A Slice of the Pie-Nick Sarillo 2012-09-13 How does a suburban pizza joint end up profiled on national magazine covers and network TV news? (Hint: The secret is not in the sauce.) When Nick Sarillo decided to open a family-friendly pizza restaurant in the suburbs of Chicago, people thought he was nuts. Having worked as a carpenter for much of his adult life, he lacked any formal experience in restaurants or in managing a small business. Everyone told him no one else would ever care about his place the way he did. They warned he'd have to work 20-hour-days and monitor every employee just to stay in business. But Sarillo saw things differently, and set out to run his business in a radically different way. Today Nick's Pizza & Pub is one of the top ten busiest independent pizza restaurants in the country, with two locations that gross about six times the revenue of the typical pizza restaurant. And in an industry where most employees leave within less than a year, Nick's annual turnover rate is less than 20 percent. How did he do it? The secret lies in Nick's purpose-driven culture, in which every employee—from the waiters to the chefs to the managers—is equipped with the tools necessary to do their jobs while also advancing the company's overall mission. The result is higher sales, a dedicated team, and a big little business that is beloved by the entire community. In A Slice of the Pie Sarillo tells the story of how he built his extraordinary culture and shows how anyone can follow his methods. For instance, Nick's managers engage the staff by tracking and rewarding unusual metrics, such as how many guests request a particular server or the average check amount of each carryout host. Likewise, team members of all ages and levels of experience are encouraged to express themselves, acquire new skills, and suggest ideas to help the business grow. A Slice of the Pie will help transform even the smallest, simplest, and most ordinary business into a successful, high-performance organization.

Milwaukee's Early Architecture-Megan E. Daniels 2010-07-19 Initially dominated by simple renditions of East Coast architecture, Milwaukee developed from three pioneer settlements, those of Solomon Juneau, Byron Kilbourn, and George Walker—three hubs from which three villages radiated outward into one city. Following the Civil War, Milwaukee's growth at the onset of the Industrial Era afforded the city a fanciful array of Victorian streetscapes. The 1890s followed with an era of ethnic architecture in which bold interpretations of German Renaissance Revival and Baroque designs paid homage to Milwaukee's overwhelming German population. At the turn of the century, Milwaukee's proximity to Chicago influenced the streetscape with classicized civic structures and skyscrapers designed by Chicago architects. World War I and the ensuing anti-German sentiment, as well as Prohibition, inevitably had adverse effects on "Brew City." By the 1920s, Milwaukee's architecture had assimilated to the national aesthetic, suburban development was on the rise, and architectural growth would soon be stunted by the Great Depression.

Feminism and the Politics of Travel After the Enlightenment-Yaël Rachel Schlick 2012-01 Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert, George Sand, Robyn Davidson, and Sara Wheeler.

A Requiem for a Brand-Pradip Chanda 2010 Drawing from his extensive business management experience, Pradip Chand turns traditional wisdom on its head when he proposes that Brand Loyalty is inversely proportional to the income and education levels of the 'knowledge consumer'. He examines how and why brands become strategic assets, traces the evolution of the knowledge consumer and what can companies do to protect equity of the brands they have nurtured over the decades. A new approach to building a Brand Loyalty that gives marketers a competitive edge in today's high-tech, high-stake brand-hostile environment. The book combines the knowledge with engaging real life case studies and proven examples.

Coventry Climax Racing Engines-Des Hammill In the 50s & 60s Coventry Climax engines powered many race-winning cars, including some driven by Stirling Moss & Jack Brabham. To get the true inside story, the author, an engineer, has talked to all surviving Coventry Climax personnel who were involved with the racing engines. The author was given full access to all of Walter Hassan's papers, photographs and engine drawings. After 30 months of original research and writing, this book describes exactly how these famous engines developed from industrial fire pumps to the Hillman Imp, from Le Mans winning Lotus Elites to Formula One winners driven by Stirling Moss and Jack Brabham, right through to the company's takeover by Jaguar in 1963. Viewed through the eyes of an engineer, and the detailed recollections of those who were there, this is a fascinating account of the trials and tribulations of leading edge race engine design from 1952 to 1966.

