Holley Carburetors-Mike Mavrigian 2016-01-15 During the muscle car wars of the 1960s, Holley carburetors emerged as the carbs to have because of their easy-to-tune design, abundance of parts, and wide range of sizes. The legendary Double Pumper, the universal 600-cfm 1850 models, the Dominator, and now the Avenger have stood the test of time and are the leading carburetors in the high-performance engine market. To many enthusiasts, the operation, components, and rebuilding procedures remain a mystery. Yet, many carburetors need to be rebuilt and properly set up for a particular engine package. Veteran engine building expert and automotive author Mike Mavrigian guides you through each important stage of the rebuilding process, so you have the best operating carburetor for a particular engine and application. In addition, he explains carb identification as well as idle, mid-range and high-speed circuit operation, specialty tools, and available parts. You often need to replace gaskets, worn parts, and jets for the prevailing weather/altitude conditions or a different engine setup. Mavrigian details how to select parts then disassemble, assemble, and calibrate all of the major Holley carburetors. In an easy-to-follow step-by-step format, he shows you each critical stage for cleaning sensitive components and installing parts, including idle screws, idle air jets, primary/secondary main jets, accelerator pumps, emulsion tubes, and float bowls. He also includes the techniques for getting all of the details right so you have a smooth-running engine. Holley carburetor owners need a rebuilding guide for understanding, disassembling, selecting parts, and reassembling their carbs, so the carb then delivers exceptional acceleration, quick response, and superior fuel economy. With Holley Carburetors: How to Rebuild you can get the carb set up and performing at its best. And, if desired, you can move to advanced levels of tuning and modifying these carbs. If you're looking for the one complete book that helps you quickly and expertly rebuild your Holley and get back on the road, this book is a vital addition to your performance library.

Biological Methylation and Drug Design-Ronald T. Borchardt 1986-04-15 This book has been developed from its earlier and far less formal presentation as the proceedings of a symposium entitled The Biochemistry of S-Adenosylmethionine as a Basis for Drug Design that was held at the Solstrand Fjord Hotel in Bergen, Norway on June 30-July 4, 1985. The purpose of the symposium was to bring together scientists from various disciplines (biochemistry, pharmacology, virology, immunology, chemistry, medicine, and so on) to discuss the recent advances that have been made in our understanding of the biological roles of S adenosylmethionine (AdoMet) and to discuss the feasibility of utilizing AdoMet-dependent enzymes as targets for drug design. Thus the information provided herein will be of value not only to basic scientists involved in elucidating the role of AdoMet in biology, but also to medicinal chemists who are using this basic knowledge in the process of drug design. The volume should also be of interest to pharmacologists and clinicians involved in biological evaluation of potential therapeutic agents arising from the efforts of the biochemists and medicinal chemists. Each plenary speaker at the symposium was requested to submit a chapter reviewing recent contributions of their discipline to our base of knowledge about the biological role of AdoMet. Topics covered in this volume include protein and phospholipid methylations (Section A), nucleic acid methyl ations (Section B), the regulation of AdoMet, S-adenosylthioecysteine, and methylthioadenosine metabolism (Section C), clinical aspects of AdoMet (Section D), and the design, synthesis, and biological evaluation of trans methylation inhibitors (Section E).

High-Voltage Test and Measuring Techniques-Wolfgang Hauschild 2014-02-18 It is the intent of this book to combine high-voltage (HV) engineering with HV testing technique and HV measuring technique. Based on long-term experience gained by the authors as lecturer and researcher as well as member in international organizations, such as IEC and CIGRE, the book will reflect the state of the art as well as the future trends in testing and diagnostics of HV equipment to ensure a reliable generation, transmission and distribution of electrical energy. The book is intended not only for experts but also for students in electrical engineering and high-voltage engineering.

The Confident Woman Devotional-Joyce Meyer 2018-10-16 Revised and Expanded Edition God has created you to be confident, bold, and free-free to be yourself, free from the need to compare yourself to others, and free to step into His destiny for your life. Based on her #1 New York Times bestseller The Confident Woman, Joyce Meyer taps into concerns and issues that many women commonly experience-lack of confidence, poor self-image, dysfunctional relationships-and provides encouragement and practical wisdom to help resolve problems in those areas of life. In today's busy, fast-paced world, it's easy to forget the need to slow down and live in the present, while holding on to personal "baggage" that's keeping you from being the woman God created you to be. But this powerful daily devotional, revised and expanded with new insights, inspirational quotes, and practical action items, will help you on your journey toward a confident life filled with love, laughter, and God's acceptance, one day at time.

