collective action problem, the constellation of actors and the institutional design of an international environmental institution. The work also contributes to the policy debate on how to better govern internationally shared natural resources and the environment. It provides policy makers with advice on which exogenous conditions to be aware of when managing water resources they share with co-riparians and which institutional design features and governance mechanisms to set up in order to increase effectiveness in management.</p> <p>Foundations of Airline Finance-Bijan Vasigh 2014-11-13 In recent years the airline industry has experienced severe volatility in earnings, with airlines recording periods of substantial profits that are closely followed by periods of financial distress. Rutherford 2013-02-21 Which way will Egypt go now that Husni Mubarak's authoritarian regime has been swept from power? Will it become an Islamic theocracy similar to Iran? Will it embrace Western-style liberalism and democracy? Egypt after Mubarak reveals that Egypt's secularists and Islamists may yet navigate a middle path that results in a uniquely Islamic form of liberalism and, perhaps, democracy. Bruce Rutherford draws on in-depth interviews with Egyptian judges, lawyers, Islamic activists, politicians, and businesspeople. He utilizes major court rulings, political documents of the Muslim Brotherhood, and the writings of Egypt's leading contemporary Islamic thinkers. Rutherford demonstrates that, in post-Mubarak Egypt, progress toward liberalism and democracy is likely to be slow. Essential reading on a subject of global importance, this edition includes a new introduction by Rutherford that takes stock of the Arab Spring and the Muslim Brotherhood's victories in the 2011-2012 elections.</p> <p>Atlas of AIDS-Gerald L. Recognising Early Literacy Development-Cathy Nutbrown 1997-08-28 `This book examines the literacy development and assessment of children before the age of five years. It is highly relevant to all those professionally involved in assessment. Cathy Nutbrown explores the need for appropriate assessment practice to support teachers and illustrates the mismatch between the way teachers and researchers assess literacy. The book is worth buying for the final chapter alone, which provides an analysis of the newly developed Sheffield Early Literacy Development Profile. The actual tasks are included in the appendices. Thus, Cathy Nutbrown does not leave us frustrated. We are able to consider an ongoing assessment which is in tune with the best practice in teaching. This is a research text which balances theory with practical realism. It is particularly relevant today with the introduction of Baseline Assessment. Teachers and researchers will find much that they can relate to and learn from. It is clearly written and deserves to be widely read. However, it may make for uncomfortable reading as Cathy Nutbrown challenges all concerned with the assessment of early literacy development to reflect on exactly what they are doing and why' - British Educational Research
Recognising Early Literacy Development presents a new view of the many purposes of assessment in early literacy development. Issues in early literacy assessment, current assessment material, the purposes of literacy assessment, government policy, practice in schools, baseline assessment of literacy, the need for new research measures of early literacy, are all recurrent themes of the book. The author reviews and discusses three decades of policy and practice in assessing literacy development in the years 3 to 5 - from recognising in the late 1960s that literacy in these years exists, to proposals in 1997 for official assessment of literacy at 5 years.

The Rebirth of the Clinic-Daniel P. Sulmasy MD, PhD, OFM 2006-05-19 The Rebirth of the Clinic begins with a bold assertion: the doctor-patient relationship is sick. Fortunately, as this engrossing book demonstrates, the damage is not irreparable. Today, patients voice their desires to be seen not just as bodies, but as whole people. Though not willing to give up scientific progress and all it has to offer, they sense the need for more. Patients want a form of medicine that can heal them in body and soul. This movement is reflected in medical school curricula, in which courses in spirituality and health care are taught alongside anatomy and physiology. But how can health care workers translate these concepts into practice? How can they strike an appropriate balance, integrating and affirming spirituality without abandoning centuries of science or unwittingly adopting pseudoscience? Physician and philosopher Daniel Sulmasy is uniquely qualified to guide readers through this terrain. At the outset of this accessible, engaging volume, he explores the nature of illness and healing, focusing on health care's rich history as a spiritual practice and on the human dignity of the patient. Combining sound theological reflection with doses of healthy skepticism, he goes on to describe empirical research on the effects of spirituality on health, including scientific studies of the healing power of prayer, emphasizing that there are reasons beyond even promising research data to attend to the souls of patients. Finally, Sulmasy devotes special attention and compassion to the care of people at the end of life, incorporating the stories of several of his patients. Throughout, the author never strays from the theme that, for physicians, attending to the spiritual needs of patients should not be a moral option, but a moral obligation. This book is an essential resource for scholars and students of medicine and medical ethics and especially medical students and health care professionals.

Advances in the Psychology of Justice and Affect-David De Cremer 2007 Advances in the Psychology of Justice and Affect presents a collection of chapters written by leading scholars attempting to illuminate the developing trends in explaining and understanding the role that affect plays in justice and vice versa. The book comes at a particular fitting time as it is recognized that justice is in the eye of the beholder, but, unfortunately clear theoretical perspectives have not been clearly outlined yet. This book addresses this need by presenting a variety of perspectives advocating the further integration between both fields and how this may be achieved. Moreover, the book also provides a discussion of what we know as yet and where this integrative field should be going. The book is divided in three parts discussing the nature of justice and affect, justice, morality and affect, and justice and affect at work. The market for this book is students, researchers in social psychology, organizational behavior and management, behavioral economics, philosophy, and other related social sciences fields. Graduate students and upper level undergraduates can make use of the book as a supplementary text.

Mornings with Mailer-Dwayne Raymond 2010-01-26 In the spring of 2003, Norman Mailer, who was then eighty years old, invited an improbable companion into his life: Dwayne Raymond, a young writer who was waiting tables at a restaurant in Provincetown, at the tip of Cape Cod, where Mailer spent most of his final years. Raymond became Mailer's aide in all matters professional and private, assisting the Pulitzer Prize-winning author on the four books he published during this time, including his last novel, The Castle in the Forest. As Raymond's responsibilities grew, so too did his closeness to Mailer, who in turn taught him how to navigate his own personal challenges. In this touching memoir, Dwayne Raymond presents a loving portrait of Norman Mailer in his twilight years, depicting a quirky and complex but achingly human man so unlike the Mailer of disquieting legend. Beautifully written and honestly portrayed, Mornings with Mailer is a personal and revealing story of a great writer, his man Friday, and their unlikely but enduring friendship.
