Never again confuse an anapest with a distich, a panegyric with a polemical, or a haiku with someone clearing their throat. Bask in the admiration of your fellow soi-disant literati as you pronounce confidently on the comparative merits of a rhapsody and an elegy, or a dactyl with a spondee, and effortlessly learn how to hold your own when extolling the sublime gifts of possibly the greatest poet who has ever lived - William Topaz McGonagall. DO SAY: "Yes, I suppose it's about time I rediscovered (insert name here), although I'm afraid that I've always found him/her a little too deceptive. On the other hand he/she also has a tendency towards the tiresomely reductive. In the past my response to his/her work can only be described as lacklustre . . . but everybody deserves a second chance." DON'T SAY: "There was a young lady from Bude/ Who went for a swim in the nude/ . . ."

Moon Manual-David M Harland 2016-04-15 There is renewed interest in the Moon in recent years, with the news that a Chinese lunar rover landed on the Moon in January 2014, and NASA announcing that it is looking for private partners to land a robot on the Moon's surface, as the first step in a programme to exploit the commercial opportunities offered by the Moon. Recent lunar expeditions by both orbiting spacecraft and 'landers' have uncovered far more detail about the Moon's surface and geology, including the trail of Neil Armstrong's first walk on the Moon in 1969. This manual explains in simple and straightforward terms, with a wealth of illustrations and photographs, what we have discovered about the Moon over the centuries, along with a general overview of the vehicles involved in the exploration.

Bomber Command Operations Manual-Jonathan Falconer 2018-08-07 Night after night for six years of war, RAF Bomber Command's squadrons pounded away at the cities of Nazi Germany in a determined effort to bring the Third Reich to its knees. Pitted against Bomber Harris's aircrews and aircraft were some of the most effective and deadly defenses the world had seen up until then. For Bomber Command to launch a 'maximum effort' raid on the Ruhr by night, or a low-level strike on a target in enemy occupied Europe by day, it involved a huge amount of planning. Who decided what to bomb? Why, when and where were bomber airfields built? How was the overall command structure organized, from the Air Council down to individual squadron level? Who were the commanders and who were the men that made up the rank and file of the Command? How did the RAF train its bomber crews? What aircraft did they fly and what weapons did they use? How was a raid planned and once it was launched what happened? How was the effectiveness of a raid and bomber tactics analyzed afterwards? How did the RAF go about tracing the 'missing' (47,000 men 'failed to return' from operations)? How were damaged bombers repaired and made good again for operations? Useful appendices include a Bomber Command War Diary listing key events 1939-1945, squadrons and their commanders, an a-to-z of bomber airfields, and sample orders of battle from 1939, 1943 and 1945. Fully illustrated with some 300 photographs, the Bomber Command Operations Manual gives a compelling insight into the workings of one of the most powerful instruments of 20th century warfare.
