Principles of Administrative Procedure in EC Law-Hanns Peter Nehl 1999-01-01 This book presents an analysis of the recent development of administrative procedures in EC law. It is a pathbreaking study of what might be termed the "constitutionalising norms" now emerging,including a range of 'process rights' and procedural standards, such as the right to access to information, the right to be heard, the principle of care and duty to state reasons. These new standards are increasingly applied in areas as diverse as competition, State aids, customs matters, anti-dumping and the European Social Fund. Different strands of case-law of the EC courts are thus connected to document the overall evolution of procedural rules peculiar to the EC administrative system as a whole. The author adopts a critical stance, in particular, towards the case-law of the Court of First Instance and points out the increasing pressure being brought to bear on the European Commission in respect of its procedural requirements. Particular emphasis is placed on the concept of 'care', i.e. the duty to collect and examine the factual and legal points of individual cases impartially and carefully. The book reveals both the theoretical and practical relevance of this principle as a means of both procedural and substantive review and the reasons why it is likely to be misinterpreted by the courts.

Ramp Hollow-Steven Stoll 2017-11-21 How the United States underdeveloped Appalachia In Ramp Hollow, Steven Stoll offers a fresh, provocative account of Appalachia, and why it matters. He begins with the earliest European settlers, whose desire for vast forests to hunt in was frustrated by absentee owners—including George Washington and other founders—who laid claim to the region. Even as Daniel Boone became famous as a backwoods hunter and guide, the economy he represented was already in peril. Within just a few decades, Appalachian hunters and farmers went from pioneers to pariahs, from heroes to hillbillies, in the national imagination, and the area was locked into an enduring association with poverty and backwardness. Stoll traces these developments with empathy and precision, examining crucial episodes such as the Whiskey Rebellion, the founding of West Virginia, and the arrival of timber and coal companies that set off a devastating "scramble for Appalachia." At the center of Ramp Hollow is Stoll's sensitive portrayal of Appalachian homesteads. Perched upon ridges and tucked into hollows, they combined small-scale farming and gardening with expansive foraging and hunting, along with distilling and trading, to achieve self-sufficiency and resist the dependence on cash and credit arising elsewhere in the United States. But the industrialization of the mountains shattered the ecological balance that sustained the households. Ramp Hollow recasts the story of Appalachia as a complex struggle between mountaineers and profit-seeking forces from outside the region. Drawing powerful connections between Appalachia and other agrarian societies around the world, Stoll demonstrates the vitality of a peasant way of life that mixes farming with commerce but is not dominated by a market mind-set. His original investigation, ranging widely from history to literature, art, and economics, questions our assumptions about progress and development, and exposes the devastating legacy of dispossession and its repercussions today.

The End of the Hamptons-Corey Dolgon 2005-05-01 Winner of the 2005 Book Prize from the Association for Humanist Sociology In this absorbing account of New York's famous vacation playground, Corey Dolgon goes beyond the celebrity tales and polo games to tell us the story of this complex and contentious land. From the displacement of Native Americans by the Puritans to the first wave of Manhattan elites who built the Summer Colony, to the current infusion of telecommuting Manhattanites who now want to live there year-round, the story of the Hamptons is a vicious cycle of supposed paradise lost. Drawing on this fabled land's history, The End of the Hamptons provides a fascinating portrait of current controversies: the Native Americans fighting over land claims and threatening to build a casino, the environmental activists clashing with the McMansion builders, and the Latino day laborers and working-class natives trying to eke out a living in an ever-increasingly expensive town.
