The Human Capital Challenge-United States 2003
New "dual Missions" of the Immigration Enforcement Agencies-United States 2005
Making Peace Last-Robert Ricigliano 2015-11-17 The international community invests billions annually in thousands of projects designed to overcome poverty, stop violence, spread human rights, fight terrorism and combat global warming. The hope is that these separate projects will 'add up' to lasting societal change in places like Afghanistan. In reality, these initiatives are not adding up to sustainable peace. Making Peace Last offers ways of improving the productivity of peacebuilding. This book defines the theory, analysis and practice needed to create peacebuilding approaches that are as dynamic and adaptive as the societies they are trying to affect. The book is based on a combination of field experience and research into peacebuilding and conflict resolution. This book can also be used as a textbook in courses on peace-building, security and development. Making Peace Last is a comprehensive approach to finding sustainable solutions to the world's most pressing social problems.
Structural Imbalance of the District of Columbia-United States. Congress. Senate. Committee on Appropriations. Subcommittee on District of Columbia 2005
Exit Strategies and State Building-Richard Caplan 2012-08-10 In the past two decades, states and multilateral organizations have devoted considerable resources toward efforts to stabilize peace and rebuild war-torn societies in places such as Afghanistan, Iraq, Kosovo, and Sierra Leone. Despite these prodigious efforts, there has been relatively little consideration of the critical questions arising from the "end game" of state-building operations. In Exit Strategies and State Building, sixteen leading scholars and practitioners focus on relevant historical and contemporary cases of exit to provide a comprehensive overview of this crucial issue. By examining the major challenges associated with the conclusion of international state-building operations and the requirements for the maintenance of peace in the period following exit, this book provides unique perspective on a critical aspect of military and political intervention. Deftly researched, Exit Strategies and State Building sheds new light on what is not merely an academic issue, but also a pressing global policy concern.
Standard and Poor's 500 Guide, 2012 Edition-Standard & Poor's 2011-12-16 The most accurate, up-to-date market intelligence for superior investment decisions—from the world's premier financial index! Managing the NIH Bethesda Campus Capital Assets for Success in a Highly Competitive Global Biomedical Research Environment-National Academies of Sciences, Engineering, and Medicine 2019-10-02 The National Institutes of Health (NIH) is the primary agency of the United States government responsible for biomedical and public health research. Founded in the late 1870s, NIH has produced extraordinary advances in the treatment of common and rare diseases and leads the world in biomedical research. It is a critical national resource that plays an important role in supporting national security. The 310-acre Bethesda campus supports some 20,000 employees and contractors, and it contains more than 12 million square feet of facilities divided amongst nearly 100 buildings, including the largest dedicated research hospital in the world. The Bethesda campus supports some of the most sophisticated and groundbreaking biomedical research in the world. However, while some new state-of-the-art buildings have been constructed in recent years, essential maintenance for many facilities and the campus overall has been consistently deferred for many years. The deteriorating condition of NIH's built environment is now putting its ability to fulfill its mission at substantial risk. Managing the NIH Bethesda Campus's Capital Assets for Success in a Highly Competitive Global Biomedical Research Environment identifies the facilities in greatest need of repair on the Bethesda campus and evaluates cost estimates to determine what investment is needed for the NIH to successfully accomplish its mission going forward.
Public Procurement Review of the State's Employees' Social Security and Social Services Institute in Mexico-Oecd 2013 How can citizens' health and well-being be improved when public resources are limited? What practices allow hospitals and health clinics to get state of art medical equipment and medicine at the right price? The OECD Procurement Review of the Mexican State's Employees' Social Security and Social Services Institute (ISSSTE) looks at the public entity responsible for providing medical and social services to Mexican civil servants. It provides a comprehensive assessment of its procurement function and how to improve it in order to enhance the overall efficiency and transparency of the organisation and the quality of the services it provides. The review builds on the OECD Principles for Enhancing Integrity in Public Procurement, good practices of other health organisations as well as comparative data on public procurement in OECD countries.
Ten Strategies of a World-Class Cybersecurity Operations Center-Carson Zimmerman 2014-07-01 Ten Strategies of a World-Class Cyber Security Operations Center conveys MITRE's accumulated expertise on enterprise-grade computer network defense. It covers ten key qualities of leading Cyber Security Operations Centers (CSOCs), ranging from their structure and organization, to processes that best enable smooth operations, to approaches that extract maximum value from key CSOC technology investments. This book offers perspective and context for key decision points in structuring a CSOC, such as what capabilities to offer, how to architect large-scale data collection and analysis, and how to prepare the CSOC team for agile, threat-based response. If you manage, work in, or are standing up a CSOC, this book is for you. It is also available on MITRE's website, www.mitre.org.
The Directory of Venture Capital Firms, 2002-Grey House Publishing 2001-11 This brand new Sixth Edition has been extensively updated and broadly expanded to offer direct access to over 2,800 Domestic and International Venture Capital Firms, including address, phone & fax numbers, e-mail addresses and web sites for both primary and branch locations. South Bend Defense Industries-Patrick R. Foster 2020-06 The three things needed for the defense of a nation and its people are honest, resolute leaders; brave military service members; and a dedicated industry that can provide the proper tools needed to keep citizens safe from harm. Ever since the very beginning of the United States' existence, businesses have devoted countless amounts of time and effort to design, engineer, and produce the weapons and systems that the men and women of the armed forces need for protecting the country. A substantial part of America's "Arsenal of Democracy" has been centered in and around South Bend, Indiana. The Studebaker Company produced thousands of wagons for the Union army during the Civil War, plus trucks, aircraft engines, and more for later conflicts. Today, its descendant AM General Corporation produces tactical wheeled vehicles, including the renowned Humvee in all its many variations, for the United States and its allies. Honeywell Corporation has a long and colorful history in South Bend as well, while many smaller companies answered the call to produce military equipment for the armies of freedom.

Communities in Action-National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
Directory of Corporate Affiliations- 2001 Described as "Who owns whom, the family tree of every major corporation in America, " the directory is indexed by name (parent and subsidiary), geographic location, Standard Industrial Classification (SIC) Code, and corporate responsibility.

The Technological Revolution in Financial Services-Michael R. King 2020-08-26 The financial services industry is being transformed by heightened regulation, technological disruption, and changing demographics. These structural forces have lowered barriers to entry, increasing competition from within and outside the industry, in the form of entrepreneurial FinTech fintech start-ups to large, non-financial technology-based companies. The Technological Revolution in Financial Services is an invaluable resource for those eager to understand the evolving financial industry. This edited volume outlines the strategic implications for financial services firms in North America, Europe, and other advanced economies. The most successful banks, insurance companies, and asset managers will partner with financial technology companies to provide a better and more innovative experience services to retail customers and small businesses. Ultimately this technological revolution will benefit customers and lead to a more open and inclusive financial system.

The Future of the Public's Health in the 21st Century-Institute of Medicine 2003-02-01 The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.
