The Problems of Jurisprudence-Richard A. Posner 1993-03-15 In this book, one of our country's most distinguished scholar-judges shares with us his vision of the law. For the past two thousand years, the philosophy of law has been dominated by two rival doctrines. One contends that law is more than politics and yields, in the hands of skillful judges, correct answers to even the most difficult legal questions; the other contends that law is politics through and through and that judges wield essentially arbitrary powers. Rejecting these doctrines as too metaphysical in the first instance and too nihilistic in the second, Richard Posner argues for a pragmatic jurisprudence, one that eschews formalism in favor of the factual and the empirical. Laws, he argues, are not abstract, sacred entities, but socially determined goals for shaping behavior to conform with society's values. Examining how judges go about making difficult decisions, Posner argues that they cannot rely on either logic or science, but must fall back on a grab bag of informal

methods of reasoning that owe less than one might think to legal training and experience. Indeed, he reminds us, the greatest figures in American law have transcended the traditional conceptions of the lawyer's craft. Robert Jackson did not attend law school and Benjamin Cardozo left before getting a degree. Holmes was neither the most successful of lawyers nor the most lawyerly of judges. Citing these examples, Posner makes a plea for a law that frees itself from excessive insularity and takes all knowledge, practical and theoretical, as grist for its mill. The pragmatism that Posner espouses implies looking at problems concretely, experimentally, without illusions, with an emphasis on keeping diverse paths of inquiry open, and, above all, with the insistence that social thought and action be evaluated as instruments to desired human goals rather than as ends in themselves. In making his arguments, he discusses notable figures in jurisprudence from Antigone to Ronald Dworkin as well as recent movements ranging from law and economics to civic republicanism, and feminism to libertarianism. All are subjected to Posner's stringent analysis in a fresh and candid examination of some of the deepest problems presented by the enterprise of law.

The Architecture of Law-Brian M. McCall 2018-05-30 What is law? How should law be made? Using St.

Thomas Aquinas's analogy of God as an architect, Brian McCall argues that classical natural law jurisprudence provides an answer to these questions far superior to those provided by legal positivism or the "new" natural law theories. The Architecture of Law explores the metaphor of law as an architectural

building project, with eternal law as the foundation, natural law as the frame, divine law as the guidance provided by the architect, and human law as the provider of the defining details and ornamentation. Classical jurisprudence is presented as a synthesis of the work of the greatest minds of antiquity and the medieval period, including Cicero, Aristotle, Gratian, Augustine, and Aquinas; the significant texts of each receive detailed exposition in these pages. Along with McCall's development of the architectural image, he raises a question that becomes a running theme throughout the book: To what extent does one need to know God to accept and understand natural law jurisprudence, given its foundational premise that all authority comes from God? The separation of the study of law from knowledge of theology and morality, McCall argues, only results in the impoverishment of our understanding of law. He concludes that they must be reunited in order for jurisprudence to flourish. This book will appeal to academics, students in law, philosophy, and theology, and to all those interested in legal or political philosophy.

The Criminal Jurisprudence of the Ancient Hebrews-Samuel Mendelsohn 1891

Law and the Question of the Animal-Yoriko Otomo 2013 This book addresses the problem of 'animal life' in terms that go beyond the usual extension of liberal rights to animals. The discourse of animal rights is one that increasingly occupies the political, ethical and intellectual terrain of modern society. But, although the question of the status of animals holds an important place within a range of civil, political and technological disciplines, the issue of rights in relation to animals usually rehearses the familiar perspectives of legal, moral and humanist philosophy. 'Animal law' is fast becoming a topic of significant contemporary interest and discussion. This burgeoning interest has not, however, been matched by renewed inquiry into the jurisprudential frames and methods for the treatment of animals in law, nor the philosophical issue of the 'human' and the 'animal' that lies at law's foundation. Responding to this interest, *Law and the Question of the Animal: A Critical Jurisprudence* brings together leading and emerging critical legal theorists to address the question of animality in relation to law's foundations, practices and traditions of thought. In so doing, it engages a surprisingly underdeveloped aspect of the moral philosophies of animal rights, namely their juridical register and existence. How does 'animal law' alter our juridical image of personality or personhood? How do the technologies of law intersect with the technologies that invent, create and manage animal life? And how might the ethical, ontological and ceremonial relation between humans and animals be linked to a common source or experience of law?