The History of AMC Motorsports-Bob McClurg 2016-01-15 When thinking of a manufacturer's racing involvement, AMC is not a manufacturer that immediately comes to mind. Yet even from the very beginning of American motorsports, the companies that became AMC had some serious involvement in motorsport. From the early Nash and Hudson models all the way through the muscle car era, AMC had direct involvement in racing. The success of Nash and Hudson in early NASCAR racing, AMC Javelins in Trans-Am racing, and AMC's involvement with Mark Donahue and Roger Penske in both their Trans-Am and 1970s NASCAR teams prove that AMC was "in it to win it." The History of AMC Motorsports from veteran racing journalist Bob McClurg covers it all, from a Nash-AMC Motors corporate history, the first years of NASCAR, the 1960s efforts that included Trans-Am and drag racing Super Stock programs, to the Craig Breedlove land speed record efforts when 106 world records were shattered and covered by Hot Rod magazine. And let's not forget the 1970s Trans-Am championships with Donahue and Penske, and finally the NASCAR success with Bobby Allison in the always-curious looking Matador, which is also covered here. Never before has a single volume chronicled the events that encompass AMC racing history. Whether a hardcore racing history fan or a casual enthusiast of the AMC street offerings, The History of AMC Motorsports provides a unique showcase vital to every enthusiast's library.

Neuromarketing-Leon Zurawicki 2010-09-02 Over the last 10 years advances in the new field of neuromarketing have yielded a host of findings which defy common stereotypes about consumer behavior. Reason and emotions do not necessarily appear as opposing forces. Rather, they complement one another. Hence, it reveals that consumers utilize mental accounting processes different from those assumed in marketers' logical inferences when it comes to time, problems with rating and choosing, and in post-purchase evaluation. People are often guided by illusions not only when they perceive the outside world but also when planning their actions - and consumer behavior is no exception. Strengthening the control over their own desires and the ability to navigate the maze of data are crucial skills consumers can gain to benefit themselves, marketers and the public. Understanding the mind of the consumer is the hardest task faced by business researchers. This book presents the first analytical perspective on the brain - and biometric studies which open a new frontier in market research.

Just a Spoonful of Laughter Helps the Medicine Go Down-Richard D. Edergerly, MD 2011-03-29 Just a Spoon Full of Laughter...is a great read for anyone that's been to a doctors office and made it out alive. Written by an actual physician, it will keep you in stitches (no pun intended) from one story to the next. See for yourself what could be so funny about the physician office visit. Whether it's recalling his first sigmoidoscopy or performing an autopsy, you'll keep this riveting series of short humorous stories right there in the bathroom for pleasurable reading. You may even find yourself somewhere between the pages. From an author who will never be a New York Times Best Seller, it's a great book for young or old, male or female, professional or not. It's especially ideal for that person in your life who has everything except a sense of humor. It's ideal as a stocking stuffer, white elephant gift or for future yard sales. "The funniest book I ever read." Says Dr. Zhivago "Yes! Yes! Yes!" Says Dr. Jerry

Weld Like a Pro-Jerry Uttrachi 2015-06-15 Welding is an art and skill that's essential for automotive fabrication, repair, and vehicle upgrades, but it is also an important skill for countless household projects and industries. Some books show merely basic welding techniques with steel and cast iron. But this isn't your run-of-the-mill introductory welding book. In this revised edition of the previous title, Advanced Automotive Welding, Jerry Uttrachi, past president of the American Welding Society, does show you how to perform basic welding procedures with steel and cast iron. But he also reveals advanced welding techniques and the use of aluminum, titanium, magnesium, stainless steel, and other specialty materials. Projects and techniques in this book focus on automotive applications but can also be used for welding a bicycle frame, welding a steel grill, or repairing the frame for a garden bench. TIG, oxyacetylene, arc, and wire-feed welding processes are covered, but special coverage is provided for stick and MIG. Welding butt and V-joints is explained plus welding more complex joints, including J- and U-joints, is also shown. Step-by-step instruction and exceptional detail give you the necessary information to tackle and complete complex welding jobs. Popular automotive projects, such as welding an electric fuel pump into an aluminum tank, repairing chromemoly suspension arms, and welding in floorpans, are thoroughly covered. And when it comes to repairing household items, specific projects such as repairing and modifying the steel tubing on an exercise machine, repairing a decorative bench, and more are covered. Rather than take a project to a shop, you can now do the job at home. Whether you're new to welding or a veteran welder looking to work with special materials or involved in a special project, you will find indispensible information within the pages of this book. Now you can confidently weld with steel, cast iron, aluminum, anodized steel, titanium, magnesium, and other specialty metals.

