Effect of Mechanical and Physical Properties on Fabric Hand-H Behery 2005-10-31 It is a consumer's instinct to use the sense of touch when choosing a garment; to describe and assess the fabric quality and its suitability for a specific end use. The way that the fabric feels is described as its handle or 'fabric hand'. Fabric hand can be evaluated by mechanical or electronic devices and by human judges using psychophysical or psychological techniques. Effect of mechanical and physical properties on fabric hand thoroughly explores the techniques and issues involved in this difficult subject. It begins by looking at the concepts of fabric hand, with chapters on the developments in hand measurement, the application of statistical methods and the differences in fabric hand between different cultures. The second part is devoted to the different effects fiber, yarn and fabric can have on fabric hand. The effect of factors including fiber, yarn and woven fabrics are all outlined in separate chapters. Finally, the third section describes the effect that processing has on fabric hand. This includes processes such as wet processing and chemical finishing, mechanical finishing and refurbishing. Finally two important appendices are included for reference. Appendix A is from the Hand Evaluation and Standardization Committee and outlines the Kawabata system for standardization and analysis of hand evaluation. Appendix B describes the SiroFAST system of fabric assurance by simple testing developed by CSIRO, Australia. With an international panel of distinguished contributors, Effect of mechanical and physical properties on fabric hand provides comprehensive coverage on the subject. It will be an essential work for those researching and working in apparel and fashion design, textile selection, fabric designers and developers, manufacturers, and those interested in fabric dyeing and finishing. Essential reading for all those working in apparel and fashion design, textile selection, fabric design and development and fabric manufacturers Covers statistical methods in evaluating hand and a comparison of hand evaluation in different cultures Looks at the effect processing has on fabric hand

Engineering Apparel Fabrics and Garments-J Fan 2009-05-30 As consumer demands for specific attributes in their textiles increase and global competition intensifies, it is important that the industry finds ways of engineering certain performance requirements into textiles and apparel. This book reviews how fabrics and garments can be engineered to meet technical performance and other characteristics required for the specific end-use. Chapters begin with fabric and garment handle and making - up performance, followed by wear appearance issues, such as wrinkling, pilling and bagging. Further chapters include fabric and garment drape, durability related issues, as well as physiological and psychological comfort. Key topics of fire retardancy, waterproofing, breathability and ultraviolet protection are also discussed. Written by two highly distinguished authors, this is an invaluable book for a wide range of readers in the textile and apparel industries, ranging from textile and garment manufacturers, designers, researchers, developers to buyers. Reviews the engineering of fabrics to meet technical performance requirements for specific end-use Chapters examine various wear appearance issues such as wrinkling, bagging and fabric and garment drape Discusses durability related issues including fire retardancy and waterproofing as well as psychological and physiological fabric comfort

Clothing Appearance and Fit-J Fan 2004-10-04 In one fully comprehensive book, the authors provide a critical examination of the technological developments and scientific understanding of the appearance and fit of clothing. They bridge the gap between the science of beauty and fashion design and garment evaluation technology, garment drape, and human anthropometrics and sizing. The book begins by discussing body attractiveness, how it relates to clothing material and design parameters, and classical and contemporary theories of beauty. Chapters present the industry's techniques, methods, and standards for assessing clothing appearance and fit and review the research and development of objective measurement technologies for evaluating clothing appearance and fit. Other topics include coverage of fabric objective measurement, fabric properties and garment drape, the R & D of body measurement, anthropometrics, and sizing systems.

Disc Electrophoresis and Related Techniques of Polyacrylamide Gel Electrophoresis-H. Rainer Maurer 1971 Included in the book are exact procedures for the most varied separatin problems, a survey of types of apparatus, descriptions of methods for detection and quantitation of proteins, nucleic acids, enzymes, antingens and radioactively labelled materials, and detailed treatments of micro disc electrophoresis, preparative polyacrylamide gel electrophoresis and many other techniques for special problems. This monograph also cites examples of results from research in biochemistry, clinical chemistry and food technology with the intention of demonstrating the versatility of the method.

Variations of parts therapy such as ego state therapy or voice dialogue are already used by many psychotherapists and psychologists who also use hypnosis in their practices. This book will provide therapists with the added knowledge of parts therapy.