Escaping the Prism... Fade to Black-Jalil Muntaqim 2015-10-01 Jalil Muntaqim is a former member of the Black Panther Party and the Black Liberation Army. For over forty years, Jalil has been a political prisoner, and one of the New York Three (NY3), in retaliation for his political activism. Escaping the Prism ... Fade to Black is a collection of Jalil's poetry and essays, written from behind the bars of Attica prison. Combining the personal and the political, these texts afford readers with a rare opportunity to get to know a man who has spent most of his life-over forty years-behind bars for his involvement in the Black Liberation Movement of the 1960s and early 1970s. Jalil's poetry deals with a range of themes-spirituality, history, and the struggle for justice; depression, humor, and sexual desire; the pain and loneliness of imprisonment, the ongoing racist oppression of New Afrikan people in the United States, and the need to find meaning in one's life. At the same time, his political essays show him to be as eager as ever to intervene in and grapple with the events of today, always with an eye to concretely improving the lives of the oppressed. Escaping the Prism ... Fade to Black also includes an extensive examination of the U.S. government's war against the Black Liberation Army in general, and Jalil and the New York Three in particular, by renowned scholar-activist Ward Churchill. In this highly detailed essay, "The Other Kind: On the Integrity, Consistency, and Humanity of Jalil Abdul Muntaqim," Churchill traces this story from the FBI's murderous COINTELPRO repression of the Black Panther Party, through the NEWKILL operation which led to the NY3's incarceration, to the more recent Phoenix Taskforce which orchestrated the re-prosecution of Jalil and other veteran Black activists, in the case of the San Francisco 8. With illustrations by revolutionary prisoner-artists Zolo Agona Azania and Kevin "Rashid" Johnson, as well as various outside artist-activists.

Weld Like a Pro-Jerry Uttrachi 2015-06-15 Welding is an art and skill that's essential for automotive fabrication, repair, and vehicle upgrades, but it is also an important skill for countless household projects and industries. Some books show merely basic welding techniques with steel and cast iron. But this isn't your run-of-the-mill introductory welding book. In this revised edition of the previous title, Advanced Automotive Welding, Jerry Uttrachi, past president of the American Welding Society, does show you how to perform basic welding procedures with steel and cast iron. But he also reveals advanced welding techniques and the use of aluminum, titanium, magnesium, stainless steel, and other specialty materials. Projects and techniques in this book focus on automotive applications but can also be used for welding a bicycle frame, welding a steel grill, or repairing the frame for a garden bench. TIG, oxyacetylene, arc, and wire-feed welding processes are covered, but special coverage is provided for stick and MIG. Welding butt and V-joints is explained plus welding more complex joints, including J- and U-joints, is also shown. Step-by-step instruction and exceptional detail give you the necessary information to tackle and complete complex welding jobs. Popular automotive projects, such as welding an electric fuel pump into an aluminum tank, repairing chromemoly suspension arms, and welding in floorpans, are thoroughly covered. And when it comes to repairing household items, specific projects such as repairing and modifying the steel tubing on an exercise machine, repairing a decorative bench, and more are covered. Rather than take a project to a shop, you can now do the job at home. Whether you're new to welding or a veteran welder looking to work with special materials or involved in a special project, you will find indispensable information within the pages of this book. Now you can confidently weld with steel, cast iron, aluminum, anodized steel, titanium, magnesium, and other specialty metals.

Manual on Test Sieving Methods-ASTM Committee E-29 on Particle and Spray Characterization 1998 1.1 Standard test sieves that conform to ASTM Specification E 11 (Table 1) are referred to as U.S. Standard Testing Sieves and should always be used in a test sieve-based particle size measurement program.

This series of test sieves, based on the principle of a fixed ratio of 4:2:1 between the sieve openings, was first introduced in the United States in 1910 and since has achieved worldwide use. The concept was pioneered by Peter Ritter von Rittinger of Austria in 1867. The number of sieves in the series and the spacing of the openings in the scale have been proved, by over 90 years experience, to be ideal for the separation of particulate materials according to designated size analysis using sieves. Since 1910, many countries have adopted national sieve standards based on the same fixed ratio as the U.S. Series.

A Source Book in Classical Analysis-Garrett Birkhoff 1973 An understanding of the developments in classical analysis during the nineteenth century is vital to a full appreciation of the history of twentieth-century mathematical thought. It was during the nineteenth century that the diverse mathematical formulae of the eighteenth century were systematized and the properties of functions of real and complex variables clearly distinguished; and it was then that the calculus matured into the rigorous discipline of today, becoming in the process a dominant influence on mathematics and mathematical physics. This Source Book, a sequel to D. J. Struik's Source Book in Mathematics, 1200-1800, draws together more than eighty selections from the writings of the most influential mathematicians of the period. Thirteen chapters, each with an introduction by the editor, highlight the major developments in mathematical thinking over the century. All material is in English, and great care has been taken to maintain a high standard of accuracy both in translation and in transcription. Of particular value to historians and philosophers of science, the Source Book should serve as a vital reference to anyone seeking to understand the roots of twentieth-century mathematical thought.
