The work spans the period from the pivotal migrations which saw the peopling of the world, examines the processes by which tribal peoples established themselves as separate from surplus-based and more material societies, and considers the impact of the policies of domination and colonization which brought dramatic change to indigenous cultures. The book covers both tribal societies affected by the expansion of European empires and those indigenous cultures influenced by the economic and military expansion of non-European powers. The work concludes with a discussion of contemporary political and legal conflicts between tribal peoples and nation-states and the on-going effort to sustain indigenous cultures in the face of globalization, resource developments and continued threats to tribal lands and societies. Military Jeep-Pat Ware 2011-01-01 The Jeep was the primary light four-wheel-drive vehicle of the US Army and allies during the Second World War and the post-war period. It was originally designed to meet a 1940 US Army specification, and over 600,000 examples were built in both Ford and Willys forms. The Jeep saw service all over the world, and a healthy number of restored authentic military examples can still be seen today in the hands of enthusiasts. This book provides a brief history of this iconic vehicle, and a fascinating behind-the-scenes insight into what is involved in restoring, operating and maintaining a Jeep today, 70 years after the prototype first appeared. Understanding SOA Security Design and Implementation-Axel Buecker 2008-05-29 Securing access to information is important to any business. Security becomes even more critical for implementations structured according to Service-Oriented Architecture (SOA) principles, due to loose coupling of services and applications, and their possible operations across trust boundaries. To enable a business so that its processes and applications are flexible, you must start by expecting changes - both to process and application logic, as well as to the policies associated with them. Merely securing the perimeter is not sufficient for a flexible on demand business. In this IBM Redbooks publication, security is factored into the SOA life cycle reflecting the fact that security is a business requirement, and not just a technology attribute. We discuss an SOA security model that captures the essence of security services and securing services. These approaches to SOA security are discussed in the context of some scenarios, and observed patterns. We also discuss a reference model to address the requirements, patterns of deployment, and usage, and an approach to an integrated security management for SOA. This book is a valuable resource to senior security officers, architects, and security administrators. Hope Rising-Casey Gwinn 2018-05-15 Hope Rising is a clarion call to apply the science of hope in daily life and overcome the trauma, adversity, and struggles everyone must face. Hope is the most predictive indicator of well-being in a person's life in all the research done on trauma, illness, and resiliency. Based on nearly 2,000 published studies about hope, including their own research, Casey Gwinn and Chan Hellman call for rising hope to be the focus not only in personal lives, but in public policy in education, business, social services, and every other part of society. Hope is measurable. Hope is malleable. Hope changes lives. Hope Rising provides a roadmap to measure hope in your life, assess what may have robbed you of the power of hope, and then provides strategies to increase hope. It challenges every reader to be transparent and honest about their own stories of struggle and adversity, calls for the end of shame and blame in addressing the struggles of those who have experienced trauma, illness, or abuse, and provides practical ways to increase your Hope score and thrive because of it. Westwater Lost and Found-Mike Milligan 2004-02 In this heavily illustrated book, Mike Milligan has captured the still developing story of one of those remote, but no longer secluded, corners of the Colorado Plateau. Upstream from Moab on the Colorado River, near the Colorado state line, there is a relatively short, deep canyon that has become one of the most popular river-running destinations in America. The canyon is known as Westwater. Its popularity is largely due to the thrill provided by one of the most dangerous and challenging stretches of white water on the Colorado--Skull Rapid. Near the head of the canyon are the remnants of the tiny town of Westwater, which has had an interesting and eventful history of its own, partly because of the river and canyon, partly because of the railroad that passes through it, and partly because of its remoteness. It has attracted over the years more than its fair share of colorful characters--government explorers