Preserving New York-Anthony Wood 2013-10-28 Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

European Union Accession- 1999 As the European Union (EU) launches its common currency (the Euro), Central European (CE) nations are searching for best practices in public liability management in order to smooth their integration into the EU. This work addresses that concern, examining borrowing policies, institution building, portfolio optimization, and the implications of the Euro and EU accession for public debt management. To help the CE countries achieve their goals, the World Bank and the European Commission held a two-day seminar in Brussels in mid-December 1997. European Union Accession presents the papers delivered at that seminar which was attended by all ten EU applicant countries: Bulgaria, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, the Slovak Republic, and Slovenia. The workshop pursued the following goals: 1. to investigate the implications of the launch of the Euro and of the EU accession on fiscal prudence and on the borrowing strategies of CE countries; 2. to facilitate the dissemination of the best public liabilities management techniques developed worldwide; and 3. to explore plausible arrangements to promote prudent public liabilities management in Central Europe through a regional expertise network.

Just a Spoonful of Laughter Helps the Medicine Go Down-Richard D. Edgerly, MD 2011-03-29 Just a Spoon Full of Laughter...is a great read for anyone that's been to a doctor's office and made it out alive. Written by an actual physician, it will keep you in stitches (no pun intended) from one story to the next. See for yourself what could be so funny about the physician office visit. Whether it's recalling his first sigmoidoscopy or performing an autopsy, you'll keep this riveting series of short humorous stories right there in the bathroom for pleasurable reading. You may even find yourself somewhere between the pages. From an author who will never be a New York Times Best Seller, it's a great book for young or old, male or female, professional or not. It's especially ideal for that person in your life who has everything except a sense of humor. It's ideal as a stocking stuffer, white elephant gift or for future yard sales. "The funniest book I ever read." Says Dr. Zhivago "Yes! Yes! Yes!" Says Dr. No

Sustainable Rice Straw Management-Martin Gummert 2020-01-01 This open access book on straw management aims to provide a wide array of options for rice straw management that are potentially more sustainable, environmental, and profitable compared to current practice. The book is authored by expert researchers, engineers and innovators working on a range of straw management options with case studies from Vietnam, the Philippines and Cambodia. The book is written for engineers and researchers in order to provide them information on current good practice and the gaps and constraints that require further research and innovation. The book is also aimed at extension workers and farmers to help them decide on the best alternative straw management options in their area by presenting both the technological options as well as the value chains and business models required to make them work. The book will also be useful for policy makers, required by public opinion to reduce greenhouse gas emissions and air pollution, looking for research-based evidence to guide the policies they develop and implement.

Democracy in Eastern Asia-Edmund S. K. Fung 2013-11-20 With the 'Asian Century' now upon us, bringing with it many profound economic and political changes to the world order, it is very timely to assess the state of democracy in the Asian region. Focusing on Eastern Asia, this book provides such a review, highlighting lines of connections between the states and peoples of this complex and dynamic region. Featuring chapters on China, Japan, Taiwan, South Korea, Hong Kong, Indonesia, Malaysia, Singapore, Thailand, the Philippines, Cambodia, and Myanmar, this book provides a detailed analysis of the state of democracy in each country or territory, and shows how each is different and distinctive, whilst simultaneously drawing out important similarities. Further, it provides up to date analysis of political changes in the region relating to the processes of democratization, and, in some cases, to the ongoing quest for democracy. Critically examining the current state of political development in the region, the chapters explore the issues and problems that challenge the region's governments in terms of democratic transition, democratic consolidation, democratic improvement and good governance. With contributions from leading international scholars, this book will be of great interest to students and scholars interested in Asian politics, and politics and democratization studies more broadly.