How to Super Tune and Modify Holley Carburetors-David Vizard 2013 In How to Super Tune and Modify Holley Carburetors, best selling author Vizard explains the science, the function, and most importantly, the tuning expertise required to get your Holley carburetor to perform its best for your performance application.

Hovering Presence-Steve Bonenberger 2007-06-01 "In a discordant and multi-lingual utterance that sounded like a bunch of cattle scratching on the top of a concrete table, Babel reversed itself. With a hundred different languages and a thousand different dialects, the disconnected voices all became one voice. In blurring and indecipherable unison, the peoples of the world declared: 'We will! Abolish all forms of physical currency Install a cashless universal currency and accept The Integer Unite all former adversarial armies as a permanent Peace Keeping Force Absorb all former nation-states and re-form them as The One Nation Grant The One Nation all policing and enforcing authorities Establish a global head tax upon everyone who occupies space and consumes One Nation resources Replace where possible corporations and for profit companies with non-governmental organizations Create a separate and distinct warrior class to keep us secure Defer all future disputes to the provincial judiciary of The One Nation Implant CHIP into every man, woman and child who breathes in The One Nation.'" We pick up with the spellbinding "Through Gates of Fire" series with volume 2: "Hovering Presence." Dr. Flash Bastion, a once prominent member of the Christian world, has fallen sharply from the consciousness of man via dubious means. Flash wanders aimlessly and determines that if God is finished with him, then he is finished with God. After an encounter with death itself, Flash decides it is time to get back on his feet, to attempt a glorious return to his garden of delight. Don't miss the second tome in this riveting series, "Through Gates of Fire: Hovering Presence."

Entertainment Science-Thorsten Hennig-Thurau 2018-08-01 The entertainment industry has long been dominated by legendary screenwriter William Goldman’s “Nobody-Knows-Anything” mantra, which argues that success is the result of managerial intuition and instinct. This book builds the case that combining such intuition with data analytics and rigorous scholarly knowledge provides a source of sustainable competitive advantage – the same recipe for success that is behind the rise of firms such as Netflix and Spotify, but has also fueled Disney’s recent success. Unlocking a large repertoire of scientific studies by business scholars and entertainment economists, the authors identify essential factors, mechanisms, and methods that help a new entertainment product succeed. The book thus offers a timely alternative to “Nobody-Knows” decision-making in the digital era: while coupling a good idea with smart data analytics and entertainment theory cannot guarantee a hit, it systematically and substantially increases the probability of success in the entertainment industry. Entertainment Science is poised to inspire fresh new thinking among managers, students of entertainment, and scholars alike. Thorsten Hennig-Thurau and Mark B. Houston – two of our finest scholars in the area of entertainment marketing – have produced a definitive research-based compendium that cuts across various branches of the arts to explain the phenomena that provide consumption experiences to capture the hearts and minds of audiences. Morris B. Holbrook, W. T. Dillard, Professor Emeritus of Marketing, Columbia University Entertainment Science is a must-read for everyone working in the entertainment industry today, where the impact of digital and the use of big data can’t be ignored anymore. Hennig-Thurau and Houston are the scientific frontrunners of knowledge that the industry urgently needs. Michael Kölmel, media entrepreneur and Honorary Professor of Media Economics at University of Leipzig Entertainment Science’s winning combination of creativity, theory, and data analytics offers managers in the creative industries and beyond a novel, compelling, and comprehensive approach to support their decision-making. This ground-breaking book marks the dawn of a new Golden Age of fruitful conversation between entertainment scholars, managers, and artists. Allègre Hadida, Associate Professor in Strategy, University of Cambridge

The Real North Korea-Andrei Lankov 2014-12-01 After providing an accessible history of the nation, the author turns his focus to what North Korea is, what its leadership thinks and how its people cope with living in such an oppressive and poor place, arguing that North Korea is not irrational, but rather a nation that has survived against all odds.

Iconoclast-Steven Laine 2012-12-20 Ex-reporter Christian Hunt debunks the world’s greatest myths, from the Bermuda Triangle and Loch Ness Monster to Crop Circles. But on Christmas Eve in London, Hunt reluctantly faces his biggest challenge yet. Hunt’s plans for a peaceful Christmas are shattered by an unplanned visit from a man named Ryko, who tells Hunt he has been hired to track down Hailey Osbourne—the woman Hunt loved and lost nine years earlier. With Hailey’s life in jeopardy and terrorists now hot on his trail, Hunt has no choice but to partner with Ryko on a mission to find her and investigate why religious icons around the world are being systematically destroyed. As their perilous journey takes them across Europe, they are plunged into a world of ancient foes and modern conflicts in a race against time to stop a threat far more sinister than they ever imagined. In this fast-paced thriller, conspiracy and danger surround the two men who are about to discover that the destruction of the world’s religious icons is just the beginning.

