Loving Che-Ana Menendez 2007-12-01 In this "evocative first novel," an elderly woman looks back on the world of revolutionary Cuba as she recalls her intimate, secret love affair with Ernesto "Che" Guevara (Publishers Weekly). A young Cuban woman has been searching in vain for details of her birth mother. All she knows of her past is that her grandfather fled the turbulent Havana of the 1960s for Miami with her in tow, and that pinned to her sweater-possibly by her mother-were a few treasured lines of a Pablo Neruda poem. These facts remain her only tenuous links to her history, until a mysterious parcel arrives in the mail. Inside the soft, worn box are layers of writings and photographs. Fitting these pieces together with insights she gleans from several trips back to Havana, the daughter reconstructs a life of her mother, her youthful affair with the dashing, charismatic Che Guevara and the child she bore by the enigmatic rebel. Loving Che is a brilliant recapturing of revolutionary Cuba, the changing social mores, the hopes and disappointments, the excitement and terror of the times. It is also an erotic fantasy, a glimpse into the private life of a mythic public figure, and an exquisitely crafted meditation on memory, history, and storytelling. Finally, Loving Che is a triumphant unveiling of how the stories we tell about others ultimately become the story of ourselves. "A moving novel from a writer to watch." —Publishers Weekly "Inventive and hypnotic . . . [An] artful and restless examination of the exile soul." —Los Angeles Times "[Menendez] captures Cuba's potential, its desperation and decay, and also its dark humor." —The New York Times "The writing is consistently beautiful. Highly recommended." —Library Journal

A Contemporary Nursing Process-Dr. Rozzano C. Locsin, RN, PhD, FAAN 2009-04-10 "[This book] speaks against thinking [that] we can only understand nursing from a traditional, logical, empirical approach, suggesting we need a contemporary process for exploring nursing. I can't agree more." --Journal of Christian Nursing "Nurse scholars from across the globe contribute essays to this unique philosophical exploration of today's nursing. This book presents an emerging view that requires nursing to look at its work through a broader and less structured lens. Challenging the structure of the traditional nursing process, the book considers nursing as reflective and thoughtful." --Doody's A Contemporary Nursing Process re-envision the practice of nursing by configuring caring in terms of the person the nurse cares for. Locsin and Purnell stress the importance of knowing the patient, and differentiating the person from the disease. This text addresses this highly relevant issue, and provides a wealth of insight on how to care for the patient on a personal level, while still professionally administering clinical treatment. Chapters discuss: How to appreciate persons as participants in their care, rather than as objects of care The ideal of care versus the practical demands of care Technological advancements shaping human life and nursing The consequences of "not knowing" the patient on a personal level

This global coverage heightens the understanding of readers involved in care, education and prevention programs and otherwise concerned with the psychosocial development, reproductive health and general well-being of girls. FORENSIC INTERVIEWING IN CRIMINAL COURT MATTERS-Marc Nesca 2013-06-01 Forensic mental health assessment has essentially become synonymous with forensic psychological assessment. This necessary shift toward empirically grounded procedures has had the unfortunate by-product of diminishing the importance of the clinical interview in favor of procedures biased in the direction of rigid structure and statistical formulas. In contrast, the authors' approach to forensic mental health places the individual front and center in the assessment process. The need to treat the interviewee as an individual rather than a member of some statistically defined group is the recurring theme of this book. As much as possible, the text is focused on the interview proper. Issues related to the broader topic of forensic assessment are discussed as necessary to provide context. Although the issues discussed apply equally in civil and family court settings, the focus is on the criminal justice system. This is not a "how to" book but rather focuses primarily on the interview process and on general areas of inquiry. The text is organized into three sections: (1) general issues, (2) specific applications, and (3) special populations. Section 1 provides a conceptual foundation for the book by comparing and contrasting clinical and forensic interview strategies. Further, it introduces the concept of idiographic model construction central to the authors' approach to interviewing and also addresses the thorny issues of malingering and response bias. The section closes with a

discussion of practical considerations and technical issues applicable to forensic interviews. In section 2, the focus is narrowed to three criminal justice settings: retrospective insanity offenses, here and now adjudicative competency assessments, and forward-looking predisposition assessments. The final section further narrows its focus with chapters on interviewing sexual, violent, and adolescent offenders, as well as a chapter on third-party sources of information in forensic mental health evaluations. The book will serve as a valuable resource for a variety of mental health professionals as well as criminal justice administrators.
