Cannonball!-Brock Yates 2003-10-12 This first book of its kind tells the behind-the-scenes story of the incredibly illegal Cannonball rally. This best seller is now available in paperback!In the early 1970s, Brock Yates, senior editor of Car and Driver Magazine, created the now infamous Cannonball Sea-to-Shining-Sea Memorial Trophy Dash; a flat out, no-holds-barred race from New York City to Redondo Beach, California. Setting out to prove that well trained drivers could safely navigate the American highways at speeds in excess of the posted limits, Mr. Yates created a spectacle reminiscent of the glory days of the barnstorming pilots. Filled with fascinating unpublished stories, nostalgic and modern-day photographs, inside information and hilarious stories from this outrageous and incredibly immoral rally. Brock is one of the best-known, most respected automotive journalists in the world today.

Information, Opportunism and Economic Coordination-Peter E. Earl 2002-01-01 An integrated collection of a dozen of Peter Earl's lively and thought-provoking essays, carefully edited and updated. Theoretical topics include the prediction of corporate behaviour, the economic foundations of marketing and shopping mall design, pricing strategy and its relationship with the existence of second-hand markets, and the microfoundations of macroeconomics. Case studies include co-operation in the car industry, managerialist reforms in New Zealand and the university sector, structural change in the advertising industry and the place of GB Richardson and GLS Shackle in the literature of economics.

Inside 2000-S. Bews 2000 Five new plays. Elegy (by Jodi Gallagher): Two sisters, unlike, yet sharing a lust for life. When one dies, the other finds herself in a void that can only be created by the loss of a loved one. A tender but frank account of a family tragedy. So Wet (by Samantha Bews): Silv, a twenty-something, is a professional woman on the move and determined to make every post a winner -- and that's just her social life. A witty tale of longing, laced with a touch of the erotic. Like a Metaphor (by Gabrielle MacDonald): A language journey, in four and a half monologues, through a series of refractions, turning points and tiny visceral moments. A woman's sensual examination of bodily experiences. Baby X (by Campion Decent): Georgie and Evelyn are a lesbian couple in search of a sperm donor. A madcap comedy that takes a recipe for family life, throws it in a blender with a generous dollop of queer consciousness, and celebrates the result. Violet Inc. (by Pam Leversha): Violet Fahrenheit: brilliant, savage, inspiring -- her spirit radiates the lovers and acolytes who surround her. Thirty years later, they are still struggling to exorcise her legacy. A vibrant journey through social and personal change.

Diesel-Engine Management-Robert Bosch GmbH 2006-06-16 Innovations by Bosch in the field of diesel-injection technology have made a significant contribution to the diesel boom in Europe in the last few years. These systems make the diesel engine at once quieter, more economical, more powerful, and lower in emissions. This reference book provides a comprehensive insight into the extended diesel fuel-injection systems and into the electronic system used to control the diesel engine. This book also focuses on minimizing emissions inside of the engine and exhaust-gas treatment (e.g., by particulate filters). The texts are complemented by numerous detailed drawings and illustrations. This 4th Edition includes new, updated and extended information on several subjects including: History of the diesel engine Common-rail system Minimizing emissions inside the engine Exhaust-gas treatment systems Electronic Diesel Control (EDC) Start-assist systems Diagnostics (On-Board Diagnosis) With these extensions and revisions, the 4th Edition of Diesel-Engine Management gives the reader a comprehensive insight into today's diesel fuel-injection technology.

Reuse Methodology Manual-Pierre Bricaud 2012-12-06 Silicon technology now allows us to build chips consisting of tens of millions of transistors. This technology not only promises new levels of system integration onto a single chip, but also presents significant challenges to the chip designer. As a result, many ASIC developers and silicon vendors are re-examining their design methodologies, searching for ways to make effective use of the huge numbers of gates now available. These designers see current design tools and methodologies as inadequate for developing million-gate ASICs from scratch. There is considerable pressure to keep design team size and design schedules constant even as design complexities grow. Tools are not providing the productivity gains required to keep pace with the increasing gate counts available from deep submicron technology. Design reuse - the use of pre-designed and pre-verified cores - is the most promising opportunity to bridge the gap between available gate-count and designer productivity. Reuse Methodology Manual for System-On-A-Chip Designs, Second Edition outlines an effective methodology for creating reusable designs for use in a System-on-a-Chip (SoC) design methodology. Silicon and tool technologies move so quickly that no single methodology can provide a permanent solution to this highly dynamic problem. Instead, this manual is an attempt to capture and incrementally improve on current best practices in the industry, and to give a coherent, integrated view of the design process. Reuse Methodology Manual for System-On-A-Chip Designs, Second Edition will be updated on a regular basis as a result of changing technology and improved insight into the problems of design reuse and its role in producing high-quality SoC designs.