The Wolverine Way-Douglas Chadwick 2013-10-06 Glutton, demon of destruction, symbol of slaughter, mightiest of wilderness villains... The wolverine comes marked with a reputation based on myth and fancy. Yet this enigmatic animal is more complex than the legends that surround it. With a shrinking wilderness and global warming, the future of the wolverine is uncertain. The Wolverine Way reveals the natural history of this species and the forces that threaten its future, engagingly told by Douglas Chadwick, who volunteered with the Glacier Wolverine Project. This five-year study in Glacier National Park - which involved dealing with blizzards, grizzlies, sheer mountain walls, and other daily challenges to survival - uncovered key missing information about the wolverine's habitat, social structure and reproduction habits. Wolverines, according to Chadwick, are the land equivalent of polar bears in regard to the impacts of global warming. The plight of wolverines adds to the call for wildlife corridors that connect existing habitat that is proposed by the Freedom to Roam coalition.

Read till it shatters-Thak Chaloehtiarana 2018-08-27 This book introduces readers to modern Thai literature through the themes of modernity, nationalism, identity and gender. In the cultural, political and social transformations that occurred in Thailand during the first half of the twentieth century, Thai literature was one of the vehicles that moved the changes. Taking seriously 'read till it shatters', a Thai phrase that instructs readers to take apart the text, to break it down, to deconstruct it, Thak Chaloehtiarana challenges the Thai literary canon from the margins and suggests ways of expanding and enriching it. Thai literature is scarce in translation and requires the skills of a scholar fluent in Thai to comprehend it. Thak is a political scientist turned literary scholar who is bilingual in Thai and English and an avid reader of Thai fiction by authors up and down the social scale. Here he offers lively insights into his favourite literary genres with fresh readings of early Thai novels, Sino-Thai biographies and memoirs of the rich and famous. Thak Chaloehtiarana is an inquisitive man. Late in his career he switched from politics to literature. In these chapters, he draws on a lifetime of reading about writers and writing in Thailand over the past century. He nods towards the usual big names—King Vajiravudh, Luang Wichit, Kulap Saipradit, Kukrit Pramoj—but spends more time on those found in the lesser visited stacks of the libraries, the secondhand bookstalls, and the shelf by the supermarket checkout. His themes are familiar—Thailand and the West, Thai nationalism, the Thai-Chinese, and women under patriarchy—but the angles of vision are original. With a cast ranging from motor-racing princes through sexy Egyptian mummies and a feminist serial murderer to starlets touting breast-enhancement techniques, this book educates, enlightens, and entertains.'

Don't Lick the Minivan-Leanne Shirliffle 2015-11-03 As a woman used to traveling and living the high life in Bangkok, Leanne Shirliffle recognized the constant fodder for humor while pregnant with twins in Asia's sin city. But in spite of deep-fried hup cuisine and nurses who cover newborn bassinets with plastic wrap, Shirliffle manages to keep her babies alive for a year with help from a Coca-Cola deliveryman, several waitresses, and a bra factory. Then she and her husband return home to the isolation of North America suburbia. In Don't Lick the Minivan, Shirliffle captures the bizarre aspects of parenting in her edgy, honest voice. She explores the hazards of everyday life with children such as: The birthday party where neighborhood kids took home skin rashes from the second-hand face paint she applied. The time she discovered her twins carving their names into her minivan's paint with rocks. The funeral she officiated for "Stripper Barbie." The horror of glitter. And much more! Shirliffle eventually realizes that even if she can't teach her kids how to tie their shoelaces, she's a good enough mom. At least good enough to start saving for her twins' therapy fund. And possibly her own. Shirliffle's memoir might not replace a therapist, but it is a lot cheaper.

Coventry Climax Racing Engines-Des Hammill In the 50s & 60s Coventry Climax engines powered many race-winning cars, including some driven by Stirling Moss & Jack Brabham. To get the true inside story, the author, an engineer, has talked to all surviving Coventry Climax personnel who were involved with the racing engines. The author was given full access to all of Walter Hassan's papers, photographs and engine drawings. After 30 months of original research and writing, this book describes exactly how these famous engines developed from industrial fire pumps to the Hillman Imp, from Le Mans winning Lotus Elites to Formula One winners driven by Stirling Moss and Jack Brabham, right through to the company's takeover by Jaguar in 1963. Viewed through the eyes of an engineer, and the detailed recollections of those who were there, this is a fascinating account of the trials and tribulations of leading edge race engine design from 1952 to 1966.