Butadiene and Styrene-International Agency for Research on Cancer 1993 Both butadiene and styrene are produced in high volumes; their combined annual production is 20 million tons. They occur together in many industrial and commercial products, including latexes, polymers, adhesives, and particularly in styrene-butadiene rubber tires. Styrene was classified in 1987 within IARC criteria as 2B (possibly carcinogenic to humans); 1,3-butadiene was placed in class 2A (probably carcinogenic to humans) at the meeting of a working group convened by IARC in 1991. This volume brings together the latest information about the toxic hazards of the two compounds. The focus of research on styrene seems to be its neurotoxicological effects and its potential carcinogenicity. Interest in 1,3-butadiene is much more recent and appears to be directed primarily towards species-specific differences in its carcinogenicity. Papers included in this volume were selected so that current data obtained by ambient and biological monitoring and on genetic toxicity and carcinogenicity are amply covered for both compounds. Seven main areas of research are covered: exposures to butadiene and styrene; estimation of internal doses received by exposed people; measurements of metabolites and of adducts with DNA and protein as markers of exposure; neurotoxicity and reproductive effects; genetic toxicity; carcinogenicity; and implications for public health. New results from epidemiological studies of subjects occupationally exposed to butadiene and to styrene are reported. Special consideration is given to the need for developing and validating biological markers of exposure to butadiene and to styrene in order to measure biological effects and susceptibility in human populations, so that adverse effects can be detected earlier and action taken to reduce public health risks. Information on the mechanisms of carcinogenic action is reviewed, since differences between species with respect to such mechanisms can have a major bearing on the extrapolation to human of findings of carcinogenicity in animals. These topics, representing the 'state of the art' with respect to scientific knowledge about the toxic manifestations and mechanisms of 1,3-butadiene and styrene are all covered in this volume.

Manual of Neonatal Care-John P. Cloherty 2012-01-05 This edition of the Manual of Neonatal Care has been completely updated and extensively revised to reflect the changes in fetal, perinatal, and neonatal care that have occurred since the sixth edition. This portable text covers current and practical approaches to evaluation and management of conditions encountered in the fetus and the newborn, as practiced in high volume clinical services that include contemporary prenatal and postnatal care of infants with routine, as well as complex medical and surgical problems. Written by expert authors from the Harvard Program in Neonatology and other major neonatology programs across the United States, the manual's outline format gives readers rapid access to large amounts of valuable information quickly. The Children's Hospital Boston Neonatology Program at Harvard has grown to include 57 attending neonatologists and 18 fellows who care for more than 28,000 newborns delivered annually. The book also includes the popular appendices on topics such as common NICU medication guidelines, the effects of maternal drugs on the fetus, and the use of maternal medications during lactation. Plus, there are intubation/sedation guidelines and a guide to neonatal resuscitation on the inside covers that provide crucial information in a quick and easy format.

Shaking Off the Dust-Rhianna Samuels 2008-11-01 Hannah's list: Ghosts are cold to the touch. Being tied up isn't much fun. And danger is a sure-fire prescription for amazing sex! When Hannah Campbell attends a memorial service for the neurosurgeon who once saved her life, the last thing she expects is a lightning strike that knocks her out cold and blasts her lungs full of the departed's ashes. Things only get weirder when she wakes up to find the deceased standing over her hospital bed, insisting she help him track down the terrorists who blew up his plane. Professor Takeshi Shimodo doesn't know what to believe when smart-mouthed Hannah appears on his doorstep, claiming to be haunted by the ghost of his best friend. Yet she exhibits some extraordinary psychic abilities. And her determination to find justice for the crash victims, in spite of her fragile health, touches his heart. Takeshi's acupressure techniques are meant to calm Hannah's erratic heartbeat, but the longer they are together, the more his magic fingers have the opposite effect. Soon, their passion flares hotter than any lightning strike. But now the terrorist they seek is hunting them. And the FBI is suspicious Hannah knows just a little too much. Without some "spiritual" help, they haven't a ghost of a chance. Warning, this title contains the following: explicit sex, graphic language and violence.