The New McGraw-Hill Handbook-Elaine P. Maimon 2006-08-01 Writing and research have changed dramatically since the first hardcover handbooks appeared. Today's students don't just write papers: they create multimedia presentations. They don't just do research: they find their way through a maze of online information. They don't just read print: they analyze visuals. They don't just come to class: they participate in an online learning community. These changes have put new demands on composition courses. With its focus on writing in college and its integrated coverage of technology and visual rhetoric, The New McGraw-Hill Handbook has been designed to meet those demands.

Getting Started with the Internet of Things-Cuno Pfister 2011-05-24 What is the Internet of Things? It's billions of embedded computers, sensors, and actuators all connected online. If you have basic programming skills, you can use these powerful little devices to create a variety of useful systems—such as a device that waters plants when the soil becomes dry. This hands-on guide shows you how to start building your own fun and fascinating projects. Learn to program embedded devices using the .NET Micro Framework and the Netduino Plus board. Then connect your devices to the Internet with Pachube, a cloud platform for sharing real-time sensor data. All you need is a Netduino Plus, a USB cable, a couple of sensors, an Ethernet connection to the Internet—and your imagination. Develop programs with simple outputs (actuators) and inputs (sensors) Learn about the Internet of Things and the Web of Things Build client programs that push sensor readings from a device to a web service Create server programs that allow you to control a device over the Web Get the .NET classes and methods needed to implement all of the book's examples

A League of My Own-Patricia I. Brown 2010-07-27 Growing up, Pat Brown had two dreams: to play baseball and to attend college. She was told she couldn't play baseball because she was a girl and couldn't attend college because she had no money, but in spite of the obstacles, she achieved both of these dreams, playing for the All-American Girls Professional Baseball League in 1950 and 1951 and going on to attend college. She is among the few women professional baseball players to be included into the National Baseball Hall of Fame. "As the only former AAGPBL player to have written about the League," Brown says, "I feel like I have finally pitched my no hit game." This is a memoir of playing baseball on the sandlot, discovering and playing in the AAGPBL, and playing basketball in college. Brown shares her thoughts on the League's history, including what Philip K. Wrigley sought to do by creating the AAGPBL, what happened after Wrigley left to give more attention to the Chicago Cubs, and why the League ended. She also considers the future for women's professional baseball. Interviews with such former AAGPBL players as Helen Hannah Campbell, Patricia "Pat" Courtney, Madeline "Maddy" English, Lenora "Smokey" Mandella, Jacqueline "Jackie" Matson, Jane Moffet, Mary "Sis" Moore, and Janet "Pee Wee" Wiley are included.

The New Nature-Tim Low 2017-01-03 Winner of the NIB Waverley Award for Literature. Forget about wilderness, Tim Low says, nature lives in our cities and gardens, exploiting everything we do. Many endangered species now live in industrial zones and cities. In our forests, native creatures have become pests. Fifteen years on, The New Nature continues to challenge the way we view the interactions between human beings and nature, and pushes us to review our relationship with Australia's wilderness.

Cars of the Soviet Union-Andy Thompson 2008 The story of the Soviet Union's cars has to be seen in the context of a planned society in which everything was planned well in advance, and consumer items were not a priority until well after the Second World War. This extraordinarily detailed study charts the history of Soviet cars from the birth of the Soviet Union in 1917 until its demise in 1990, with a conclusion about the post-Soviet era. It is the story of an insular, state-run car industry in which the carefully thought-out ideas of ministerial planners, rather than fickle customers in a free market, determined what cars were made in a country where the open road was often a 300-mile track across a windswept steppe.

Dictionary of Renewable Resources-Volker Böllert 2001 "The second, revised and enlarged edition of this dictionary provides a wealth of profound information on renewable resources. Topics are all relevant plant and animal sources and the substances derived thereof, the standard technologies of isolation and derivatization, and the major fields of application - with regard to economic aspects and future developments. In addition to the 'classical' use as raw materials of the chemical industry, the fields of energy/fuels, practical substances of cosmetics and aromas are treated. Not only modern methods are taken into account but also older, almost forgotten fields that stimulate new considerations."--BOOK JACKET.