and agents, boosters and get-rich-quick dreamers, cattle and sheep men, outlaws and bootleggers, and, of course, river runners. Mike Milligan, who came to know the area as a river guide, has written a thorough history of this out-of-the-way place. While it has a colorful history that makes its story interesting in and of itself, Westwater's significance derives more from a phenomenon of the modern West--thousands of recreational river runners. They have pushed a backwater place into the foreground of modern popular culture in the West. Westwater seems to represent one common sequence in western history: the late opening of unexplored territories; sporadic, often unsuccessful attempts to develop them; renewed obscurity when development doesn't succeed; their attraction of a marginal society of misfits or loners; and modern rediscovery due to new cultural motives, especially outdoors recreation, which has brought a great number of people into thousands of remote corners of the West. Hormones and Atherosclerosis-Gregory Pincus 2013-10-22 Hormones and Atherosclerosis covers the proceedings of the conference held in Brighton, Utah on March 11-14, 1958. The book focuses on the role of hormones in atherosclerosis, as well as cholesterol metabolism and biosynthesis, lipogenesis, and lipid transport. The selection first discusses the biosynthesis of cholesterol and aspects of the biosynthesis of cholesterol from mevalonic acid. Discussions focus on components of liver homogenates and coenzymes required for squalene and sterol synthesis from mevalonic acid and preservation of enzymes and microsomes. The text also ponders on the formation and metabolism of bile acids under different conditions and thyroid function, thyroxine analogs, and cholesterol metabolism in rats and rabbits. The book elaborates on the comparison of the participations of fibroblasts and reticuloendothelial cells in the synthesis and metabolism of cortisol and cholesterol and control of aortal lipid metabolism and lipid movement by hormones and vitamins. The manuscript also examines the influence of estrogens on lipids and atherosclerosis in experimental animals and the effect of adrenals, pituitary, liver, and mucopolysaccharides on blood lipids. The selection is a dependable reference for readers interested in the relationship of hormones and atherosclerosis. Eden of the South-Ranéé G. Pruitt 2005 High-Performance Jeep Wrangler TJ Builder's Guide-Christian Lee 2007 From Willys and Overland Jeeps of World War II, to the CJ models of '70s and early '80s, to the slightly more civilized Wrangler, the Jeep has become an American icon. Bourque 2015-01-22 Jayhawk! The VII Corps in the Persian Gulf War is a highly readable account of the involvement of Lt. Gen. Frederick M. Franks's command in Operation DESERT SHIELD/DESERT STORM. The arrival of Jayhawk-the historic nickname for corps having the number seven-with its armor heavy forces gave the coalition the offensive option to drive the Iraqi Army out of Kuwait, but the rapid conclusion of the popularly known 100-Hour War with smart bombs, precision-guided weapons, and efficient electronics fostered what Stephen A. Bourque calls the illusion of a simple, almost push-button, operation with a preordained outcome. Arguing that the endeavor was anything but simple, Bourque tells the full story of the VII Corps from its deployment to Saudi Arabia, through its phases of preparation and its offensive against the Iraqi Army, to finally its return to Europe and the United States, in the process bringing alive the scale and complexities involved in assembling, moving, and controlling men and materiel. Bourque's volume captures valuable combat lessons, especially the singular performance of General Franks and the effectiveness of the U.S. Army's technology, training, leadership, and warfighting doctrine. It is a must-read for all soldiers. Growth and International Trade-Karl Farmer 2013-02-01 This textbook guides the reader towards various aspects of growth and international trade in a Diamond-type overlapping generations framework. Using the same model type throughout the book, timely topics such as growth with bubbles, debt reduction in rich countries and policies to mitigate climate change are explored . The first part starts from the "old" growth theory and bridges to the "new" growth theory (including R&D and human capital approaches). The second part presents an intertemporal equilibrium theory of inter and intra-sectoral trade and concludes by analyzing the debt mechanisms inducing the huge imbalances among eurozone countries. The book is primarily addressed to graduate students wishing to proceed to the analytically more demanding journal literature. General William E. DePuy-Henry G. Gole 2008-09-26 Considered one of most influential U. S. military officers of the twentieth century, William E.