Biological Methylation and Drug Design-Ronald T. Borchardt 1986-04-15 This book has been developed from its earlier and far less formal presentation as the proceedings of a symposium entitled The Biochemistry of S-Adenosylmethionine as a Basis for Drug Design that was held at the Solstrand Fjord Hotel in Bergen, Norway on June 30-July 4, 1985. The purpose of the symposium was to bring together scientists from various disciplines (biochemistry, pharmacology, virology, immunology, chemistry, medicine, and so on) to discuss the recent advances that have been made in our understanding of the biological roles of S adenosylmethionine (AdoMet) and to discuss the feasibility of utilizing AdoMet-dependent enzymes as targets for drug design. Thus the information provided herein will be of value not only to basic scientists involved in elucidating the role of AdoMet in biology, but also to medicinal chemists who are using this basic knowledge in the process of drug design. The volume should also be of interest to pharmacologists and clinicians involved in biological evaluation of potential therapeutic agents arising from the efforts of the biochemists and medicinal chemists. Each plenary speaker at the symposium was requested to submit a chapter reviewing recent contributions of their discipline to our base of knowledge about the biological role of AdoMet. Topics covered in this volume include protein and phospholipid methylations (Section A), nucleic acid methyl ations (Section B), the regulation of AdoMet, S-adenosylhomocysteine, and methylthioadenosine metabolism (Section C), clinical aspects of AdoMet (Section D), and the design, synthesis, and biological evaluation of trans methylation inhibitors (Section E).

Economic Development: Global & Regional Studies-Halil İbrahim Aydın, Magdalena Ziolo, Aniela Bălăcescu 2017-04-14 The phenomenon of globalization can be described as a gradual increase in the process and dependency level that combines people, society and countries from different economic, social and political aspects of the world. Development, which is a multidimensional concept such as globalization, is a concept that includes human values as well as economic, social, cultural, demographic and political dimensions. With the globalization process, a turn to use knowledge as a factor of production has been passed, and investing in people who use knowledge in production has become important. Investment in human capital leads to the importance of development concept. The relationship of the development process with the different fields pioneered the preparation of scientific works in the context of globalization and regional studies. In this book "Economic Development: Global and Regional Studies", there are academicians who work in different universities of Turkey and the World and work in the field of development. The scientific ethics and responsibility of the works in the book belong to the authors / writers who own the department, of course, and we believe that the necessary sensitivity is shown in this issue. This book in your hand is made up of 15 chapters, and development in each chapter is analyzed from different angles. We believe that the detailed content will contribute to economic development literature. We would like to thank all the authors whose paper published on this book. Our hope is to provide some ideas which can inspire academicians and students not only to understand different problems that the world is facing, but some solution as well.

Islam in the West-Max Farrar 2012-06-29 "In recent years the debate on multiculturalism in the UK and other Western societies has focused principally on Islam, and the specific 'problems' said to be posed by Muslims have been invoked to justify the claim that multiculturalism has failed. That claim is opened to scrutiny and challenged in this unique collection through a series of explorations of specific issues and controversies - including the question of the veil, crime, political Islam, the role of Muslim women, sexuality and the Danish cartoons affair - and through more general reflections on the nature of multiculturalism. By exploring the nature of cultural differences and sensitivities and examining the way conflicts have played out, this challenging book makes a wide-ranging contribution to debate and a more constructive inter-cultural engagement. The contributors draw upon the disciplines of social science, ethics, theology, philosophy and education to examine the nature of the issues and flashpoints and to draw out implications for theory, policy and practice." --from back cover.

Feminism and the Politics of Travel After the Enlightenment-Yaël Rachel Schlick 2012-01 Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, Feminism and the Politics of Travel After the Enlightenment explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert, George Sand, Robyn Davidson, and Sara Wheeler.

Trace Elements in Obstetrics and Gynecology-Naira Roland Matevosyan, Dr 2013-02-10 A trace element (TE) is a chemical element presented below ~0.1 wt. % and required in minute quantities to maintain proper physical functioning. TE analysis in clinical samples (plasma, urine, cerebro-spinal fluid, full-term placenta, hair, nails, buccal mucosa, semen, biopsy specimens) has received increasing attention. Based on 62 sources, current effort presents comparative knowledge about the attempts to accurately trace TE in clinical samples through Vis/NIR, PIXE, TXRF, GFAAS, ICP-MS. It informs the need for further research adjustments to reveal the reciprocal states of certain TE (Cu/Zn, Ca/Mg, Fe/Pb) in correlation with their real-time counts in both maternal and neonatal umbilical cord plasma, and in relation to augmented oxidative stress. This would help to achieve consistency in interpreting obstetrical complications (preeclampsia, prematurity, or gestational diabetes). Generated hypotheses should target plausible mechanisms behind TE alterations and their stage-sensitive measures in gynecological cancer. New prospects are discussed in management and prognosis of endometriosis and premature ovarian failure (POF).