Ambush Marketing & the Mega-Event Monopoly-Andre M. Louw 2012-06-06 This book undertakes a critical examination of commercial rights to sports mega-events (focusing on sponsorship), the exclusivity of such rights and the legal implications of the modern mega-event sponsorship model. It examines ambush marketing of events and the law's treatment of ambushng (specifically in the form of sui generis event legislation) in a review of 10 major jurisdictions selected on the basis of the importance of the events they are to host in the near future or have hosted recently, and the relevant domestic legislation. It critically examines the legitimacy of such commercial rights protection by means of the use of laws in the context of accepted principles of intellectual property law, competition law and human rights law. Specifically, it questions the legitimacy of the creation of statutory 'association rights' to mega-events, and considers potential future developments in respect of the law's treatment of mega-event commercialisation. Valuable for practitioners and academics (in the fields of sports/law/sponsorship/marketing/intellectual property law); sports administrators (sports governing bodies); corporate sponsors of sports and other events; potential mega-event host governments and law-makers; civil rights organisations.

Art and the Challenge of Markets Volume 2-Victoria D. Alexander 2018-01-16 Art and the Challenge of Markets Volumes 1 & 2 examine the politics of art and culture in light of the profound changes that have taken place in the world order since the 1980s and 1990s. The contributors explore how in these two decades, the neoliberal or market-based model of capitalism started to spread from the economic realm to other areas of society. As a result, many aspects of contemporary Western societies increasingly function in the same way as the private enterprise sector under traditional market capitalism. This second volume analyses the relationships of art with contemporary capitalist economies and instrumentalist cultural policies, and examines several varieties of capitalist-critical and alternative art forms that exist in today's art worlds. It also addresses the vexed issues of art controversies and censorship. The chapters cover issues such as the culturalization of the economy, aesthetics and anti-aesthetics, the societal benefits of works of art, art's responsibility to society, "artivism", activist arts as protest and capitalism-critical works, and controversies over nudity in art, as well as considering the marketisation of emerging visual arts worlds in East Asia. The book ends with a concluding chapter suggesting that even in today's marketized and commercialized environments, art will find a way. Both volumes provide students and scholars across a range of disciplines with an incisive, comparative overview of the politics of art and culture and national, international and transnational art worlds in contemporary capitalism.

Guide to Home Language Repair-Dennis E. Baron 1994-01-01 This book examines Americans' obsession with grammar and usage, and how the flexibility and fluidity of the English language affect notions about what is and is not "correct" English. Confronting the popular image of the English teacher as a card-carrying member of the language police, the book takes a critical look at past and present attempts to play off the linguistic fears of Americans (i.e., modern usage guides). Issues such as whether the English language is dying, double standards and plagiarism, political correctness and language taboos, and the relevance of spelling bees in this age of spell checkers, are examined. The book also presents the "five best words of the 80s," the most important words of 1990, the best words of 1991, and new words for 1992. (NKA)

Mopar Minivans-David Zatz 2019-02-04 In the early 1970s, Chrysler started working on a "magic wagon" -- a completely new passenger van that would fit into a normal garage. It was a daring project for a company that was strapped for cash. This book taps the people who created the minivans, with previously unpublished photos of the original clay models. It is not just a story of a vehicle, but of the people who pushed it through the development process, brought it to life, and refreshed it in the face of intense competition. Engineers, planners, and designers started arguing over alternatives ten years before the first van left the factory. This book dives into the reasons behind their decisions, and some of the ways minivans could have been very different; it also covers electric and CNG minivans, engines and transmissions, concept cars, and the assembly plants. The paperback is generously illustrated with full-color design studies and photos of the final product; the Kindle version has fewer photos, but still covers the original clay models and the concepts. "It's incredibly rare when the auto industry creates an entirely new class of vehicle, and rarer still when that innovation is an unqualified success story, but such was the case with Chrysler and the development of the minivan. "In Mopar Minivans, Zatz uses the people who were there to retell in vivid detail the largely forgotten story of how this innovative people mover evolved into a quintessential piece of American family life for two generations. It's a story that showcases not only how the automotive industry can work at its best, but also the ways that the industry's prevalent groupthink mentality can stifle innovation." -- Larry Vellequette, Automotive News "I am amazed how complete you are, having not been on-site in the front trenches during agreements, disagreements, and, yes, even skirmishes, at times." -- Chrysler employee David Zatz founded Chrysler-focused web site allpar.com; he also holds a

Ph.D. in social and organizational psychology from Columbia University, and has been a business consultant for 20 years.
